11. Describe the current condition of and future plans for any point(s) of diversion which will no longer be used. __________

   See paragraph 11 of the cover letter.

IF MORE SPACE IS NEEDED, ATTACH ADDITIONAL SHEETS AS NECESSARY.
5. It is proposed that the place of use be changed to:

The City of Hays, Kansas and its immediate vicinity as well as related areas in the Northeast Quarter (NE/4) of Section 19 and the Northwest Quarter (NW/4) of Section 36, T13S-R18W, Ellis County, Kansas;

The City of Russell, Kansas and its immediate vicinity;

The City of Victoria, Kansas and its immediate vicinity;

The City of La Crosse, Kansas and its immediate vicinity; and

The City of Ellis, Kansas and its immediate vicinity.

Upon the execution of a contract to purchase water from the Project, the authorized place of use should include industrial facilities or the corporate limits of the municipality, rural water district, or other entity entering into such contract for purchase and in the case of a municipality, its immediate vicinity.

7., 8., 9., and 10. Proposed Rate, Quantity, and Well Location

The Cities requested a total a total of 175.1 acre-feet at 950 gpm from the well associated with this water right, all of which would be diverted from new point of diversion “I,” as shown on Exhibit K. When combined with existing wells from other water rights, new point of diversion “I” would have a cumulative total of 587.78 acre-feet at 2,950 gpm.

After extensive negotiation, the Cities and the Chief Engineer have reached a tentative agreement on numerous terms that are set out in an Initial Order, including an agreement to reduce the quantity requested to 145.8 acre-feet per year. The Cities understand that the Initial Order is subject to review by the GMD and others and cannot be finalized until after that review. The Cities submit these amendments to their original Change Application but the amendments are contingent upon the entry of an Initial Order and a Final Order with terms that are acceptable to the Cities.

Subject to the negotiated terms set out in the Initial Order, the proposed municipal well “I” will be limited to a maximum rate of 805 gallons per minute.

Attached as Exhibits Q and R are additional maps that show the location of the currently authorized points of diversion, a one-half mile buffer around each irrigation well, the proposed location of municipal well “I,” a 1,000-foot radius around that location, and the proposed areal limits within which the new municipal wells can be located.

13. If changing the place of use and the use made of water, describe how the consumptive use will not be increased:

Quantity authorized and perfected

The Permit was issued on March 19, 1976, granting the applicant the right to divert up to 245 acre-feet annually at a rate not to exceed 1,000 gallons per minute for irrigation use\(^1\) on 136

---

\(^{1}\) Permit, HAYS002420, Ex. A.
acres in the NE/4 of Section 1-T26S-R20W, or 1.80 acre-feet per acre. The Certificate further limited the rate of the wells to 950 gallons per minute when operated simultaneously.

In the cover letter transmitting the Permit, DWR made findings of fact stating that “the proposed use is for a beneficial purpose and is within reasonable limitations. If priorities are observed and respected, the proposed use will neither impair any use under existing water rights nor prejudicially and unreasonably affect the public interest.”

DWR’s Field Inspection Reports indicate that 243.20 of the 245 acre-feet authorized by the Permit were lawfully perfected.

- 169 acre-feet\(^5\) and 164 acre-feet\(^6\) (333 acre-feet) were applied to 135 approved acres in the NE/4 of Section 1-T265S-R20W
- The Permit authorized the perfection of 1.80 acre-feet per acre but only 135 acres were irrigated during the perfection period, resulting in perfection of 243.20 acre-feet.\(^7\)

While the Certificate limits the total quantity to 203 acre-feet based on DWR’s after-the-fact determination that 1.5 acre-feet per acre was a reasonable quantity for irrigation use, DWR did not have jurisdiction to make this reduction.\(^8\)

Since the perfection period has expired, the “authorized quantity” for this water right is the 243.20 acre-feet actually perfected even though it exceeds the certified quantity.

Nevertheless, and pursuant to the negotiated terms set out in the Initial Order discussed above, the Cities request that the Chief Engineer approve a total of 145.8 acre-feet per year for municipal use.

Subject to the negotiated terms set out in the Initial Order, the proposed municipal well “I” will be limited to a maximum rate of 805 gallons per minute.
