*The rate is further limited to 1,085 gpm when combined with File No. 22,342.

5. It is proposed that the place of use be changed to:

The City of Hays, Kansas and its immediate vicinity as well as related areas in the Northeast Quarter (NE/4) of Section 19 and the Northwest Quarter (NW/4) of Section 36, T13S-R18W, Ellis County, Kansas;

The City of Russell, Kansas and its immediate vicinity;

The City of Victoria, Kansas and its immediate vicinity;

The City of La Crosse, Kansas and its immediate vicinity; and

The City of Ellis, Kansas and its immediate vicinity.

Upon the execution of a contract to purchase water from the Project, the authorized place of use should include industrial facilities or the corporate limits of the municipality, rural water district, or other entity entering into such contract for purchase and in the case of a municipality, its immediate vicinity.

7., 8., 9., and 10. Proposed Rate, Quantity, and Well Location

The Cities requested a total of 43.92 acre-feet at 1,000 gpm from the well associated with this water right, all of which would be diverted from new point of diversion "M," as shown on Exhibit G. When combined with existing wells from other water rights, new point of diversion "M" would have a cumulative total of 475.5 acre-feet at 3,500 gpm.

After extensive negotiation, the Cities and the Chief Engineer have reached a tentative agreement on numerous terms that are set out in an Initial Order, including an agreement to increase the quantity requested to 69.7 acre-feet per year. The Cities understand that the Initial Order is subject to review by the GMD and others and cannot be finalized until after that review. The Cities submit these amendments to their original Change Application but the amendments are contingent upon the entry of an Initial Order and a Final Order with terms that are acceptable to the Cities.

Subject to the negotiated terms set out in the Initial Order, the proposed municipal well "M" will be limited to a maximum rate of 950 gallons per minute.

Attached as Exhibits L and M are additional maps that show the location of the currently authorized points of diversion, a one-half mile buffer around each irrigation well, the proposed location of municipal well "M," a 1,000-foot radius around that location, and the proposed areal limits within which the new municipal wells can be located.

13. If changing the place of use and the use made of water, describe how the consumptive use will not be increased:

Quantity authorized and perfected

The Permit was issued on February 7, 1978, granting the applicant the right to divert up to 240 acre-feet annually at a rate not to exceed 1,000 gallons per minute for irrigation use on

160 acres in Section 14-T26S-R20W.¹ The Certificate further limited the diversion rate to 1,085 gallons per minute when combined with water right number 22,342.²

The Field Inspection Reports indicate that:

- 234 acre-feet were applied to 134 approved acres in the NW/4 of Section 14-T26S-R20W, or 1.75 acre-feet per acre.³
- The Permit authorized the perfection of 240 acre-feet per acre on 160 acres, or 1.5 acre-feet per acre, resulting in the perfection of 201 acre-feet.⁴
- 140 acre-feet were perfected on this circle under File 22,342. Thus only an additional 61 acre-feet were perfected.
- However, when the Certificate for File 22,342 was issued, it was limited to 75 acre-feet allocating the balance of 126 acre-feet to File 30,083.

Nevertheless, and pursuant to the negotiated terms set out in the Initial Order discussed above, the Cities request that the Chief Engineer approve a total of 69.7 acre-feet per year for municipal use.

Subject to the negotiated terms set out in the Initial Order, the proposed municipal well "M" will be limited to a maximum rate of 950 gallons per minute.
