Hamilton County

Estimated Economic Impact of Agriculture, Food, and Food Processing Sectors
6/26/2017

Using the most recent IMPLAN data available (2015) adjusted for 2017, 9 agriculture, food, and food processing sectors were analyzed to determine their overall contribution to the Hamilton County economy.[1]

These 9 sectors have a total direct output of approximately **$335.8 million** and support **638.8 jobs** in Hamilton County. Running the model for all 9 sectors simultaneously produces the following results:

Agriculture, Food, and Food Processing Sector Contribution to Overall Hamilton County Economy						
Impact Type[2]	Employment	% Employment	Total Value Added[3]	Total Value Added % of Gross Regional Product[4]	Output[5]	Output % of Gross Regional Product
Direct Effect	638.8	32.78%	$109,167,007	61.88%	$335,756,062	190.32%
Indirect Effect	273.3	14.02%	$17,584,353	9.97%	$35,782,798	20.28%
Induced Effect	158.0	8.11%	$9,533,234	5.40%	$18,919,918	10.72%
Total Effect	1,070.0	54.90%	$136,284,593	77.25%	$390,458,779	221.33%

As shown in the above table, agriculture, food, and food processing sectors support **1,070.0 jobs**, or **54.90%** of the entire workforce in the county. These sectors provide a total economic contribution of approximately **$390.5 million, roughly 221.33% of the economy.**

Another metric used to calculate the importance of sectors in an economy is their value added as a percentage of GRP. Total value added by the 9 agriculture, food, and food processing sectors is approximately **$136.3 million**, or **77.25% of the GRP**. This indicates that personal income, business income, and taxes generated by these sectors account for **77.25% of the total economy**.

The following tables document the overall summary numbers of the model, top industries affected by employment and output, and a listing of all industries that were analyzed.

1 Article on building a contribution analysis in IMPLAN that avoids double counting:
http://www.implan.com/index.php?option=com_content&view=article&id=660%3A660&catid=253%3AKB33&Itemid=70

2 Direct, indirect, and induced effects sum together to estimate the total economic contribution in the state. **Direct effects** capture the contribution from agricultural and food products. **Indirect effects** capture the economic benefit from farms and agricultural businesses purchasing inputs from supporting industries within the state. **Induced effects** capture the benefits created when employees of farms, agricultural businesses, and the supporting industries spend their wages on goods and services within the state.

3 Value added = labor income + indirect business taxes + other property type income.

4 GRP = final demand of households + governments expenditures + capital + exports - imports - institutional sales.

5 Output = intermediate inputs + value added.

In the top ten agriculture, food, and food processing sectors by employment, the beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming sector is the top employer with **288.6 employees**. This table also shows the amount of jobs that are created by the agriculture industry in Hamilton County.

Top Ten Agriculture, Food, and Food Processing Sectors by Employment		
Sector	**Total Employment**	**Total Output**
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	288.6	$103,181,378
Dairy cattle and milk production	266.8	$181,471,764
Real estate	82.6	$4,890,168
Wholesale trade	70.0	$12,657,864
Support activities for agriculture and forestry	47.1	$5,318,615
Grain farming	40.2	$41,574,784
All other crop farming	38.6	$8,290,333
Monetary authorities and depository credit intermediation	31.9	$4,888,392
Legal services	15.6	$986,638
Truck transportation	15.0	$3,777,749

The dairy cattle and milk production sector directly contributes approximately **$181.5 million** to the Hamilton County economy. The table below also shows the amount of revenue that is generated in other industries by having a strong agriculture industry.

Top Ten Agriculture, Food, and Food Processing Sectors by Output		
Sector	**Total Employment**	**Total Output**
Dairy cattle and milk production	266.8	$181,471,764
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	288.6	$103,181,378
Grain farming	40.2	$41,574,784
Wholesale trade	70.0	$12,657,864
All other crop farming	38.6	$8,290,333
Owner-occupied dwellings	0.0	$5,547,122
Support activities for agriculture and forestry	47.1	$5,318,615
Real estate	82.6	$4,890,168
Monetary authorities and depository credit intermediation	31.9	$4,888,392
Truck transportation	15.0	$3,777,749

Below is a summary of all agriculture data with employment levels and output level. These values can tell how many jobs are represented by each agriculture, food, and food processing sector and the output they contributed to the Hamilton County economy.

Sector	Total Employment	Total Output
All Agriculture, Food, and Food Processing Sectors		
Oilseed farming	0.1	$229,980.22
Grain farming	40.2	$41,574,783.33
All other crop farming	38.6	$8,290,332.79
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	288.6	$103,181,373.60
Dairy cattle and milk production	266.8	$181,471,755.98
Poultry and egg production	0.3	$495,030.34
Animal production, except cattle and poultry and eggs	0.8	$263,697.39
Bread and bakery product, except frozen, manufacturing	0.5	$56,521.04
Landscape and horticultural services	2.8	$192,573.68

All 105 counties in Kansas have an IMPLAN model and an agriculture, food, and food processing contribution summary. These values do not factor in the retail environment of food sales. Food retail is important, but in order to provide the most accurate picture of what production agricultural and processing contributes to Hamilton County, the retail sector was omitted.
