Tim Boese
District Manager
Groundwater Management District No. 2
313 Spruce Street
Halstead, KS 67056

RE: ASR Drought Modeling Review

Dear Mr. Boese:

The City is in receipt of your letter dated December 14, 2016, which provided a written response to the City's request for a review of the aquifer modeling results submitted to the District on November 15th, 2016.

The City is thankful for the District's feedback regarding use of the groundwater model and drought modeling results, and recognizes the substantial and diligent effort of District Staff and the Board of Directors to provide the review and response.

The City will be incorporating the District's comments regarding the use of the groundwater model developed under USGS Scientific Investigations Report 2013-5042 where feasible and appropriate. We are now moving forward with a permit modification request to the Chief Engineer. We look forward to working with the District and the Division of Water Resources during the permit modification review process.

Sincerely,

Alan King
Director of Public Works & Utilities
