It is requested that the reclamation work at this site, required by K.S.A. 49-611, be approved by the Division of Conservation, Kansas Department of Agriculture, and that the bonding for the above-listed acres in connection with this site be released.

This is to certify that all required reclamation work as it applies to this site has been completed in accordance with the requirements of K.S.A. 49-611 and Kansas Administrative Rules and Regulations (K.A.R. 11-8-7).

- All affected lands have been graded to slopes having a maximum of one foot of vertical rise for each three feet of horizontal distance, except that where the original topography of the affected land was steeper than one foot of vertical rise for each three feet of horizontal distance, and the spoil bank has been graded to blend with the surrounding terrain.
- All mining-related equipment and waste has been removed from the site to allow for proper revegetation of the site.
- Erosion control methods have been used to prevent rill, gully and washout formation.
- All land affected by the mining operation has been re-vegetated except for impoundments, pit floors, and highwalls. **Each operator shall allow the seeded vegetation to become established before filing a release request.**
- Other work completed: _____.
