RE: File No. 22329

Dear Sir or Madam:

An application for approval of the Chief Engineer to change the following condition or conditions of the file number referred to above has been received:

☐ place of use PU/PD/WMU
☐ point of diversion
☐ use made of water

As a matter of record, the Division of Water Resources has on hand a large number of applications awaiting processing. Therefore to be fair to all concerned, and so that we can process those applications on hand in the order they were received, we intend to concentrate on the backlog of applications until the issue is resolved. You will be contacted regarding this application as soon as it has been examined.

In accordance with the provisions of the Kansas Water Appropriation Act, a portion of which is included below, the use of water prior to approval of the application is unlawful. You should not proceed and divert water as indicated by your plans in your application for a change for this file until you receive approval for this change from the Chief Engineer. Once approved, compliance with the terms, conditions and limitations of the permit is necessary. Conservation of the water resources of Kansas is required.

Section 82a-728 of the Kansas Water Appropriation Act, provides (a) except for the appropriation of water for the purpose of domestic use, . . . it shall be unlawful for any person to appropriate or threaten to appropriate water from any source without first applying for and obtaining a permit to appropriate water in accordance with the provisions of the Water Appropriation Act or for any person to violate any condition of a vested right, appropriation right or an approved application for a permit to appropriate water for beneficial use.

(b) (1) The violation of any provision of this section by any person is a class C misdemeanor...

A class C misdemeanor is punishable by a fine not to exceed $500 and/or a term of confinement not to exceed one month in the county jail. Each day that the violation occurs constitutes a separate offense.

If you have any questions, please contact me at (785) 564-6645. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

Brent A. Turney, L.G.

APPLICATION FOR APPROVAL TO CHANGE THE PLACE OF USE, THE POINT OF DIVERSION OR THE USE MADE OF THE WATER UNDER AN EXISTING WATER RIGHT

Filing Fee Must Accompany the Application
(Please refer to Fee Schedule on signature page of application form.)

Paragraph Nos. 1, 2, 3, 4 & 8 must be completed. Complete all other applicable portions. A topographic map or detailed plat showing the authorized and proposed points(s) of diversion and/or place of use must accompany this application.

1. Application is hereby made for approval of the Chief Engineer to change the
☐ Place of Use
☐ Point of Diversion
☐ Use Made of Water

File No. 22,329 Circle 24.

2. Name of applicant: City of Hays, Kansas and City of Russell, Kansas (See paragraph 2 of the cover letter.)
Address: c/o Foulston Siefkin LLP, 1551 N. Waterfront Parkway, Suite 100
City, State and Zip: Wichita, Kansas 67206
Phone Number: (316 ) 291-9725 E-mail address: dtraster@foulston.com

What is your relationship to the water right; ☐ owner ☐ tenant ☐ agent ☐ other? If other, please explain. Hays and Russell are co-owners of the authorized place of use on the R9 Ranch in Edwards County.

Name of water use correspondent: City of Hays, Kansas
Address: P. O. Box 490, 1507 Main Street
City, State and Zip: Hays, Kansas 67601
Phone Number: (785 ) 628-7320 E-mail address: tdougherty@haysusa.com

3. The change(s) proposed herein are desired for the following reasons (please be specific): See Paragraph 3 of the cover letter filed concurrently with this application. The cover letter is incorporated herein by reference.

The change(s) (was) (will) be completed by See Paragraph 3 of the cover letter (Date)

**IF MORE SPACE IS NEEDED, ATTACH ADDITIONAL SHEETS AS NECESSARY.**
6. The presently authorized point(s) of diversion (is) (are) irrigation well(s) described in paragraph 8, infra. (Provide description and number of points)

7. The proposed point(s) of diversion (is) (are) one or more municipal wells; see paragraph 7 of the cover letter. (Provide description and number of points)

List all presently authorized point(s) of diversion:

8. **Presently authorized point of diversion:**
   - One in the NE Quarter of the SW Quarter of the NE Quarter of the SW Quarter of the Section 1 Township 26 South, Range 20 (E/W), in Edwards County, Kansas, 1,380 feet North 4,090 feet West of Southeast corner of section.
   - Authorized Rate: 570 gpm
   - Authorized Quantity: 108 a/f
   - (DWR use only: Computer ID No. GPS feet North feet West)
   - This point will not be changed
   - This point will be changed as follows:
     - Proposed point of diversion: (Complete only if change is requested)
       - One in the NE Quarter of the SW Quarter of the SW Quarter of the Section 1 Township 26 South, Range 20 (E/W), in Edwards County, Kansas, 1,341 feet North 4,056 feet West of Southeast corner of section.
       - Proposed Rate: 570 gpm
       - Proposed Quantity: 150.48 a/f
       - This point is:
         - Additional Well
         - Geo Center
         - List other water rights that will use this point 22,330-32; 30,084

9. **Presently authorized point of diversion:**
   - One in the Quarter of the Quarter of the Quarter of the Section Township South, Range (K/W), in County, Kansas, feet North feet West of Southeast corner of section.
   - Authorized Rate
   - Authorized Quantity
   - (DWR use only: Computer ID No. GPS feet North feet West)
   - This point will not be changed
   - This point will be changed as follows:
     - Proposed point of diversion: (Complete only if change is requested)
       - One in the Quarter of the Quarter of the Quarter of the Section Township South, Range (E/W), in County, Kansas, feet North feet West of Southeast corner of section.
       - Proposed Rate
       - Proposed Quantity
       - This point is:
         - Additional Well
         - Geo Center
         - List other water rights that will use this point

10. **Presently authorized point of diversion:**
    - One in the Quarter of the Quarter of the Quarter of the Section Township South, Range (K/W), in County, Kansas, feet North feet West of Southeast corner of section.
    - Authorized Rate
    - Authorized Quantity
    - (DWR use only: Computer ID No. GPS feet North feet West)
    - This point will not be changed
    - This point will be changed as follows:
      - Proposed point of diversion: (Complete only if change is requested)
        - One in the Quarter of the Quarter of the Quarter of the Section Township South, Range (E/W), in County, Kansas, feet North feet West of Southeast corner of section.
        - Proposed Rate
        - Proposed Quantity
        - This point is:
          - Additional Well
          - Geo Center
          - List other water rights that will use this point

11. Describe the current condition of and future plans for any point(s) of diversion which will no longer be used. See paragraph 11 of the cover letter.

   **IF MORE SPACE IS NEEDED, ATTACH ADDITIONAL SHEETS AS NECESSARY.**
12. The presently authorized use of water is for irrigation purposes. It is proposed that the use be changed to municipal purposes.

13. If changing the place of use and/or use made of water, describe how the consumptive use will not be increased. See the attached discussion regarding the quantity of water to be changed to municipal use and paragraph 13 of the cover letter.

(Please show any calculations here.)

14. It is requested that the maximum annual quantity of water be reduced to not applicable (acre-feet or million gallons).

15. It is requested that the maximum rate of diversion of water be reduced to not applicable gallons per minute (____ c.f.s.).

16. The application must include either a topographic map or detailed plat. A U.S. Geological Survey Topographic Map, scale 1:24,000, is available through the Kansas Geological Survey, 1930 Constant Avenue, University of Kansas, Lawrence, Kansas 66047-3726 (www.usgs.gov). The map should show the location of the presently authorized point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. The presently authorized place of use should also be shown. Identify the center of the section, the section lines and the section corners and show the appropriate section, township, and range numbers on the map. In addition the following information must also be shown on the map.

a. If a change in the location of the point(s) of diversion is proposed, show:
   1) The location of the proposed point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. Please be certain that the information shown on the map agrees with the information shown in Paragraph Nos. 9, 10 and 11 of the application.
   2) If the source of supply is groundwater, please show the location of existing water wells of any kind, including domestic wells, within ½ mile of the proposed well or wells. Identify each well as to its use and furnish name and mailing address of the property owner or owners. If there are no wells within ½ mile, please indicate so on the map.
   3) If the source of supply is surface water, the names and mailing addresses of all landowner(s) ½ mile downstream and ½ mile upstream from your property lines must be shown.

b. If a change in the place of use is desired, show the proposed place of use by crosshatching on the map. Please be certain that the information shown on the map agrees with the information shown in Paragraph No. 5 of the application.

17. Attach documentation to show the change(s) proposed herein will not impair existing water rights and relates to the same local source of supply as to which the water right relates. This information may include statements, plats, geology reports, well logs, test hole logs, and other information as necessary information to show the above. Additional comments may be made below.

See paragraph 17 of the cover letter.

18. If the proposed change(s) does not meet all applicable rules and regulations of the Kansas Water Appropriation Act, please identify the rules and regulations for which you request a waiver. State the reason why a waiver is needed and why the request should be granted. Attach documentation showing that granting the request will not impair existing water rights and will not prejudicially and unreasonably affect the public interest.

See paragraph 7 of the cover letter.
Any use of water that is not as authorized by the water right or permit to authorize water before the chief engineer approves this application is a violation of the Kansas Water Appropriation Act for which criminal or civil penalties may be assessed. Such violation is a class C misdemeanor, punishable by a fine not to exceed $500 and/or a term of confinement not to exceed one month in the county jail. K.S.A. 82a-728(b). Civil penalties shall be not less than $100 nor more than $1,000 per violation. In the case of a continuing violation, each day such violation continues may be deemed a separate violation. In addition to these penalties the water right may be modified or suspended. K.S.A. 82a-737, as amended.

The application must be signed by all owners of the place of use authorized under the water right and his or her spouse, if married. Please indicate if there is no spouse. If land is being purchased under contract, the seller must sign as landowner until such time as the contract is completed.

In the event that all applicants cannot appear before one notary public, they may as necessary sign separate copies of the application before any notary public conveniently available to them. All copies signed in this manner shall be considered to be valid parts of the application.

If the request is signed on behalf of any Owner by someone with legal authority to do so (for example, an agent, one who has power of attorney, or an executor, executrix, conservator), it will be necessary to attach proper documents showing such authority.

I declare that I am an owner of the currently authorized place of use as identified herein, or that I represent all such owners and am authorized to make this application on their behalf, and declare further that the statements contained herein are true, correct, and complete. By filing this application I authorize the chief engineer to permanently reduce the quantity of water and/or rate of diversion as specified in sections 14 and 15 of this application.

FEE SCHEDULE

Each application to change the place of use, the point of diversion or the use made of the water under this section shall be accompanied by the application fee set forth in the schedule below:

1. Application to change a point of diversion 300 feet or less ........................................................ $100
2. Application to change a point of diversion more than 300 feet ....................................................... $200
3. Application to change the place of use .................................................................................................. $200
4. Application to change the use made of the water .............................................................................. $300

Make check payable to Kansas Department of Agriculture.
Any use of water that is not as authorized by the water right or permit to authorize water before the chief engineer approves this application is a violation of the Kansas Water Appropriation Act for which criminal or civil penalties may be assessed. Such violation is a class C misdemeanor, punishable by a fine not to exceed $500 and/or a term of confinement not to exceed one month in the county jail. K.S.A. 82a-728(b). Civil penalties shall be not less than $100 nor more than $1,000 per violation. In the case of a continuing violation, each day such violation continues may be deemed a separate violation. In addition to these penalties the water right may be modified or suspended. K.S.A. 82a-737, as amended.

The application must be signed by all owners of the place of use authorized under the water right and his or her spouse, if married. Please indicate if there is no spouse. If land is being purchased under contract, the seller must sign as landowner until such time as the contract is completed.

In the event that all applicants cannot appear before one notary public, they may as necessary sign separate copies of the application before any notary public conveniently available to them. All copies signed in this manner shall be considered to be valid parts of the application.

If the request is signed on behalf of any owner by someone with legal authority to do so (for example, an agent, one who has power of attorney, or an executor, executrix, conservator), it will be necessary to attach proper documents showing such authority.

I declare that I am an owner of the currently authorized place of use as identified herein, or that I represent all such owners and am authorized to make this application on their behalf, and declare further that the statements contained herein are true, correct, and complete. By filing this application I authorize the chief engineer to permanently reduce the quantity of water and/or rate of diversion as specified in sections 14 and 15 of this application.

FEE SCHEDULE

Each application to change the place of use, the point of diversion or the use made of the water under this section shall be accompanied by the application fee set forth in the schedule below:

(1) Application to change a point of diversion 300 feet or less ........................................ $100
(2) Application to change a point of diversion more than 300 feet .................................... $200
(3) Application to change the place of use .................................................................................. $200
(4) Application to change the use made of the water ............................................................... $300

Make check payable to Kansas Department of Agriculture.
Proposed Rate and Quantity

The Cities are requesting a total of 150.48 acre-feet and 570 gpm from the well associated with this water right, which will be diverted from new point of diversion J, as shown on Exhibit I. When combined with existing wells from other water rights, new point of diversion J will have a cumulative total of 678.44 acre-feet and 3,170 gpm.

13. If changing the place of use and the use made of water, describe how the consumptive use will not be increased:

The following discussion is subject to paragraph 13 of the cover letter regarding consumptive use.

DWR Regulation, K.A.R. 5-5-9(a), provides that the default calculation used to address the consumptive use issue allows the conversion of 131.76 acre-feet to municipal use. As discussed below, 122 approved acres irrigated during the perfection multiplied by the Edwards County NIR for corn of 1.08 acre-feet per acre equals 131.76 acre-feet.

That same regulation goes on to allow the change to be based on the net consumptive use actually made during the perfection period.

Quantity authorized and perfected

The permit was issued on March 19, 1976, granting the right to divert up to 220 acre-feet annually at a rate not to exceed 1,000 gallons per minute for irrigation use on 122 acres in the SW/4 of Section 1-T26S-R20W, or 1.80 acre-feet per acre. The certificate limited the rate to 570 gallons per minute.

In the cover letter transmitting the permit, DWR made findings of fact stating that “the proposed use is for a beneficial purpose and is within reasonable limitations. If priorities are observed and respected, the proposed use will neither impair any use under existing water rights nor prejudicially and unreasonably affect the public interest.”

DWR’s Field Inspection Reports indicate that 209 of the 220 acre-feet authorized by the permit were lawfully perfected.

• 209 acre-feet were applied to 122 approved acres in the SW/4 of Section 1-T26S-R20W.

The certificate limits the total quantity to 108 acre-feet based on the proration of the quantity perfected and the quantity perfected under File No. 30,084 and on DWR’s after-the-fact

---

1 K.A.R. 5-5-9(a) and (a)(1).
2 K.A.R. 5-5-12, NIR Requirements.
3 K.A.R. 5-5-9(b).
4 Permit, HAYS002500, Ex. A.
5 Application, HAYS002495, Ex. B.
6 March 16, 1976, letter (emphasis added), HAYS002499, Ex. C.
7 FIR, HAYS002484, Ex. D.
determination that 1.5 acre-feet per acre was a reasonable quantity for irrigation use. DWR did not have jurisdiction to make the latter reduction.\(^8\)

Since the perfection period has expired, the "authorized quantity" for this water right is the 209 acre-feet actually perfected even though it exceeds the certified quantity.

\textit{An alternative approach}

DWR's use of the NIR of 1.08 feet of water for corn is based on its maximum gross irrigation requirement of 1.5 acre-feet per acre.\(^9\) The regulation allows the conversion of 72% of the maximum quantity to a new use; in other words, it assumes that 28% of the quantity diverted returns to the aquifer.

If 28% of the 209 acre-feet legally applied during the perfection period percolates back to the aquifer, then 72%, or 150.48 acre-feet, should be available for conversion to municipal use. This is less than the 209 acre-feet authorized so the limitation in K.A.R. 5-5-9(a)(4) is not implicated.

The Applicants request that DWR approve a total of 150.48 acre-feet for municipal use.

\(^9\) Administrative Policy No. 86-8, dated Nov. 5, 1986, Ex. G, stating that: "In that area of Kansas located between the Range 5 East/Range 6 East Line and the Range 20 West/Range 21 West line, the maximum allowable quantity shall not exceed an average of 1.50 acre-feet per acre irrigated." See also, K.A.R. 5-3-24 and Larry Sheets Memo dated April 3, 1987, HAYS002503, Ex. F.

Guy E. Gibson, Chief Engineer

APPROVAL OF APPLICATION
and
PERMIT TO PROCEED
(This Is Not a Certificate of Appropriation)

This is to certify that I have examined Application No. 22,329 of the applicant

Midwest Land and Cattle Co.
Box 208
Kinsley, Kansas 67547

for a permit to appropriate water to beneficial use, together with the maps, plans and other submitted data, and that the application is hereby approved and the applicant is hereby authorized, subject to vested rights and prior appropriations, to proceed with the construction of the proposed diversion works and to proceed with all steps necessary for the application of the water to the approved and proposed beneficial use and otherwise perfect the proposed appropriation subject to the following terms, conditions and limitations:

1. That the priority date assigned to such application is May 2, 1974.

2. That the water sought to be appropriated shall be used for irrigation on the land described in the application.

3. That the source from which the appropriation is made shall be from ground water in the drainage basin of the Arkansas River to be withdrawn by means of one (1) well near the center of the Southwest Quarter (SWQ) of Section 1, Township 26 South, Range 20 West, in Edwards County, Kansas, located substantially as shown on the aerial photograph accompanying the application.

4. That the appropriation sought shall be limited to a maximum diversion rate not in excess of 1000 gallons per minute (2.23 c.f.s.) and to a quantity of not to exceed 220 acre-feet for any calendar year.
6. That the proposed appropriation shall be perfected by the actual application of water to the proposed beneficial use on or before December 31, 1977.

7. That the applicant shall maintain records from which the quantity of water actually diverted during each calendar year may be readily determined. Such records shall be furnished to the Chief Engineer as soon as practicable after the close of each calendar year.

8. That the applicant shall not be deemed to have acquired a water appropriation for a quantity in excess of the amount approved herein nor in excess of the amount found by the Chief Engineer to have been actually used for the approved purpose during one calendar year subsequent to approval of the application and within the time specified or any authorized extension thereof.

9. That the use of water herein authorized shall not impair any use under existing water rights nor prejudicially and unreasonably affect the public interest.

10. That the right of the appropriator shall relate to a specific quantity of water and such right must allow for a reasonable raising or lowering of the static water level and for the reasonable increase or decrease of the streamflow at the appropriator's point of diversion.

11. That this permit does not constitute authority under K.S.A. 82a-301 to 305 to construct any dam or other obstruction; it does not give any right-of-way, or authorize any injury to, or trespass upon, public or private property; it does not obviate the necessity of obtaining consent from Federal or Local Governmental authorities when necessary.

12. That failure without cause to comply with provisions of the permit and its terms, conditions and limitations will result in the forfeiture of the priority date, revocation of the permit and disapproval of the application.

Dated this 19th day of March 1976

Guy E. Gibson, Chief Engineer
Division of Water Resources
Kansas State Board of Agriculture

WATER RESOURCES RECEIVED

JUN 29 2015

KS DEPT OF AGRICULTURE

HAYS002501
APPLICATION FOR PERMIT TO APPROPRIATE WATER FOR BENEFICIAL USE

To the Chief Engineer of the Division of Water Resources, Kansas State Board of Agriculture:

(Mr.) Midwest Land and Cattle Co., whose post office address is Box 206, Kinley, Kansas 67547, makes application to the Chief Engineer of the Division of Water Resources, Kansas State Board of Agriculture, for a permit to appropriate for beneficial use such unappropriated groundwater as may be available in the Arkansas River basin in the county of Edwards, state of Kansas, to the extent and in accordance with the particulars hereinafter described:

1. The quantity of water desired is in the amount of 1,220 acre feet per year, to be diverted at a maximum rate of 10,000 gallons per minute.

2. The location of the proposed wells or other works for diversion of water is in the quarter of the____ quarter of the _____ quarter of section 1, township 26 S., range 820 W., in Edwards County, Kansas. (Section 1 is more than 1 mile long)

3. The water is intended to be appropriated for:

- (a) Domestic use
- (b) Municipal use
- (c) Irrigation use
- (d) Industrial use
- (e) Recreational use
- (f) Power use

Amount

Check intended uses or uses and indicate quantity for each use.
4. If for municipal use, attach tables or curves showing past, present and estimated future population and water requirements of the city.

5. If for industrial use, attach tables or curves showing past, present and estimated future water requirements.

6. If for irrigation use list below or attach name and address of each landowner and the legal description of the lands to be irrigated by designating the actual number of acres to be irrigated in each forty acre tract or fractional portion thereof:

WATER RESOURCES RECEIVED  JUN 29 2015
KS DEPT. OF AGRICULTURE

HAYS002495
7. The works for diversion of water will consist of one well with one pump for one circle sprinkler irrigation system (one motor) and will be completed by July 1974.

8. The first actual application of water for the beneficial use proposed was or is estimated to be July 1974.

9. The application must be accompanied either by a detailed plat prepared from an actual survey or by an aerial photograph of the area.

The plat or aerial photograph should show:
   (a) Location of the proposed point or points of diversion
   (b) Location of the pipe lines, canals, reservoirs or other facilities for conveying water from the point of diversion to the place of use
   (c) If for irrigation, show the location of the land proposed to be irrigated
   (d) If for industrial or other use, show the location of the land where water will be used.

10. List and describe other applications filed or vested rights held by applicant:

Irrigation wells and land is in the process of being bought from a company known as the Kinsley Joint Venture (Wheatheart Land Co.) Applications have been filed for the water rights...

11. The relation of the subscriber to this application is that of agent (Owner, agent or otherwise) and he is authorized to make this application in behalf of the interest affected.

Dated at Kinsley, Kansas, this 22 day of April, 1974.

Midwest Land & Cattle Co.

By

Agent or Officer

Note:

1 cubic foot per second = 448.8 gallons per minute = 648,317 gallons per day = 1.96 acre feet per day.

1 million gallons per day = 1,547 cubic feet per second = 3.07 acre feet per day.

1 acre foot = 43,560 cubic feet = 325,851 gallons.
March 16, 1976

Box 208
Kinsley, Kansas 67547

ATTENTION: Mr. Johnny Carson, Manager

Re: Appropriation of Water
Application No. 22,329

Gentlemen:

Your application has been examined and is found to be in proper form. Further, we find that the proposed use is for a beneficial purpose and is within reasonable limitations. If priorities are observed and respected, the proposed use will neither impair any use under existing water rights nor prejudicially and unreasonably affect the public interest. It is presumed that the application is made in good faith, and that you are ready to proceed with the proposed diversion works and the application of water to the proposed use. The application has, therefore, been approved.

There is enclosed the approval of the application authorizing you to proceed with construction of the proposed diversion works, to divert such unappropriated water as may be available from the source and at the location specified in the approval of application, and to use it for the purpose and at the location described in the application.

There is also enclosed a memorandum setting forth the procedure to obtain a certificate of appropriation which will establish the extent of your water rights.

Should you have any questions or if we can be of any assistance to you, please feel free to write or call us.

Very truly yours,

Riley M. Dixon
Hydrologist

Flow Rate = (Corrected Ave. Vel.) x (Flow Rate Factor) = **659.9** x **145.4** = **959** GPM
NOTES ON CHOOSING A YEAR OF RECORD

This development has been under several owners since its inception in 1975, with owners from Europe and around the U.S. at various times. A state of confusion has existed in the crop production report. All of the water use and equipment records have been either destroyed or lost, and the systems and pumping plant components have been interchanged over the years.

Since late 1983, Connecticut General has made a diligent effort to keep good records. Therefore, it would seem reasonable to use the years since 1983 in choosing a year of record.

WATER RESOURCES

HAYS002491

JUN 29 2015

KS DEPT OF AGRICULTURE
CERTIFICATE OF APPROPRIATION
FOR BENEFICIAL USE OF WATER

WATER RIGHT, File No. 22,329
PRIORITY DATE May 2, 1974

WHEREAS, It has been determined by the undersigned that construction of the appropriation diversion works has been completed, that water has been used for beneficial purposes and that the appropriation right has been perfected, all in conformity with the conditions of approval of the application pursuant to the water right referred to above and in conformity with the laws of the State of Kansas,

Now, THEREFORE, Be It Known that DAVID L. POPE, the duly appointed, qualified and acting Chief Engineer of the Division of Water Resources of the Kansas State Board of Agriculture, by authority of the laws of the State of Kansas, and particularly K.S.A. 82a-714, does hereby certify that, subject to vested rights and prior appropriation rights, the appropriator is entitled to make use of groundwater in the drainage basin of the Arkansas River to be withdrawn by means of a well located near the center of the Southwest Quarter (SW¼) of Section 1, more particularly described as being near a point 1,380 feet North and 4,090 feet West of the Southeast corner of said section, in Township 26 South, Range 20 West, Edwards County, Kansas, at a diversion rate not in excess of 570 gallons per minute (1.27 c.f.s.) and in a quantity not to exceed 108 acre-feet per calendar year for irrigation use on the following described property:

27 acres in the Northeast Quarter of the Southwest Quarter (NE¼ SW¼),
29 acres in the Northwest Quarter of the Southwest Quarter (NW¼ SW¼),
36 acres in the Southwest Quarter of the Southwest Quarter (SW¼ SW¼),
30 acres in the Southeast Quarter of the Southwest Quarter (SE¼ SW¼),

a total of 122 acres in Section 1, Township 26 South, Range 20 West, Edwards County, Kansas.
The appropriator shall maintain in an operating condition, satisfactory to the Chief Engineer, all check valves installed for preventing chemical or other foreign substance pollution of the water supply.

The appropriator shall maintain records from which the quantity of water actually diverted during each calendar year may be readily determined. Such records shall be furnished to the Chief Engineer within 30 days of receipt of the annual water use report form.

The appropriation right as perfected is appurtenant to and severable from the land herein described.

The appropriation right shall be deemed abandoned and shall terminate when without due and sufficient cause no lawful beneficial use is made of water under this appropriation for three (3) successive years.

The right of the appropriator shall relate to a specific quantity of water and such right must allow for a reasonable raising or lowering of the static water level and for the reasonable increase or decrease of the stream flow at the appropriator's point of diversion.

In Witness Whereof, I have hereunto set my hand in my office at Topeka, Kansas, this 11th day of June, 1987.

FROM: Larry M. Sheets
RE: Appropriation of Water File No. 22,329

The Field Inspection Report for the above referenced file, conducted under contract by Pumping Plant Testing, has been reviewed. It meets the requirements specified in the Scope of Work. Based on the 1984 Water Use Report, 2,000 hours of pumping the well located near the center of the Southwest Quarter (SWQ) of Section 1, Township 26 South, Range 20 West, Edwards County, Kansas, provided 209 acre-feet of water for irrigating 122 acres or 1.73 acre-feet per acre. The Certificate of Appropriation has been drafted for the tested pumping rate rounded up to 570 gallons per minute and a reasonable quantity for land irrigated by the pivot system on the Southwest Quarter (SWQ).

A later file (No. 30,084) provides a portion of the water to the pivot system. The reasonable quantity for the pivot system has been prorated according to determined pumping rates.

Kansas State Board of Agriculture  
Division of Water Resources  

ADMINISTRATIVE POLICY  
No. 86-8  

Subject: Allowable Rates of Diversion and Maximum Annual Quantities for Irrigation Use - Permits and Approvals  

Reference: K.S.A. 82a-708a and K.A.R. 5-3-1  

Date: November 5, 1986  

History: Effective November 5, 1986  

Approved by: David L. Pope  
Chief Engineer  

During the review of an APPLICATION FOR PERMIT TO APPROPRIATE WATER FOR BENEFICIAL USE for irrigation purposes the following guidelines shall be considered in determining the maximum reasonable rate of diversion to be allowed under any APPROVAL OF APPLICATION AND PERMIT TO PROCEED:  

<table>
<thead>
<tr>
<th>Area, Place of use</th>
<th>Max. Allowable Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>up to 10 acres</td>
<td>450 g.p.m.</td>
</tr>
<tr>
<td>10 - 40 acres</td>
<td>(+) 450 g.p.m.</td>
</tr>
<tr>
<td>40 - 120 acres</td>
<td>(+) 8 g.p.m./acre</td>
</tr>
<tr>
<td>more than 120 acres</td>
<td>(+) 7 g.p.m./acre</td>
</tr>
</tbody>
</table>

EXAMPLES:  

A. 37 acres requested; since this area is less than 40 acres, a rate of up to 900  

B. 83 acres requested;  

\[ (+) \text{ 40 acres}(10 + 30) = 450 \text{ g.p.m.} \]  
\[ (+) \text{ 43 acres @ 8 g.p.m./acre} = 344 \text{ g.p.m.} \]  
\[ 1,244 \text{ (allow 1,245 g.p.m.)} \]  

A further limiting factor of this procedure is the availability of water from the proposed source of supply. In those instances whereby the source of supply is incapable of yielding a reasonably, sustainable (computed) rate, then the source becomes a further limiting factor.  

A further limiting factor is well design and equipment, which shall be reasonable to divert the requested rate.
Further, the rate authorized should not impair senior water rights in the area, including domestic rights.

In reviewing an APPLICATION FOR PERMIT TO APPROPRIATE WATER FOR BENEFICIAL USE for irrigation purposes, the following guidelines shall be considered when determining a maximum allowable annual quantity of water request:

In that area of Kansas located between the Kansas/Missouri border and the Range 5 East/Range 6 East line, the maximum allowable quantity shall not exceed an average of 1.00 acre-foot per acre to be irrigated.

In that area of Kansas located between the Range 5 East/Range 6 East line and the Range 20 West/Range 21 West line, the maximum allowable quantity shall not exceed an average of 1.50 acre-feet per acre irrigated.

In that area of Kansas located between the Range 20 West/Range 21 West line and the Kansas/Colorado border, the maximum allowable quantity shall not exceed an average of 2.00 acre-feet per acre irrigated.

A further limiting factor to maximum allowable quantity is the availability of water from the proposed source of supply. If the source of supply is incapable of yielding a reasonably, sustainable (computed) quantity during the irrigation season in that area of the state, then the source becomes a further limiting factor.

That if an applicant can show that his or her system design is reasonable for the use intended and approval of the proposed rate and/or maximum annual quantity will not impair any senior water right or prejudicially and unreasonably affect the public interest, the Chief Engineer may waive the above guidelines. Documentation shall be placed in the file clearly demonstrating any exceptions to the above policy.
### SECTION 1: PRESENT WATER USE SUMMARY (IF NO PREVIOUS MUNICIPAL WATER USE HAS BEEN UTILIZED, PROCEED TO SECTION 3)

**NOTE:** WORKSHEET FOR WATER PUMPED, PURCHASED, AND SOLD BY YOUR WATER DISTRIBUTION SYSTEM

<table>

<td></td>
<td></td>
</tr>
</tbody>
</table>

TOTAL WATER = Columns 1 \( + \) 2

ACCOUNTED FOR WATER = Columns 3 \( + \) 4 \( + \) 6 \( + \) 8

UNACCOUNTED FOR WATER

- **Column 1:** The amount of raw water diverted from all of your points of diversion.
- **Column 2:** The amount of water purchased wholesale from all other public water supply systems or the Kansas Water Office.
- **Column 3:** The amount of water sold wholesale to all other public water supply systems.
- **Column 4:** The amount of water sold retail to all industrial, pasture, stockwater, feedlot, and bulk water service connections. Include the amount of water sold to all farmsteads using at least 200,000 gallons of water per year.
- **Column 5:** The amount of water sold retail to your residential and commercial customers and to industries and farmsteads using less than 200,000 gallons of water per year.
- **Column 6:** The amount of water used that is metered at individual service connections and supplied free, such as for public service, treatment processes, and connections receiving free water.
- **Column 7:** The amount of remaining water used. The gallons reported in this column are found by adding the numbers in Columns 1 and 2 and subtracting the numbers in Columns 3, 4, 5, and 6.

**UNACCOUNTED FOR WATER**

Use the following to calculate your distribution system's Unaccounted For Water:

Start with the amount in Column 1 and add the amount in Column 2, then subtract the amounts in Columns 3, 4, 5, and 6 leaving an amount of water representing your unaccounted for water to enter in Column 7.

Use the following to calculate the percent Unaccounted For Water versus the Total Water of your system:

\[
\text{Percent Unaccounted For Water} = \frac{\text{Unaccounted For Water}}{\text{Total Water (Columns 1,2)}} \times 100
\]

If this number exceeds 20%, please explain the large amount of unaccounted for water and describe any steps being taken to reduce it.

### SECTION 2: PAST WATER USE

COMPLETE THE FOLLOWING TABLE FROM YOUR PAST WATER USE RECORDS.

<td></td>
<td></td>
</tr>
</tbody>
</table>

TOTAL WATER = Column 1 + 2

ACCOUNTED FOR WATER = Columns 3 + 4 + 5 + 6

UNACCOUNTED FOR WATER

### SECTION 4: POPULATION AND SERVICE CONNECTIONS

**ESTIMATE THE NUMBER OF PERSONS DIRECTLY SERVED BY YOUR WATER DISTRIBUTION SYSTEM**

**PAST POPULATION - PROVIDE INFORMATION BELOW:**

(CENSUS BUREAU INFORMATION)

<table>
<thead>
<tr>
<th>Years Ago</th>
<th>Population</th>
</tr>
</thead>
<tbody>
<tr>
<td>20</td>
<td>17,631</td>
</tr>
<tr>
<td>15</td>
<td>18,750</td>
</tr>
<tr>
<td>10</td>
<td>20,013</td>
</tr>
<tr>
<td>5</td>
<td>20,106</td>
</tr>
<tr>
<td>Last Year</td>
<td>21,038</td>
</tr>
</tbody>
</table>

Provide number of current active service connections:

- 6,824 Residential
- 2 Industrial
- 1,256 Commercial
- 2 Pasture/Stockwater/Feedlot
- 8,082 Total

### SECTION 5: PRESENT GALLONS PER PERSON PER DAY

**CALCULATE YOUR GALLONS PER PERSON PER DAY**

Water in Columns 5, 6, and 7 + Population + 365 Days/Year = Gallons per Person per Day

- 673,753,000
- 21,038
- 365 Days/Year = 88

GALLONS PER PERSON PER DAY

### SECTION 6: AREA TO BE SERVED

Describe the area to be served or provide the legal description of the location where the water is to be used including any other city of water supply system (i.e. Rural Water District): 

City of Hays, KS Municipal Water Supply

2013 is year one and 2033 will be year twenty. 2 percent growth is used for estimate. Hays had a reasonable 9.1 percent unaccounted water in 2013.
### SECTION 1: PRESENT WATER USE SUMMARY (IF NO PREVIOUS MUNICIPAL WATER USE HAS BEEN UTILIZED, PROCEED TO SECTION 3)

**NOTE:** WORKSHEET FOR WATER PUMPED, PURCHASED, AND SOLD BY YOUR WATER DISTRIBUTION SYSTEM.

<table>
<thead>
<tr>
<th>Column 1</th>
<th>Column 2</th>
<th>Column 3</th>
<th>Column 4</th>
<th>Column 5</th>
<th>Column 6</th>
<th>Column 7</th>
</tr>
</thead>
<tbody>
<tr>
<td>Raw Water Diverted Under Your Rights</td>
<td>Water Purchased From All Sources</td>

<td>Water Sold to Your Industrial, Stock, and Bulk Customers</td>
<td>Water Sold to Your Residential and Commercial Customers</td>
<td>Other Meters Water</td>
<td>Remaining Water Used (See Below Explanation)</td>
</tr>
<tr>
<td>327,288,100</td>
<td>0</td>
<td>0</td>
<td>105,295,000</td>
<td>106,743,000</td>
<td>18,944,000</td>
<td>93,306,100</td>
</tr>
</tbody>
</table>

**TOTAL WATER = Columns 1 + 2**

**ACCOUNTED FOR WATER = Columns 3 + 4 + 5 + 6**

**UNACCOUNTED FOR WATER = TOTAL WATER - ACCOUNTED FOR WATER**

- **Column 1:** The amount of raw water diverted from all of your points of diversion.
- **Column 2:** The amount of water purchased wholesale from all other public water supply systems or the Kansas Water Office.
- **Column 3:** The amount of water sold wholesale to all other public water supply systems.
- **Column 4:** The amount of water sold retail to all industrial, pasture, stockwater, feedlot, and bulk water service connections. Include the amount of water sold to all farmsteads using at least 200,000 gallons of water per year.
- **Column 5:** The amount of water sold retail to your residential and commercial customers and to industries and farmsteads using less than 200,000 gallons of water per year.
- **Column 6:** The amount of water used that is metered at individual service connections and supplied free, such as for public service, treatment processes, and connections receiving free water.
- **Column 7:** The amount of remaining water used. The gallons reported in this column are found by adding the numbers in Columns 1 and 2 and subtracting the numbers in Columns 3, 4, 5, and 6.

**UNACCOUNTED FOR WATER**

Use the following to calculate your distribution system's Unaccounted For Water:

1. Start with the amount in Column 1 and add the amount in Column 2, then subtract the amount in Columns 3, 4, 5, and 6 leaving an amount of water representing your unaccounted for water to enter in Column 7.

Use the following to calculate the percent Unaccounted For Water versus the Total Water of your system:

\[
\text{Percent Unaccounted For Water} = \frac{\text{Unaccounted For Water}}{\text{Total Water (Columns 1,2)}} \times 100
\]

If this number exceeds 20%, please explain the large amount of unaccounted for water and describe any steps being taken to reduce it.

### SECTION 2: PAST WATER USE

**COMPLETE THE FOLLOWING TABLE FROM YOUR PAST WATER USE RECORDS.**

### SECTION 5: PRESENT GALLONS PER PERSON PER DAY

**CALCULATE YOUR GALLONS PER PERSON PER DAY**

\[
\text{Gallons per Person per Day} = \frac{\text{Amount of water in Columns 5, 6, and 7} + \text{Population} + \text{365 Days/Year}}{\text{Population from Last Year of Section 4}}
\]

\[
\frac{221,991,000 + 4,475 + 365 \text{ Days/Year}}{135.9} = 1,659 \text{ GALLONS PER PERSON PER DAY.}
\]

### SECTION 6: AREA TO BE SERVED

**Describe the area to be served or provide the legal description of the location where the water is to be used including any other city of water supply system (i.e. Rural Water District): City of Russell**

Note that the actual quantity of "Unaccounted for Water" is lower than shown here. Large quantitites diverted from the Pleifer Wells are returned to the aquifer in the "Collector Well." See detailed explanation in the cover letter accompanying this application. Projected future water needs include losses in the collector well but when repaired or replaced, total raw water diversion will be reduced.

You may include any additional information you believe will assist in informing the Division of your request.
