Major Streams in Kansas - Mean Annual Flow (cfs)

Total inflow from Colorado 320 cfs
Total inflow from Kansas 48,230 cfs
Total outflow from Kansas 71,520 cfs
Total inflow to Oklahoma 10,590 cfs

Prepared by Kansas Department of Agriculture
July 2000
Based on USGS mean annual stream gage flows from the period of record through WY2000

A constant flow rate of 1 cubic feet per second (cfs) for one year equals approximately 724 acre-feet.
