

KANSAS FARM FACTS

**PUBLISHED BY
KANSAS DEPARTMENT OF AGRICULTURE**

A MESSAGE FROM THE SECRETARY

Agriculture is the state's largest industry, economic driver and employer in Kansas. *Farm Facts* is a reliable reference book that contains statistical data on agricultural production, prices, farm income and various other economic figures within the state. Data for this publication is collected through the voluntary cooperation of Kansas farmers, ranchers and agribusinesses who responded to surveys conducted by the U.S. Department of Agriculture's National Agricultural Statistic Service (USDA NASS) and the Census of Agriculture.

Farm Facts is an active document that is updated regularly when new facts are released. The information is compiled by the Kansas Department of Agriculture.

Agriculture accounted for approximately 19 percent of the state's GDP and directly employs approximately 17 percent of the Kansas labor force -that's nearly one in five jobs in Kansas.

Kansas is a national leader in wheat, grain sorghum and beef production. Kansas ranked second in the nation for wheat and feed and fodders exports and third for beef, veal and skins exports. Livestock receipts were up 18 percent from the previous year and accounted for 56 percent of all receipts.

The dairy sector is also rapidly expanding, experiencing a six percent increase of milk production last year and averaging a seven percent increase this year. Other sectors of animal agriculture are growing as well.

Drought has placed a great deal of stress on our water supply resources statewide. In some areas of Kansas this is the third consecutive year of drought. Despite the challenges caused by the severe drought, Kansas farmers and ranchers continued growing grain and raising livestock.

Drought caused a slight drop in corn and sunflower production. The overall level of moisture has improved since the end of 2012 when 100 percent of the state was abnormally dry and 79.36 percent was in extreme or exceptional drought, the two highest designations, according to the U.S. Drought Monitor. As of July 23, the Drought Monitor reported 31.06 percent of the state as extreme or exceptional drought.

Although the drought is expected to persist throughout the summer months in western Kansas, eastern Kansas conditions are expected to keep improving. The drought has shown farmers that it is essential to protect, extend and conserve our most vital resource for future generations while still supporting the Kansas economy.

A handwritten signature in black ink that reads "Dale A. Rodman". The signature is written in a cursive, flowing style.

¹ Beginning with 1975, a farm is defined as any place with at least \$1,000 in annual sales of agricultural products. Between 1959 and 1975, a farm was defined as a place of 10 or more acres that had \$50 or more in annual sales of agricultural products or a place with fewer than 10 acres and annual sales of \$250 or more. Prior to 1959, a farm was defined as three acres or more with a value of farm products amounting to \$150 or more or fewer than three acres with sales of at least \$250. ² Land in farms estimates not available on an annual basis until 1950.

¹ Horse and mule estimates combined in 1956 and discontinued in 1961. In 1998, the estimate includes horses, ponies, mules, burros, and donkeys; series discontinued in 2000. ² Hog inventory is January 1 for 1867-1954 and December 1 of the preceding year for 1955 to date. ³ Milk cows that have calved beginning 1970. ⁴ All sheep beginning 1974. ⁵ Value of all livestock does not include equine.
