KANSAS DEPARTMENT OF AGRICULTURE
DIVISION OF WATER RESOURCES
MEMORANDUM

TO:       File
DATE:     May 1, 2018
FROM:     Amber Herring
SUBJECT:  Date Stamping Mail

On Friday, June 26th, 2015, The Administrative Assistant for Kansas Department of Agriculture, on the first floor signed for the certified mail containing the following Applications. I, Amber Herring, did not receive the documents until Monday, June 29th, 2015. Thus, the June 29th date is the correct date and time received by the Division of Water Resources.
Brent,

What would you need from us to shift 33 acre-feet from File 22,329 to File 33,084 and 42 acre-feet from 22,330 to 30,084 so that each of the three water rights has a quantity of 75 acre-feet?

This won’t increase the area within which a new well could be drilled but it could increase the rate that would be assigned to a new well. For example, if the Cities want to drill two municipal wells instead of one “J” well, they could, for example, group Files 22,331 and 22,332 together as a West “J” well and 22,329, 22,330, and 30,084 together as an East “J” well.

The West well would end up with 315 AF with a maximum rate of 700 gpm. The East well would end up with 225 AF with a maximum rate of 700 gpm.

If we don’t split the quantity among Files 22,329, 22,330, and 33,084, we would need to dismiss File 30,084 since there is no additional quantity associated with that Water Right and the maximum rate for the East well would be 620 gpm.

Assuming that this is all correct, it’s only worth the trouble if it’s easy.

Dave

David M. Traster

APPLICATION FOR APPROVAL TO CHANGE THE PLACE OF USE, THE POINT OF DIVERSION OR THE USE MADE OF THE WATER UNDER AN EXISTING WATER RIGHT

Filing Fee Must Accompany the Application

( Please refer to Fee Schedule on signature page of application form.)

Paragraph Nos. 1, 2, 3, 4 & 8 must be completed. Complete all other applicable portions. A topographic map or detailed plat showing the authorized and proposed points(s) of diversion and for place of use must accompany this application.

1. Application is hereby made for approval of the Chief Engineer to change the
   ☐ Place of Use
   ☐ Point of Diversion
   ☐ Use Made of Water

   (Check one or more)

   File No. 22330

2. Name of applicant: City of Hays, Kansas and City of Russell, Kansas (See paragraph 2 of the cover letter.)

   Address: c/o Foulston Siefkin LLP, 1551 N. Waterfront Parkway, Suite 100

   City, State and Zip: Wichita, Kansas 67206

   Phone Number: (316) 291-9725

   E-mail address: dtraster@foulston.com

   What is your relationship to the water right; ☑ owner ☐ tenant ☐ agent ☐ other? If other, please explain. Hays and Russell are co-owners of the authorized place of use on the R9 Ranch in Edwards County.

   Name of water use correspondent: City of Hays, Kansas

   Address: P. O. Box 490, 1507 Main Street

   City, State and Zip: Hays, Kansas 67601

   Phone Number: (785) 628-7320

   E-mail address: tdougherty@haysusa.com

3. The change(s) proposed herein are desired for the following reasons (please be specific): See Paragraph 3 of the cover letter filed concurrently with this application. The cover letter is incorporated herein by reference.

   The change(s) (was) (will be) completed by See Paragraph 3 of the cover letter (Date)

    Proposed Rate Proposed Quantity

    This point is: □ Additional Well  □ Geo Center  List other water rights that will use this point

11. Describe the current condition of and future plans for any point(s) of diversion which will no longer be used. See paragraph 11 of the cover letter.

   IF MORE SPACE IS NEEDED, ATTACH ADDITIONAL SHEETS AS NECESSARY.

   JUN 29 2015

   KS DEPT OF AGRICULTURE
12. The presently authorized use of water is for irrigation purposes. It is proposed that the use be changed to municipal purposes.

13. If changing the place of use and/or use made of water, describe how the consumptive use will not be increased. See the attached discussion regarding the quantity of water to be changed to municipal use and paragraph 13 of the cover letter.

(Please show any calculations here.)

14. It is requested that the maximum annual quantity of water be reduced to not applicable (acre-feet or million gallons).

15. It is requested that the maximum rate of diversion of water be reduced to not applicable gallons per minute (____ c.f.s.).

16. The application must include either a topographic map or detailed plat. A U.S. Geological Survey Topographic Map, scale 1:24,000, is available through the Kansas Geological Survey, 1930 Constant Avenue, University of Kansas, Lawrence, Kansas 66047-3726 (www.usgs.gov). The map should show the location of the presently authorized point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. The presently authorized place of use should also be shown. Identify the center of the section, the section lines and the section corners and show the appropriate section, township, and range numbers on the map. In addition the following information must also be shown on the map.

   a. If a change in the location of the point(s) of diversion is proposed, show:

      1) The location of the proposed point(s) of diversion. Distances North and West of the Southeast corner of the section must be shown. Please be certain that the information shown on the map agrees with the information shown in Paragraph Nos. 9, 10 and 11 of the application.

      2) If the source of supply is groundwater, please show the location of existing water wells of any kind, including domestic wells, within ½ mile of the proposed well or wells. Identify each well as to its use and furnish name and mailing address of the property owner or owners. If there are no wells within ½ mile, please indicate so on the map.

      3) If the source of supply is surface water, the names and mailing addresses of all landowner(s) ½ mile downstream and ¾ mile upstream from your property lines must be shown.

   b. If a change in the place of use is desired, show the proposed place of use by crosshatching on the map. Please be certain that the information shown on the map agrees with the information shown in Paragraph No. 5 of the application.

17. Attach documentation to show the change(s) proposed herein will not impair existing water rights and relates to the same local source of supply as to which the water right relates. This information may include statements, plats, geology reports, well logs, test hole logs, and other information as necessary information to show the above. Additional comments may be made below.

   See paragraph 17 of the cover letter.

18. If the proposed change(s) does not meet all applicable rules and regulations of the Kansas Water Appropriation Act, please identify the rules and regulations for which you request a waiver. State the reason why a waiver is needed and why the request should be granted. Attach documentation showing that granting the request will not impair existing water rights and will not prejudicially and unreasonably affect the public interest.

   See paragraph 7 of the cover letter.

   KS DEPT OF AGRICULTURE

   SCANNEC
Any use of water that is not as authorized by the water right or permit to authorize water before the chief engineer approves this application is a violation of the Kansas Water Appropriation Act for which criminal or civil penalties may be assessed. Such violation is a class C misdemeanor, punishable by a fine not to exceed $500 and/or a term of confinement not to exceed one month in the county jail. K.S.A. 82a-728(b). Civil penalties shall be not less than $100 nor more than $1,000 per violation. In the case of a continuing violation, each day such violation continues may be deemed a separate violation. In addition to these penalties the water right may be modified or suspended. K.S.A. 82a-737, as amended.

The application must be signed by all owners of the place of use authorized under the water right and his or her spouse, if married. Please indicate if there is no spouse. If land is being purchased under contract, the seller must sign as landowner until such time as the contract is completed.

In the event that all applicants cannot appear before one notary public, they may as necessary sign separate copies of the application before any notary public conveniently available to them. All copies signed in this manner shall be considered to be valid parts of the application.

If the request is signed on behalf of any Owner by someone with legal authority to do so (for example, an agent, one who has power of attorney, or an executor, executrix, conservator), it will be necessary to attach proper documents showing such authority.

I declare that I am an owner of the currently authorized place of use as identified herein, or that I represent all such owners and am authorized to make this application on their behalf, and declare further that the statements contained herein are true, correct, and complete. By filing this application I authorize the chief engineer to permanently reduce the quantity of water and/or rate of diversion as specified in sections 14 and 15 of this application.

Dated at Russell, Russell County, Kansas, this 23rd day of June 2015.

FEE SCHEDULE

Each application to change the place of use, the point of diversion or the use made of the water under this section shall be accompanied by the application fee set forth in the schedule below:

(1) Application to change a point of diversion 300 feet or less ........................................... $100
(2) Application to change a point of diversion more than 300 feet ......................................... $200
(3) Application to change the place of use ................................................................................. $200
(4) Application to change the use made of the water ............................................................... $300

Make check payable to Kansas Department of Agriculture.

FEE SCHEDULE

Each application to change the place of use, the point of diversion or the use made of the water under this section shall be accompanied by the application fee set forth in the schedule below:

1. Application to change a point of diversion 300 feet or less
   $100
2. Application to change a point of diversion more than 300 feet
   $200
3. Application to change the place of use
   $200
4. Application to change the use made of the water
   $300

Make check payable to Kansas Department of Agriculture.

WATER RESOURCES RECEIVED

JUN 29 2015

KS DEPT OF AGRICULTURE
Proposed Rate and Quantity

The Cities are requesting a total of 152.64 acre-feet and 620 gpm from the well associated with this water right, all of which will be diverted from new point of diversion J, as shown on Exhibit I. When combined with existing wells from other water rights, new point of diversion J will have a cumulative total of 678.44 acre-feet and 3,170 gpm.

13. If changing the place of use and the use made of water, describe how the consumptive use will not be increased:

The following discussion is subject to paragraph 13 of the cover letter regarding consumptive use.

DWR Regulation, K.A.R. 5-5-9(a), provides that the default calculation used to address the consumptive use issue allows the conversion of 136.08 acre-feet to municipal use.\(^1\) As discussed below, 126 approved acres irrigated during the perfection multiplied by the Edwards County NIR for corn of 1.08 acre-feet per acre equals 136.08 acre-feet.\(^2\)

That same regulation goes on to allow the change to be based on the net consumptive use actually made during the perfection period.\(^3\)

Quantity authorized and perfected

The permit was issued on March 19, 1976, granting the applicant the right to divert up to 248 acre-feet annually at a rate not to exceed 1,000 gallons per minute for irrigation use\(^4\) on 138 acres in Section 1-T26S-R20W, or 1.80 acre-feet per acre.\(^5\) The certificate limited the rate to 620 gallons per minute.

In the cover letter transmitting the permit, DWR made findings of fact stating that “the proposed use is for a beneficial purpose and is within reasonable limitations. If priorities are observed and respected, the proposed use will neither impair any use under existing water rights nor prejudicially and unreasonably affect the public interest.”\(^6\)

The Field Inspection Reports indicate that 212 of the 248 acre-feet authorized by the permit were lawfully perfected.

- 212 acre-feet were applied to 126 approved acres in the S/2 of Section 1T26S-
R20W.\(^7\)

While the certificate limits the total quantity to 117 acre-feet based on the proration of the quantity perfected and the quantity perfected under File No. 30,084 and on DWR’s after-the-fact

---

\(^1\) K.A.R. 5-5-9(a) and (a)(1).
\(^2\) K.A.R. 5-5-12, NIR Requirements.
\(^3\) K.A.R. 5-5-9(b).
\(^4\) Permit, HAYS002592, Ex. A.
\(^5\) Application, HAYS002587, Ex. B.
\(^6\) March 19, 1976, letter (emphasis added), HAYS002591, Ex. C.
\(^7\) FIR, HAYS002576, Ex. D.
determination that 1.5 acre-feet per acre was a reasonable quantity for irrigation use.\textsuperscript{8} DWR did not have jurisdiction to make the latter reduction.\textsuperscript{9}

Since the perfection period has expired, the “authorized quantity” for this water right is the 212 acre-feet actually perfected even though it exceeds the certified quantity.

\textit{An alternative approach}

DWR’s use of the NIR of 1.08 feet of water for corn is based on its maximum gross irrigation requirement of 1.5 acre-feet per acre.\textsuperscript{10} The regulation allows the conversion of 72\% of the maximum quantity to a new use; in other words, it assumes that 28\% of the quantity diverted returns to the aquifer.

If 28\% of the 212 acre-feet legally applied during the perfection period percolates back to the aquifer, then 72\%, or 152.64 acre-feet, should be available for conversion to municipal use. This is less than the 212 acre-feet authorized so the limitation in K.A.R. 5-5-9(a)(4) is not implicated.

The Applicants request that DWR approve a total of 152.64 acre-feet for municipal use.

\textsuperscript{8} Certificate, HAYS002600, Ex. E, and Larry Sheets Memo dated April 3, 1987, HAYS002595, Ex. F.

\textsuperscript{10} Administrative Policy No. 86-8, dated Nov. 5, 1986, Ex. G, stating that: “In that area of Kansas located between the Range 5 East/Range 6 East Line and the Range 20 West/Range 21 West line, the maximum allowable quantity shall not exceed an average of 1.50 acre-feet per acre irrigated.” \textit{See also}, K.A.R. 5-3-24 and Larry Sheets Memo dated April 3, 1987, HAYS002595, Ex. F.

APPROVAL OF APPLICATION
and
PERMIT TO PROCEED
(This Is Not a Certificate of Appropriation)

This is to certify that I have examined Application No. 22,330 of the applicant

Midwest Land and Cattle Co.
Box 208
Kinsley, Kansas 67547

for a permit to appropriate water to beneficial use, together with the maps, plans and other submitted data, and that the application is hereby approved and the applicant is hereby authorized, subject to vested rights and prior appropriations, to proceed with the construction of the proposed diversion works and to proceed with all steps necessary for the application of the water to the approved and proposed beneficial use and otherwise perfect the proposed appropriation subject to the following terms, conditions and limitations:

1. That the priority date assigned to such application is May 2, 1974.

2. That the water sought to be appropriated shall be used for irrigation on the land described in the application.

3. That the source from which the appropriation is made shall be from ground water in the drainage basin of the Arkansas River to be withdrawn by means of one (1) well near the center of the Southeast Quarter (SE1/4) of Section 1, Township 26 South, Range 20 West, in Edwards County, Kansas, located substantially as shown on the aerial photograph accompanying the application.

4. That the appropriation sought shall be limited to a maximum diversion rate not in excess of 1000 gallons per minute (2.23 c.f.s.) and to a quantity of not to exceed 248 acre-feet for any calendar year.

WATER RESOURCES RECEIVED
JUN 29 1976
KS DEPT OF AGRICULTURE

RECEIVED
MAR 29 1976

FIELD OFFICE
DIVISION OF WATER RESOURCES
STAFFORD

(Over)
5. That installation of works for diversion of water shall be completed on or before December 31, 1977. The applicant shall notify the Chief Engineer of the Division of Water Resources when construction of the works has been completed.

6. That the proposed appropriation shall be perfected by the actual application of water to the proposed beneficial use on or before December 31, 1981.

7. That the applicant shall maintain records from which the quantity of water actually diverted during each calendar year may be readily determined. Such records shall be furnished to the Chief Engineer as soon as practicable after the close of each calendar year.

8. That the applicant shall not be deemed to have acquired a water appropriation for a quantity in excess of the amount approved herein nor in excess of the amount found by the Chief Engineer to have been actually used for the approved purpose during one calendar year subsequent to approval of the application and within the time specified or any authorized extension thereof.

9. That the use of water herein authorized shall not impair any use under existing water rights nor prejudicially and unreasonably affect the public interest.

10. That the right of the appropriator shall relate to a specific quantity of water and such right must allow for a reasonable existing or lowering of the static water level and for the reasonable increase or decrease of the streamflow at the appropriator's point of diversion.

11. That this permit does not constitute authority under K.S.A. 82a-301 to 305 to construct any dam or other obstruction; it does not give any right-of-way, or authorize any injury to, or trespass upon, public or private property; it does not obviate the necessity of obtaining assent from Federal or Local Governmental authorities when necessary.

12. That failure without cause to comply with provisions of the permit and its terms, conditions and limitations will result in the forfeiture of the priority date, revocation of the permit and dismissal of the application.
APPLICATION FOR PERMIT TO
APPROPRIATE WATER FOR BENEFICIAL USE
(The Statutory Filing Fee of $50.00 Must Accompany the Application)

To the Chief Engineer of the Division of Water Resources, Kansas State Board of Agriculture:

(Mr.) Midwest Land and Cattle Co., whose post office
(Mrs.) address is Box 208 Kingsley, Kansas 67547

and makes application to the Chief Engineer of the Division of Water Resources, Kansas State Board of Agriculture, for a permit to appropriate for beneficial use such unappropriated groundwater, as may be available in the Arkansas River basin in the county of Edwards, state of Kansas, to the extent and in accordance with the particulars hereinafter described:

1. The quantity of water desired is in the amount of 1,000 acre feet per year, to be diverted at a maximum rate of 400 gallons per minute.

2. The location of the proposed wells or other works for diversion of water is in the SE quarter of the SE quarter of section 1, township 7 south, range 14 west, in Edwards County, Kansas. (Section 1 is more than 1 mile long)

3. The water is intended to be appropriated for:

   (a) Domestic use ( ) 1,000
   (b) Municipal use ( ) 1,000
   (c) Irrigation use (X) 1,000 gals./min.
   (d) Industrial use ( )
   (e) Recreational use ( ) MICROFILMED
   (f) Wildlife use ( )

7. The works for diversion of water will consist of one well with one pump for one circle sprinkler irrigation system (one motor) and will be completed by July 1974, Fall 1974.

8. The first actual application of water for the beneficial use proposed was or is estimated to be July 1974, Fall 1974.

9. The application must be accompanied either by a detailed plat prepared from an actual survey or by an aerial photograph of the area. The plat or aerial photograph should show:

(a) Location of the proposed point or points of diversion

(b) Location of the pipe lines, canals, reservoirs or other facilities for conveying water from the point of diversion to the place of use

(c) If for irrigation, show the location of the land proposed to be irrigated

(d) If for industrial or other use, show the location of the land where water will be used.

10. List and describe other applications filed or vested rights held by applicant:

Irrigation wells and land is in the process of being bought from a company known as the Kinsley Joint Venture (Wheatheart Land Co.)

Applications for water rights have been filed

11. The relation of the subscriber to this application is that of agent and he is authorized to make this application in behalf of the interest affected.

Dated at Kinsley, Kansas, this 22 day of April, 1974

Midwest Land & Cattle Co.

By Johnny Carson

Note:

1 cubic foot per second = 448.8 gallons per minute = 846,317 gallons per day = 1.98 acre feet per day.
1 million gallons per day = 1,547 cubic feet per second = 3.07 acre feet per day.
1 acre foot = 43,560 cubic feet = 325,851 gallons.
March 19, 1976

Midwest Land and Cattle Co.
Box 208
Kinsley, Kansas 67547

ATTENTION: Mr. Johnny Carson, Manager

Re: Appropriation of Water
Application No. 22,330

Gentlemen:

Your application has been examined and is found to be in proper form. Further, we find that the proposed use is for a beneficial purpose and is within reasonable limitations. If priorities are observed and respected, the proposed use will neither impair any use under existing water rights nor prejudicially and unreasonably affect the public interest. It is presumed that the application is made in good faith, and that you are ready to proceed with the proposed diversion works and the application of water to the proposed use. The application has, therefore, been approved.

There is enclosed the approval of the application authorizing you to proceed with construction of the proposed diversion works, to divert such unappropriated water as may be available from the source and at the location specified in the approval of application, and to use it for the purpose and at the location described in the application.

There is also enclosed a memorandum setting forth the procedure to obtain a certificate of appropriation which will establish the extent of your water rights.

Should you have any questions or if we can be of any assistance to you, please feel free to write or call us.

Very truly yours,

Riley M. Dixon
Hydrologist

NOTES ON CHOOSING A YEAR OF RECORD

THIS DEVELOPMENT WAS OWNED BY SEVERAL OWNERS SINCE ITS INCEPTION IN 1975, WITH OWNERS FROM EUROPE AND ACROSS THE U.S. AT VARIOUS TIMES. A STATE OF CONFUSION HAS EXISTED IN THE CROP PRODUCTION RECORD. ALL OR SOME OF WATER USE AND EQUIPMENT RECORDS HAVE BEEN MANUALLY DESTROYED OR LOST, AND THE SYSTEMS AND PUMPING PLANT COMPONENTS HAVE BEEN INTERCHANGED OVER THE YEARS.

SINCE LATE 1983, CONNECTICUT GENERAL HAS MADE A DILIGENT EFFORT TO KEEP GOOD RECORDS. THEREFORE, IT WOULD SEEM REASONABLE TO USE THE YEARS SINCE 1983 IN CHOOSING A YEAR OF RECORD.
CERTIFICATE OF APPROPRIATION
FOR BENEFICIAL USE OF WATER

WATER RIGHT, File No. 22,330
PRIORITY DATE May 2, 1974

WHEREAS, It has been determined by the undersigned that construction of the appropriation diversion works has been completed, that water has been used for beneficial purposes and that the appropriation right has been perfected, all in conformity with the conditions of approval of the application pursuant to the water right referred to above and in conformity with the laws of the State of Kansas,

NOW, THEREFORE, Be It Known that DAVID L. POPE, the duly appointed, qualified and acting Chief Engineer of the Division of Water Resources of the Kansas State Board of Agriculture, by authority of the laws of the State of Kansas, and particularly K.S.A. 82a-714, does hereby certify that, subject to vested rights and prior appropriation rights, the appropriator is entitled to make use of groundwater in the drainage basin of the Arkansas River to be withdrawn by means of a well located near the center of the Southeast Quarter (SE4) of Section 1, more particularly described as being near a point 1,376 feet North and 1,536 feet West of the Southeast corner of said section, in Township 26 South, Range 20 West, Edwards County, Kansas, at a diversion rate not in excess of 620 gallons per minute (1.39 c.f.s.) and in a quantity not to exceed 117 acre-feet per calendar year for irrigation use on the following described property:

1 acre in the Northeast Quarter of the Southwest Quarter (NE4 SW4),
2 acres in the Northeast Quarter of the Southwest Quarter (SE4 SW4),
31 acres in the Northeast Quarter of the Southeast Quarter (NE4 SE4),
36 acres in the Southwest Quarter of the Southeast Quarter (SW4 SE4),
36 acres in the Southwest Quarter of the Southeast Quarter (SW4 SE4),
30 acres in the Southwest Quarter of the Southeast Quarter (SW4 SE4),

a total of 138 acres in Section 1, Township 26 South, Range 20 West, Edwards County, Kansas.

SCANNED
The appropriator shall maintain in an operating condition, satisfactory to the Chief Engineer, all check valves installed for preventing chemical or other foreign substance pollution of the water supply.

The appropriator shall maintain records from which the quantity of water actually diverted during each calendar year may be readily determined. Such records shall be furnished to the Chief Engineer within 30 days of receipt of the annual water use report form.

The appropriation right as perfected is appurtenant to and severable from the land herein described.

The appropriation right shall be deemed abandoned and shall terminate when without due and sufficient cause no lawful beneficial use is made of water under this appropriation for three (3) successive years.

The right of the appropriator shall relate to a specific quantity of water and such right must allow for a reasonable raising or lowering of the static water level and for the reasonable increase or decrease of the stream flow at the appropriator's point of diversion.

In Witness Whereof, I have hereunto set my hand at my office at Topeka, Kansas, this 11th day of June, 1987.

HAYS002601

SCANNED
The Field Inspection Report for the above referenced file, conducted under contract by Pumping Plant Testing, has been reviewed. It meets the requirements specified in the Scope of Work. Based on the 1984 Water Use Report, 2,000 hours of pumping the well located near the center of the Southeast Quarter (SE¼) of Section 1, Township 26 South, Range 20 West, Edwards County, Kansas, provided 212 acre-feet of water for irrigating 126 acres or 1.68 acre-feet per acre. The Certificate of Appropriation has been drafted for the tested pumping rate rounded up to 620 g.p.m. and a reasonable quantity for land irrigated by the pivot system on the Southeast Quarter.

A later File (No. 30,084) provides a portion of the water to the pivot system. The reasonable quantity for the pivot system has been prorated according to the determined pumping rates.

Larry M. Sheets

ADMINISTRATIVE POLICY
No. 86-8

Subject: Allowable Rates of Diversion and Maximum Annual Quantities for Irrigation Use - Permits and Approvals
Reference: K.S.A. 82a-708a and K.A.R. 5-3-1
Date: November 5, 1986
History: Effective November 5, 1986
Approved by: David L. Pope
Chief Engineer

During the review of an APPLICATION FOR PERMIT TO APPROPRIATE WATER FOR BENEFICIAL USE for irrigation purposes the following guidelines shall be considered in determining the maximum reasonable rate of diversion to be allowed under any APPROVAL OF APPLICATION AND PERMIT TO PROCEED:

<table>
<thead>
<tr>
<th>Area, Place of use</th>
<th>Max. Allowable Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>up to 10 acres</td>
<td>450 g.p.m.</td>
</tr>
<tr>
<td>10 - 40 acres</td>
<td>(+) 450 g.p.m.</td>
</tr>
<tr>
<td>40 - 120 acres</td>
<td>(+) 8 g.p.m./acre</td>
</tr>
<tr>
<td>more than 120 acres</td>
<td>(+) 7 g.p.m./acre</td>
</tr>
</tbody>
</table>

EXAMPLES:

A. 37 acres requested; since this area is less than 40 acres, a rate of up to 900

B. 83 acres requested;

\[
\begin{align*}
\text{10 acres} & = 450 \text{ g.p.m.} \\
\text{(+)} \text{ 40 acres (10 + 30)} & = 450 \text{ g.p.m.} \\
\text{(+)} \text{ 43 acres @ 8 g.p.m./acre} & = 344 \text{ g.p.m.} \\
\text{1,244 (allow 1,245 g.p.m.)} & = 900 \text{ g.p.m.}
\end{align*}
\]

A further limiting factor of this procedure is the availability of water from the proposed source of supply. In those instances whereby the source of supply is incapable of yielding a reasonably, sustainable (computed) rate, then the source becomes a further limiting factor.

A further limiting factor is well design and equipment, which shall be reasonable to divert the requested rate.
Further, the rate authorized should not impair senior water rights in the area, including domestic rights.

In reviewing an APPLICATION FOR PERMIT TO APPROPRIATE WATER FOR BENEFICIAL USE for irrigation purposes, the following guidelines shall be considered when determining a maximum allowable annual quantity of water request:

In that area of Kansas located between the Kansas/Missouri border and the Range 5 East/Range 6 East line, the maximum allowable quantity shall not exceed an average of 1.00 acre-foot per acre to be irrigated.

In that area of Kansas located between the Range 5 East/Range 6 East Line and the Range 20 West/Range 21 West line, the maximum allowable quantity shall not exceed an average of 1.50 acre-feet per acre irrigated.

In that area of Kansas located between the Range 20 West/Range 21 West line and the Kansas/Colorado border, the maximum allowable quantity shall not exceed an average of 2.00 acre-feet per acre irrigated.

A further limiting factor to maximum allowable quantity is the availability of water from the proposed source of supply. If the source of supply is incapable of yielding a reasonably, sustainable (computed) quantity during the irrigation season in that area of the state, then the source becomes a further limiting factor.

That if an applicant can show that his or her system design is reasonable for the use intended and approval of the proposed rate and/or maximum annual quantity will not impair any senior water right or prejudicially and unreasonably affect the public interest, the Chief Engineer may waive the above guidelines. Documentation shall be placed in the file clearly demonstrating any exceptions to the above policy.
## Section 1: Present Water Use Summary

If no previous municipal water use has been utilized, proceed to Section 3.

### Note:
Worksheets for water pumped, purchased, and sold by your water distribution system.

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>Raw Water Diverted Under Your Rights</td>
<td>Water Purchased From All Sources</td>
<td>Water Sold to Other Public Water Suppliers</td>
<td>Water Sold to Your Industrial, Stock, and Bulk Customers</td>
<td>Water Sold to Your Residential and Commercial Customers</td>
<td>Other Metered Water</td>
<td>Remaining Water Used (See Below Explanation)</td>
</tr>
<tr>
<td>684,559,000</td>
<td>10,806,000</td>
<td>595,254,000</td>
<td>16,327,000</td>
<td></td>
<td>62,172,000</td>
<td></td>
</tr>
</tbody>
</table>

**Total Water = Columns 1 + 2**

**Accounted for Water = Columns 3 + 4 + 5 + 6**

**Unaccounted for Water = Total Water - Accounted for Water**

### Column 1:
The amount of raw water diverted from all of your points of diversion.

### Column 2:
The amount of water purchased wholesale from all other public water supply systems or the Kansas Water Office.

### Column 3:
The amount of water sold wholesale to all other public water supply systems.

### Column 4:
The amount of water sold retail to all industrial, pasture, stockwater, feedlot, and bulk water service connections. Include the amount of water sold to all farmsteads using at least 200,000 gallons of water per year.

### Column 5:
The amount of water sold retail to your residential and commercial customers and to industries and farmsteads using less than 200,000 gallons of water per year.

### Column 6:
The amount of water used that is metered at individual service connections and supplied free, such as for public service, treatment processes, and connections receiving free water.

### Column 7:
The amount of remaining water used. The gallons reported in this column are found by adding the numbers in Columns 1 and 2 and subtracting the numbers in Columns 3, 4, 5, and 6.

### Unaccounted for Water

Use the following to calculate your distribution system's Unaccounted For Water:

1. Start with the amount in Column 1 and add the amount in Column 2, then subtract the amounts in Columns 3, 4, 5, and 6 leaving an amount of water representing your unaccounted for water to enter in Column 7.

2. Use the following to calculate the percent Unaccounted For Water versus the Total Water of your system:

   \[
   \text{Percent Unaccounted} = \frac{\text{Unaccounted For Water}}{\text{Total Water (Columns 1,2)}} \times 100
   \]

   If this number exceeds 20%, please explain the large amount of unaccounted for water and describe any steps being taken to reduce it.

### Section 2: Past Water Use

Complete the following table from your past water use records.

<table>

<tr>
<td>Year 15</td>
<td>28,002</td>
</tr>
<tr>
<td>Year 20</td>
<td>30,802</td>
</tr>
</tbody>
</table>

Provide number of current active service connections:

6,824 Residential
1,256 Commercial
2 Industrial

Other (specify)

8,082 Total

Pasture/ Stockwater/ Feedlot

SECTION 5: PRESENT GALLONS PER PERSON PER DAY

CALCULATE YOUR GALLONS PER PERSON PER DAY

Water in Columns 5, 6, and 7 + Population + 365 Days/Year = Gallons per Person per Day

673,753,000 + 21,038 + 365 Days/Year = 88 GALLONS PER PERSON PER DAY.

SECTION 6: AREA TO BE SERVED

Describe the area to be served or provide the legal description of the location where the water is to be used including any other city of water supply system (i.e. Rural Water District):

City of Hays, KS Municipal Water Supply

2013 is year one and 2033 will be year twenty. 2 percent growth is used for estimate. Hays had a reasonable 9.1 percent unaccounted water in 2013.

You may attach additional information you believe will assist in informing the Division of the need for your request.
MUNICIPAL (PUBLIC WATER SUPPLY) APPLICATION
SUPPLEMENTAL INFORMATION SHEET

SECTION 1: PRESENT WATER USE SUMMARY (IF NO PREVIOUS MUNICIPAL WATER USE HAS BEEN UTILIZED, PROCEED TO SECTION 3)
NOTE: WORKSHEET FOR WATER PUMPED, PURCHASED, AND SOLD BY YOUR WATER DISTRIBUTION SYSTEM.

</tbody>
</table>

TOTAL WATER = Columns 1 + 2
ACCOUNTED FOR WATER = Columns 3 + 4 + 5 + 6
UNACCOUNTED FOR WATER

UNACCOUNTED FOR WATER = TOTAL WATER - ACCOUNTED FOR WATER

Column 1: The amount of raw water diverted from all of your points of diversion.

Column 2: The amount of water purchased wholesale from all other public water supply systems or the Kansas Water Office.

Column 3: The amount of water sold wholesale to all other public water supply systems.

Column 4: The amount of water sold retail to all industrial, pasture, stockwater, feedlot, and bulk water service connections. Include the amount of water sold to all farmsteads using at least 200,000 gallons of water per year.

Column 5: The amount of water sold retail to your residential and commercial customers and to industries and farmsteads using less than 200,000 gallons of water per year.

Column 6: The amount of water used that is metered at individual service connections and supplied free, such as for public service, treatment processes, and connections receiving free water.

Column 7: The amount of remaining water used. The gallons reported in this column are found by adding the numbers in Columns 1 and 2 and subtracting the numbers in Columns 3, 4, 5, and 6.

UNACCOUNTED FOR WATER

Use the following to calculate your distribution system's Unaccounted For Water:
Start with the amount in Column 1 and add the amount in Column 2, then subtract the amounts in Columns 3, 4, 5, and 6 leaving an amount of water representing your unaccounted for water to enter in Column 7.

Use the following to calculate the percent Unaccounted For Water versus the Total Water of your system:
Percent Unaccounted = Unaccounted For Water x 100
Total Water (Columns 1,2)
This number exceeds 20%, please explain the large amount of unaccounted for water and describe any steps being taken to reduce it.

SECTION 2: PAST WATER USE
COMPLETE THE FOLLOWING TABLE FROM YOUR PAST WATER USE RECORDS.

Provide number of current active service connections:

- 2,049 Residential
- 360 Commercial
- 9 Industrial
- 0 Pasture/Stockwater/Feedlot
- 30 Other (specify) Free Service
- 2,448 Total

SECTION 5: PRESENT GALLONS PER PERSON PER DAY

CALCULATE YOUR GALLONS PER PERSON PER DAY

Water in Columns 5, 6, and 7 + Population + 365 Days/Year = Gallons per Person per Day

\[
\text{Gallons per Person per Day} = \frac{21,991,000 + 4,475 + 365 \text{ Days/Year}}{\text{Population from Last Year of Section 4}}
\]

\[
= 135.9 \text{ Gallons per Person per Day}
\]

SECTION 6: AREA TO BE SERVED

Describe the area to be served or provide the legal description of the location where the water is to be used including any other city of water supply system (i.e. Rural Water District): City of Russell

Note that the actual quantity of "Unaccounted for Water" is lower than shown here. Large quantities diverted from the Pfeifer Wells are returned to the aquifer in the "Collector Well." See detailed explanation in the cover letter accompanying this application. Projected future water needs include losses in the collector well but when repaired or replaced, total raw water diversion will be reduced.

You may attach additional information you believe will assist in informing the Division of your request.
