

Area V: Neosho County

Neosho County Conservation District from Area 5 balances educational events and the state cost share program. They are currently assisting 18 landowners with their conservation efforts.

In 2022 and 2023, staff in Neosho County assisted with re-organizing the Regional Envirothon in Southeast Kansas, hosting the event in 2022.

Several years ago, a producer donated a base trailer to the district and a board member built a Streambank Erosion Trailer for the district. The trailer is taken to the county fair and surrounding counties for educational events. Neosho District staff works with area schools to hold the annual conservation poster contest each fall. Supervisors assist by judging the posters. Other educational events include hosting the Earth Ballon for a festival targeting 6th graders in the county, a forestry presentation, and assisting other districts with their field days. Neosho County helped host the Kansas Forest Service Fall Field Day in 2022.

The Neosho County Conservation District was chartered 80 years ago in 1943.
