

FROM POOP TO PROFITS

Dung Beetle Management for Farms & Ranches

Monday July 1 & Tuesday July 2 , 2019

Neosho County Community College
Ottawa Campus
900 East Logan Street
Ottawa, KS 66067

Register: tallgrassnetwork.com/learn/

Cost \$149 lunch & materials provided

- Hear from keynote speaker, rancher Spencer Smith, about how he factors healthy ecological practices into his organic cattle herd;
- Learn about dung beetles of the prairies, their life cycles and needs;
- Tour a farm utilizing novel management for beetles;
- Learn strategies for profitability, including new eco-friendly markets opportunities;
- Start your own holistic plan for ecology and profitability management in a hands-on workshop setting.

SPEAKERS:

Spencer Smith, Jefferson Center for Holistic Management, Surprise Valley, California, a certified Holistic Management educator with the Savory Institute, conducting workshops, events and consultations in Northern California, Nevada and beyond.

Mary Liz Jameson, Wichita State University, a biodiversity scientist whose research focuses on evolutionary patterns and species diversity, important to understanding invasive species, habitat bio-indicators and more. And **Morgan Trible**, a graduate researcher in the Jameson lab.

Julie Mettenburg, Tallgrass Network, a certified Holistic Management educator providing training, workshops and consultations across Kansas and around the central U.S.
