Kansas Department of Agriculture, Division of Conservation
Notice of Advertising On-Call Engineered Design Services Contract

The Division of Conservation is seeking contractors who can provide On-Call Engineered Design Services for streambank stabilization and restoration projects. These services would include project site surveys, stabilization and restoration design, project construction oversight, and project checkout. The contractor does not necessarily need to be an engineer themselves but must have the capability to provide engineered stamped plans/services for assigned projects. Project focus areas are currently the watersheds above Tuttle, Perry and John Redmond reservoirs.

Contract specifications and qualifications can be found at:

<https://agriculture.ks.gov/divisions-programs/division-of-conservation/riparian-wetland-streambank>

Design proposals will be accepted via email through Friday, March 17th.

For additional information or to submit design proposals please contact Kristin Kloft, via email at Kristin.a.kloft@ks.gov or by phone 785-370-1585.

Andrew Lyon
Executive Director
Division of Conservation
