

Jackson County, Kansas

2023 ECONOMIC CONTRIBUTION REPORT
NOVEMBER 15, 2023

Overview

The Kansas Department of Agriculture's Economist creates annual economic contribution reports to estimate the impact of agriculture on the Kansas economy. The purpose of these reports is to provide information to stakeholders, policymakers, and the general public. In this report, the model analyzes the effects of agriculture on the Jackson County, Kansas, economy. For the estimated current year (2023), 26 agriculture and agriculture-related sectors directly contribute \$354 million in output and 1,188 jobs to the Jackson County economy. Including indirect and induced effects, agriculture and agriculture-related sectors have a total impact of \$407 million in output, 1,450 jobs and 23% of the total Gross Regional Product (GRP).

Estimated Economic Contribution of Agriculture.

Methodology and Glossary on final page

Results

In this model, the 26 agriculture and agriculture-related sectors have a total direct output of \$354 million and account for 1,188 jobs in Jackson County, as shown in the following table:

Table 1: Agriculture and Agriculture-Related Sectors' Contribution to Jackson County Economy

Contribution Type	Employment	% Employment	Total Value Added	% of Gross Regional Product	Output
Direct Effect	1,188	18%	\$107,494,000	19%	\$354,472,000
Indirect Effect	187	3%	\$15,471,000	3%	\$40,591,000
Induced Effect	75	1%	\$6,432,000	1%	\$12,335,000
Total Effect	1,450	22%	\$129,398,000	23%	\$407,399,000

Note: Individual effects may not equal the total effect due to rounding.

The agriculture and agriculture-related sectors provide a total estimated impact of \$407 million in output. These sectors also support a total of 1,450 jobs, or 22% of the county's entire workforce. Another metric used to calculate the importance of sectors in the economy is their value added as a percentage of the Gross Regional Product. Total value added by the 26 agriculture and agriculture-related sectors is \$129 million, or 23% of the Gross Regional Product.

Top Ten Sectors by Output

The table below shows Jackson County's top ten sectors by output, including direct, indirect and induced effects. The *animal production, except cattle and poultry and eggs* sector is the top contributor in output to the Jackson County economy, with \$87 million in total output.

Table 2: Top Ten Sectors by Output, Jackson County

Sector	Total Output
Animal production, except cattle and poultry and eggs	\$87,119,000
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	\$60,112,000
Animal, except poultry, slaughtering	\$59,149,000
Meat processed from carcasses	\$32,588,000
Grain farming	\$28,981,000
Oilseed farming	\$12,593,000
Other local government enterprises	\$6,615,000
Other real estate	\$4,515,000
Truck transportation	\$3,986,000
Wholesale - Other nondurable goods merchant wholesalers	\$3,986,000

Top Ten Sectors by Employment

Of the agriculture and agriculture-related sectors, *animal production, except cattle and poultry and eggs* supports the most jobs in the county with 393 jobs. Table 3 illustrates the top ten sectors by total employment, including direct, indirect, and induced effects in Jackson County.

Table 3: Top Ten Sectors by Employment, Jackson County

Sector	Total Employment
Animal production, except cattle and poultry and eggs	393.47
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	371.90
Meat processed from carcasses	117.56
Animal, except poultry, slaughtering	94.35
Grain farming	65.01
All other crop farming	63.49
Other real estate	40.00
Other local government enterprises	33.84
Truck transportation	27.36
Veterinary services	26.95

All Direct Agriculture Sectors

Table 4 is a summary of agriculture sectors represented with output and employment levels. These values estimate the value of output and the jobs these agriculture sectors support in the Jackson County economy. Generally, this analysis includes three categories: production, manufacturing or processing, and services. Note, the model does not include ethanol production nor wholesale and retail sales of final products.

Table 4: All Direct Agriculture Sectors, Jackson County

Sector	Total Output	Total Employment
Animal production, except cattle and poultry and eggs	\$87,119,000	393.47
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	\$70,497,000	371.90
Animal, except poultry, slaughtering	\$60,112,000	94.35
Meat processed from carcasses	\$59,149,000	117.56
Grain farming	\$32,588,000	65.01
Oilseed farming	\$28,981,000	20.23
All other crop farming	\$3,892,000	63.49
Breweries	\$3,084,000	7.80
Dairy cattle and milk production	\$2,485,000	2.43
Veterinary services	\$1,685,000	26.95
Greenhouse, nursery, and floriculture production	\$945,000	2.06
Poultry and egg production	\$751,000	0.43
Other snack food manufacturing	\$621,000	0.90
Bread and bakery product, except frozen, manufacturing	\$568,000	3.82
Support activities for agriculture and forestry	\$412,000	4.96
Roasted nuts and peanut butter manufacturing	\$402,000	0.88
Frozen cakes and other pastries manufacturing	\$351,000	3.82
Landscape and horticultural services	\$283,000	4.50
Other animal food manufacturing	\$237,000	0.24
Commercial logging	\$133,000	1.66
Forestry, forest products, and timber tract production	\$79,000	0.85
Commercial hunting and trapping	\$31,000	0.83
Tree nut farming	\$20,000	0.06
Fruit farming	\$17,000	0.05
Other leather and allied product manufacturing	\$15,000	0.23
Vegetable and melon farming	\$4,000	0.01

Methodology

Using the economic software IMPLAN, the equilibrium displacement model calculates the estimated output and employment of all 546 different economic sectors if the current economy experiences no shocks within the agriculture and agriculture-related industries. IMPLAN sectors are based on North American Industry Classification System (NAICS) codes. The results of this model are broken down into direct, indirect and induced effects, and the IMPLAN framework avoids double counting. All agriculture and agriculture-related sectors represented in this model use the most recent IMPLAN data available (2021), adjusted for 2023 dollars. For this model, key statistics are defined as follows: total employment refers to the annual average of the sum of full and part time jobs held attributed to the 72 agricultural sectors, total gross regional product is the sum of the value added of all industries across the state, and total output is the total annual value of production for an industry or area.

Notes and Glossary

These results are based on estimated production and employment numbers, along with estimated potential sector-, industry- and economy-wide effects. Therefore, these results will differ from actual events.

Due to confidentiality policies that exist within several agencies from which IMPLAN collects their data, some sectors in some regions may not have all data available.

The model provides results in relation to the agriculture and agriculture-related sectors. These results are not equal to the total effects of all 546 sectors but rather the total effects relative to agriculture.

The following terms are used throughout this report:

- *Direct effect*: the contribution from agricultural and food products
- *Indirect effect*: the contribution from farms and agricultural businesses purchasing inputs and services from supporting industries within the county
- *Induced effect*: the contribution from employees of farms, agricultural businesses, and supporting industries spending their wages on goods and services within the county
- *Value added* = labor income + indirect business taxes + other property type income
- *Gross Regional Product* = final demand of households + government expenditures + capital + exports – imports – institutional sales
- *Output* = intermediate inputs + value added
- *Employment*: full-time/part-time annual average, i.e., 1 job lasting 12 months = 2 jobs lasting 6 months each = 3 jobs lasting 4 months each (a job is neither full-time nor part-time)
