Re: Pending New Application, File No. 48,706

Dear Sir or Madam:

The City of Wichita has filed multiple new applications related to Phase II of its Equus Beds Aquifer Storage and Recovery (ASR) project. In all instances, the new applications, if approved, would authorize the recovery of aquifer recharge credits from an existing municipal supply well. The source of the recharge water will be treated surface water from the Little Arkansas River. The new application referred to above is requesting a permit to appropriate 500 acre-feet of groundwater to be diverted at a rate of 1,500 gallons per minute for municipal use. The specific location for the point of diversion is one (1) well designated as M-05, currently authorized under Vested Water Right, HV-06, and located as follows:

in the Northwest Quarter of the Northwest Quarter of the Southwest Quarter (NW¼ NW¼ SW¼) of Section 32, more particularly described as being near a point 2,428 feet North and 5,100 feet West of the Southeast corner of said section, Township 23 South, Range 2 West, Harvey County, Kansas.

Records in this office indicate that you may have a well or wells in this vicinity and you are being notified of receipt of this application in order that you may be fully informed of the proposed location of the applicant's point of diversion and proposed use of water. Consideration will be given to comments or other information which you desire to submit to this office **within 15 days** from the date of this letter.

In addition, the City of Wichita is seeking changes to its permit conditions related to the ASR project, principally to change the bottom of the "Basin Storage Area" and to allow it to develop recharge credits when recharge capacity is limited. You can find the application and site map posted by the file number referenced above, and additional information concerning the Wichita ASR project, including the upcoming public hearing on October 22, 2018, on our web site at: <http://www.agriculture.ks.gov/WichitaASR>. Please check that website for periodic updates about the Wichita ASR project, including any schedule changes.

If you have any questions or comments, you may contact me directly at (785) 296-3495. If you call, please reference the file number so I can help you more efficiently.

Re: Pending New Application, File No. 48,707

Dear Sir or Madam:

The City of Wichita has filed multiple new applications related to Phase II of its Equus Beds Aquifer Storage and Recovery (ASR) project. In all instances, the new applications, if approved, would authorize the recovery of aquifer recharge credits from an existing municipal supply well. The source of the recharge water will be treated surface water from the Little Arkansas River. The new application referred to above is requesting a permit to appropriate 500 acre-feet of groundwater to be diverted at a rate of 1,500 gallons per minute for municipal use. The specific location for the point of diversion is one (1) well designated as M-07, currently authorized under Vested Water Right, HV-06, and located as follows:

in the Southeast Quarter of the Southeast Quarter of the Northeast Quarter (SE $\frac{1}{4}$ SE $\frac{1}{4}$ NE $\frac{1}{4}$) of Section 6, more particularly described as being near a point 2,845 feet North and 158 feet West of the Southeast corner of said section, Township 24 South, Range 2 West, Harvey County, Kansas.

Records in this office indicate that you may have a well or wells in this vicinity and you are being notified of receipt of this application in order that you may be fully informed of the proposed location of the applicant's point of diversion and proposed use of water. Consideration will be given to comments or other information which you desire to submit to this office **within 15 days** from the date of this letter.

In addition, the City of Wichita is seeking changes to its permit conditions related to the ASR project, principally to change the bottom of the "Basin Storage Area" and to allow it to develop recharge credits when recharge capacity is limited. You can find the application and site map posted by the file number referenced above, and additional information concerning the Wichita ASR project, including the upcoming public hearing on October 22, 2018, on our web site at: <http://www.agriculture.ks.gov/WichitaASR>. The new application referred to above is requesting a permit to appropriate 500 acre-feet of groundwater to be diverted at a rate of 1,500 gallons per minute for municipal use. The specific location for the point of diversion is one (1) well designated as M-03, currently authorized under Vested Water Right, HV-06, and located as follows:

in the Southeast Quarter of the Southeast Quarter of the Southeast Quarter (SE $\frac{1}{4}$ SE $\frac{1}{4}$ SE $\frac{1}{4}$) of Section 30, more particularly described as being near a point 184 feet North and 220 feet West of the Southeast corner of said section, Township 23 South, Range 2 West, Harvey County, Kansas.

Records in this office indicate that you may have a well or wells in this vicinity and you are being notified of receipt of this application in order that you may be fully informed of the proposed location of the applicant's point of diversion and proposed use of water. Consideration will be given to comments or other information which you desire to submit to this office **within 15 days** from the date of this letter.

In addition, the City of Wichita is seeking changes to its permit conditions related to the ASR project, principally to change the bottom of the "Basin Storage Area" and to allow it to develop recharge credits when recharge capacity is limited. You can find the application and site map posted by the file number referenced above, and additional information concerning the Wichita ASR project, including the upcoming public hearing on October 22, 2018, on our web site at: <http://www.agriculture.ks.gov/WichitaASR>. Please check that website for periodic updates about the Wichita ASR project, including any schedule changes.

If you have any questions or comments, you may contact me directly at (785) 296-3495. If you call, please reference the file number so I can help you more efficiently.

Re: Pending New Application, File No. 48,705

Dear Sir or Madam:

The City of Wichita has filed multiple new applications related to Phase II of its Equus Beds Aquifer Storage and Recovery (ASR) project. In all instances, the new applications, if approved, would authorize the recovery of aquifer recharge credits from an existing municipal supply well. The source of the recharge water will be treated surface water from the Little Arkansas River. The new application referred to above is requesting a permit to appropriate 500 acre-feet of groundwater to be diverted at a rate of 1,500 gallons per minute for municipal use. The specific location for the point of diversion is one (1) well designated as M-03, currently authorized under Vested Water Right, HV-06, and located as follows:

in the Southeast Quarter of the Southeast Quarter of the Southeast Quarter (SE $\frac{1}{4}$ SE $\frac{1}{4}$ SE $\frac{1}{4}$) of Section 30, more particularly described as being near a point 184 feet North and 220 feet West of the Southeast corner of said section, Township 23 South, Range 2 West, Harvey County, Kansas.

Records in this office indicate that you may have a well or wells in this vicinity and you are being notified of receipt of this application in order that you may be fully informed of the proposed location of the applicant's point of diversion and proposed use of water. Consideration will be given to comments or other information which you desire to submit to this office **within 15 days** from the date of this letter.

In addition, the City of Wichita is seeking changes to its permit conditions related to the ASR project, principally to change the bottom of the "Basin Storage Area" and to allow it to develop recharge credits when recharge capacity is limited. Re: Pending New Application, File No. 48,718

Dear Sir or Madam:

The City of Wichita has filed multiple new applications related to Phase II of its Equus Beds Aquifer Storage and Recovery (ASR) project. In all instances, the new applications, if approved, would authorize the recovery of aquifer recharge credits from an existing municipal supply well. The source of the recharge water will be treated surface water from the Little Arkansas River. The new application referred to above is requesting a permit to appropriate 500 acre-feet of groundwater to be diverted at a rate of 1,500 gallons per minute for municipal use. The specific location for the point of diversion is one (1) well designated as M-29, currently authorized under Water Right, File No. 388, and located as follows:

in the Northwest Quarter of the Northwest Quarter of the Northwest Quarter (NW $\frac{1}{4}$ NW $\frac{1}{4}$ NW $\frac{1}{4}$) of Section 11, more particularly described as being near a point 5,194 feet North and 4,985 feet West of the Southeast corner of said section, in Township 25 South, Range 2 West, Sedgwick County, Kansas.

Records in this office indicate that you may have a well or wells in this vicinity and you are being notified of receipt of this application in order that you may be fully informed of the proposed location of the applicant's point of diversion and proposed use of water. Consideration will be given to comments or other information which you desire to submit to this office **within 15 days** from the date of this letter.

In addition, the City of Wichita is seeking changes to its permit conditions related to the ASR project, principally to change the bottom of the "Basin Storage Area" and to allow it to develop recharge credits when recharge capacity is limited. You can find the application and site map posted by the file number referenced above, and additional information concerning the Wichita ASR project, including the upcoming public hearing on October 22, 2018, on our web site at: <http://www.agriculture.ks.gov/WichitaASR>. Please check that website for periodic updates about the Wichita ASR project, including any schedule changes.

If you have any questions or comments, you may contact me directly at (785) 296-3495. If you call, please reference the file number so I can help you more efficiently.

Re: Pending New Application, File No. 48,719

Dear Sir or Madam:

The City of Wichita has filed multiple new applications related to Phase II of its Equus Beds Aquifer Storage and Recovery (ASR) project. In all instances, the new applications, if approved, would authorize the recovery of aquifer recharge credits from an existing municipal supply well. The source of the recharge water will be treated surface water from the Little Arkansas River. The new application referred to above is requesting a permit to appropriate 500 acre-feet of groundwater to be diverted at a rate of 1,500 gallons per minute for municipal use. The specific location for the point of diversion is one (1) well designated as M-30, currently authorized under Water Right, File No. 388, and located as follows:

in the Northeast Quarter of the Northeast Quarter of the Northwest Quarter (NE $\frac{1}{4}$ NE $\frac{1}{4}$ NW $\frac{1}{4}$) of Section 11, more particularly described as being near a point 5,200 feet North and 2,889 feet West of the Southeast corner of said section, in Township 25 South, Range 2 West, Sedgwick County.

Records in this office indicate that you may have a well or wells in this vicinity and you are being notified of receipt of this application in order that you may be fully informed of the proposed location of the applicant's point of diversion and proposed use of water. Consideration will be given to comments or other information which you desire to submit to this office **within 15 days** from the date of this letter.

In addition, the City of Wichita is seeking changes to its permit conditions related to the ASR project, principally to change the bottom of the "Basin Storage Area" and to allow it to develop recharge credits when recharge capacity is limited. You can find the application and site map posted by the file number referenced above, and additional information concerning the Wichita ASR project, including the upcoming public hearing on October 22, 2018, on our web site at: <http://www.agriculture.ks.gov/WichitaASR>

If you have any questions or comments, you may contact me directly at (785) 296-3495. If you call, please reference the file number so I can help you more efficiently.

Consideration will be given to comments or other information which you desire to submit to this office **within 15 days** from the date of this letter.

In addition, the City of Wichita is seeking changes to its permit conditions related to the ASR project, principally to change the bottom of the "Basin Storage Area" and to allow it to develop recharge credits when recharge capacity is limited. You can find the application and site map posted by the file number referenced above, and additional information concerning the Wichita ASR project, including the upcoming public hearing on October 22, 2018, on our web site at: <http://www.agriculture.ks.gov/WichitaASR>. Please check that website for periodic updates about the Wichita ASR project, including any schedule changes.

If you have any questions or comments, you may contact me directly at (785) 296-3495. If you call, please reference the file number so I can help you more efficiently.

Sincerely,

Re: Pending New Application, File No. 48,709

Dear Sir or Madam:

The City of Wichita has filed multiple new applications related to Phase II of its Equus Beds Aquifer Storage and Recovery (ASR) project. In all instances, the new applications, if approved, would authorize the recovery of aquifer recharge credits from an existing municipal supply well. The source of the recharge water will be treated surface water from the Little Arkansas River. The new application referred to above is requesting a permit to appropriate 500 acre-feet of groundwater to be diverted at a rate of 1,500 gallons per minute for municipal use. The specific location for the point of diversion is one (1) well designated as M-12, currently authorized under Vested Water Right, HV-06 and Water Right, File No. 388, and located as follows:

in the Northwest Quarter of the Northwest Quarter of the Southwest Quarter (NW $\frac{1}{4}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$) of Section 9, more particularly described as being near a point 2,430 feet North and 5,100 feet West of the Southeast corner of said section, in Township 24 South, Range 2 West, Harvey County.

Records in this office indicate that you may have a well or wells in this vicinity and you are being notified of receipt of this application in order that you may be fully informed of the proposed location of the applicant's point of diversion and proposed use of water. Consideration will be given to comments or other information which you desire to submit to this office **within 15 days** from the date of this letter.

In addition, the City of Wichita is seeking changes to its permit conditions related to the ASR project, principally to change the bottom of the "Basin Storage Area" and to allow it to develop recharge credits when recharge capacity is limited.
