## Overview

The Kansas Department of Agriculture’s Economist creates annual economic contribution reports to estimate the impact of agriculture on the Kansas economy. The purpose of these reports is to provide information for stakeholders, policymakers, and the general public. In this report, the model analyzes the effects of agriculture on the Wallace County, Kansas economy. For the estimated current year (2022), 19 agriculture and agriculture-related sectors directly contribute \$144 million in output and 465 jobs to the Wallace County economy. Including indirect and induced effects, agriculture and agriculture-related sectors have a total impact of \$162 million in output, 569 jobs and 42% of the total Gross Regional Product (GRP).

## Estimated Economic Contribution of Agriculture

Methodology and Glossary on final page

### Results

In this model, the 19 agriculture and agriculture-related sectors have a total direct output of \$144 million and account for 465 jobs in Wallace County, as shown in the following table:

Table 1: Agriculture and Agriculture-Related Sectors’ Contribution to Wallace County Economy

Contribution Type	Employment	% Employment	Total Value Added	% of Gross Regional Product	Output
Direct Effect	465	42%	\$22,548,000	29%	\$143,502,000
Indirect Effect	49	4%	\$5,436,000	7%	\$10,826,000
Induced Effect	54	5%	\$3,954,000	5%	\$7,547,000
<b>Total Effect</b>	<b>569</b>	<b>51%</b>	<b>\$31,939,000</b>	<b>42%</b>	<b>\$161,876,000</b>

Note: Individual effects may not equal the total effect due to rounding.

The agriculture and agriculture-related sectors provide a total estimated impact of \$162 million in output. These sectors also support a total of 569 jobs, or 51% of the county’s entire workforce. Another metric used to calculate the importance of sectors in the economy is their value added as a percentage of GRP. Total value added by the 19 agriculture and agriculture-related sectors is 32 million, or 42% of the GRP.

### Top Ten Sectors by Output

The table below shows Wallace County’s top ten sectors by output, including direct, indirect and induced effects. The *grain farming* sector is the top contributor in output to the Wallace County economy, with \$79 million in total output.

Table 2: Top Ten Sectors by Output, Wallace County

Sector	Total Output
Grain farming	\$79,018,000
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	\$23,568,000
Other animal food manufacturing	\$13,870,000
Nitrogenous fertilizer manufacturing	\$13,194,000
Support activities for agriculture and forestry	\$7,430,000
Animal production, except cattle and poultry and eggs	\$3,465,000
Owner-occupied dwellings	\$2,501,000
Wholesale - Other nondurable goods merchant wholesalers	\$2,430,000
Rail transportation	\$1,274,000
Wholesale - Machinery, equipment, and supplies	\$1,069,000

### Top Ten Sectors by Employment

Of the agriculture and agriculture-related sectors, *grain farming* supports the most jobs in the county with 159 jobs. Table 3 illustrates the top ten sectors by total employment, including direct, indirect and induced effects in Wallace County.

Table 3: Top Ten Sectors by Employment, Wallace County

Sector	Total Employment
Grain farming	159.47
Support activities for agriculture and forestry	150.46
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	103.53
Animal production, except cattle and poultry and eggs	13.75
Other animal food manufacturing	12.19
Nitrogenous fertilizer manufacturing	11.09
All other crop farming	10.16
Full-service restaurants	8.29
Wholesale - Other nondurable goods merchant wholesalers	7.97
Other real estate	5.99

### All Direct Agriculture Sectors

Table 4 is a summary of agriculture sectors represented with output and employment levels. These values estimate the value of output and the jobs these agriculture sectors support in the Wallace County economy. Generally, this analysis includes three categories: production, manufacturing or processing, and services. Note, the model does not include ethanol production or wholesale and retail sales of final products.

Table 4: All Direct Agriculture Sectors, Wallace County

Sector	Total Output	Total Employment
Grain farming	\$79,018,000	159.47
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	\$23,568,000	103.53
Other animal food manufacturing	\$13,870,000	12.19
Nitrogenous fertilizer manufacturing	\$13,194,000	11.09
Support activities for agriculture and forestry	\$7,430,000	150.46
Animal production, except cattle and poultry and eggs	\$3,465,000	13.75
Oilseed farming	\$1,034,000	0.58
Farm machinery and equipment manufacturing	\$630,000	1.44
All other crop farming	\$608,000	10.16
Bottled and canned soft drinks & water	\$322,000	0.58
Bread and bakery product, except frozen, manufacturing	\$90,000	0.65
Other snack food manufacturing	\$83,000	0.13
Roasted nuts and peanut butter manufacturing	\$59,000	0.13
Frozen cakes and other pastries manufacturing	\$56,000	0.65
Fiber, yarn, and thread mills	\$45,000	0.16
Commercial logging	\$10,000	0.13
Poultry and egg production	\$9,000	0.01
Forestry, forest products, and timber tract production	\$7,000	0.12
Commercial hunting and trapping	\$3,000	0.25

## Methodology

Using the economic software IMPLAN, the equilibrium displacement model calculates the estimated output and employment of all 546 different economic sectors if the current economy experiences no shocks within the agriculture and agriculture-related industries. IMPLAN sectors are based on North American Industry Classification System (NAICS) codes. The results of this model are broken down into direct, indirect and induced effects, and the IMPLAN framework avoids double counting. All agriculture and agriculture-related sectors represented in this model use the most recent IMPLAN data available (2020), adjusted for 2022 dollars.

## Notes and Glossary

These results are based on estimated production and employment numbers, along with estimated potential sector-, industry- and economy-wide effects. Therefore, these results may differ from actual events.

Due to confidentiality policies that exist within several agencies from which IMPLAN collects their data, some sectors in some regions may not have all data available.

The model provides results in relation to the agriculture and agriculture-related sectors. These results are not equal to the total effects of all 546 sectors but rather the total effects relative to agriculture.

The following terms are used throughout this report:

- *Direct effect*: the contribution from agricultural and food products
- *Indirect effect*: the contribution from farms and agricultural businesses purchasing inputs from supporting industries within the county
- *Induced effect*: the contribution from employees of farms, agricultural businesses, and supporting industries spending their wages on goods and services within the county
- *Value added* = labor income + indirect business taxes + other property type income
- *Gross Regional Product* = final demand of households + government expenditures + capital + exports – imports – institutional sales
- *Output* = intermediate inputs + value added
- *Employment*: full-time/part-time annual average, i.e., 1 job lasting 12 months = 2 jobs lasting 6 months each = 3 jobs lasting 4 months each. A job is neither full-time nor part-time.
