                                                           20
                                                                 PRESIDING OFFICER: Okay. Thank
20
                                                           21 you. And the subject matter of today's
21
                                                           22 hearing, rather extensive, we had eight
22
                                                              motions that were noticed to be the subject
23
                                                           24 of oral argument today. And I will list
24
                                                           25 those for the record and then let's discuss
25
```

In the Matter of the City of Wichita's Phase II Aquifer Page 5 Page 7 1 the priorities for our time because if we PRESIDING OFFICER: And, for 2 take a break for lunch, we have seven hours 2 example, we start with one of your motions 3 roughly. And as I gauge these, if everyone 3 to exclude, to stay on track and give 4 gets 15 minutes per motion, we will be here 4 everyone fair time, that would give you 5 till 6:00 o'clock so we -- perhaps we want 5 maybe 12 minutes per motion. Does that 6 to prioritize our time a little bit. 6 sound reasonable to you? 7 So the motions to be argued are GMD2's MR. STUCKY: I think we'll focus our 8 motion to compel directed at the Division 8 time on a couple of the motions, the 9 of Water Resources; GMD2's motion to compel 9 majority of our time on the motion for 10 directed to the City of Wichita; the City's 10 summary judgment and the motion to dismiss, 11 prehearing motion in limine to exclude, 11 and then I think some time on the motions 12 quote, expert reports, quote, of Carl E. 12 in limine and then a lesser amount of time 13 Nuzman, Tim Boese, and David Pope; GMD2's 13 on the remaining motions. So I think 14 motion in limine and motion to bar agency 14 that's how we'd like to allocate our time, 15 recommendations; GMD2's motion in limine to 15 if that's appropriate. 16 exclude expert testimony of the City; PRESIDING OFFICER: Okay. City, how 16 17 GMD2's motion for summary judgment; GMD2's 17 would you like to prioritize your time? 18 motion to dismiss; and the Intervenors' MR. MCLEOD: I don't think the City 19 motion in support of Equus Beds Groundwater greatly cares, we would have been happy 20 Management District No. 2's motion to 20 having the motions resolved on the papers 21 insure impartiality of chief engineer, 21 SO --PRESIDING OFFICER: Uh-huh. 22 motion in limine to exclude expert 22 23 testimony of the City, motion in limine to MR. MCLEOD: -- whatever limits the 24 exclude expert testimony of DWR or 24 hearing officer chooses to set, we, I 25 recommendations, motion to dismiss and 25 think, will easily be able to abide. Page 6 Page 8 1 motion for summary judgment. PRESIDING OFFICER: Okay. 2 So, Counsel, those of you who have 2 Intervenors, do you --3 submitted these motions, and everybody, if MS. WENDLING: I would agree that 4 I'm correct, everybody but DWR has been in 4 the motion for summary judgment and motion 5 initial movement. What are your priorities 5 to dismiss deserve the most attention. 6 for your time, or shall we limit beginning 6 PRESIDING OFFICER: Okay. DWR? 7 with 12 minutes per person per motion? MR. OLEEN: DWR doesn't really have 8 GMD, do you have an opinion about 8 an opinion, whatever the hearing officer 9 your -- the time you would like to focus on 9 would prefer. I don't anticipate that DWR 10 today? 10 will need 12 minutes to respond to each of MR. STUCKY: I think -- I guess I'll 11 the motions --12 speak for us. We're prepared to just go **PRESIDING OFFICER:** Okay. 12 13 through each of our motions in order, and I MR. OLEEN: -- directed against DWR. 13 14 think that'll be an efficient use of time. PRESIDING OFFICER: Okay. Well, in 14 15 We're prepared, if it's useful to you, to 15 light of this, then maybe we should defer

16 go first and just go through all the

17 motions as we see it and try and allocate

18 our time in a respectful manner and then

19 give others an equal amount of time this

20 morning to also respond and address the

21 motions. So that's -- that's what we think

22 would be most efficient so ...

23 PRESIDING OFFICER: I would prefer

24 to take motion by motion.

MR. STUCKY: Okay.

16 back to the presentation that the District

was anticipating to begin with and -- and

18 let you present yours. It doesn't sound

19 like there will be extensive response. So

20 it might be more efficient for you to

21 proceed that way.

MR. OLEEN: I'm sorry, Officer Owen, 22

23 I would conceptually, because we have so

24 many motions, I would prefer to have

25 everybody talk about one motion before we

				May	28, 2019
	Pa	age 9			Page 11
1	move on to the next because		he Fauus	s Beds District was formed, as I	
2			•	975, and it has been working in	
3				tion ever since.	
	what points they made in motion one versus			ment of purpose on this is	
	motion seven or eight as far as responding.			ny presentation is to give you	
6	B 420			kground really into the original	
7				called ASR, or the Aquifer Storage	
8				very Project. The original hope of	
9				ct, which began quite a few years	
10	back to what I want to do.	1		to inject water in various forms	
11	So you want to spend the bulk of your	1	_	quifer to prevent the movement of	
	time with your motion to dismiss and your			ne that resulted from oil and gas	
	motion for summary judgment; is that right?		•	n around the City of Burrton,	
14	MR. STUCKY: Yes.	1	Kansas.	The hope was that by building some	!
15	PRESIDING OFFICER: Okay. Well,	1	nead pres	ssure of inputting water in that it	
16	then let's start with your motion to	1	vould sto	p the movement, the southeastern	
17	dismiss.	1	novemen	t of that salt plume because it was	
18	MR. ADRIAN: I was about to say Your	1	hreatenin	ng all the wells in its path,	
19	Honor, but it's	1	vhich wo	uld also include the wells I	
20	PRESIDING OFFICER: Madam Hearing	2	hink there	e are 56 wells of the City of	
21	Officer maybe.	2	Vichita, a	and so they had a definite	
22	, 5 5	2	nterest in	trying to prevent the movement	
	to do in consideration of the motion for		of that sal	•	
	summary judgment and motion to dismiss is		-	eject, when we were discussing	
25	I'm going to make some opening remarks on	2	hat, and i	if you examine the voluminous	
	Pag	ge 10			Page 12
1	behalf of the District showing how we got		ecords v	ou've already seen, the MOUs that	
	where we are, and then Dave Stucky will be		-	of that discussion, as we were	
	arguing the more technical approach to			g that, the City's proposal back	
	that.			that they should receive credits	
	As I said earlier, I'm Tom Adrian, and			ng the water; in other words,	
	I've been legal counsel for the Equus Beds		•	would allow them to withdraw	
	District No. 2 actually since its inception			r their current allocation, which	
	in roughly 1975. I actually grew up in the			acre-feet a year. And by	
	Equus Beds, my father was a farmer there,			vater, by doing this preventative	
	and I still own the land that where I	1	-	ey would gain that credit. And	
11	grew up; it is irrigated by Equus Beds	1		bviously seemed reasonable and	
12	water and fed our cattle and other	1	t was agr	eed to.	
13	livestock with Equus Beds water, and this	1	One of the	e theories that they advanced	
14	is this whole thing is very dear to my	1	ack then	was that if they ceased or	
15	heart.	1	estricted	the use of the aquifer that they	
16	The motions we've filed are extremely	1	should ge	t credit for that, in other words	
17	important to us, they go along with the	1	nonuse sh	nould cause them to get additional	
18	3	1	credit to w	vithdraw the water under the	
19	•		-	t nonuse was actually increasing	
20	,			in the aquifer. And the term	
	became actually law in K.S.A. 82a-1020.			pplied to that was passive	
	And that declaration was that in effect the		_	The idea of passive recharge was	
	governing of the withdrawal of water			gly rejected by the District and	
24	from the Equus Beds was to be controlled	2	also by th	e DWR, and so passive recharge	
	hu aa muuah aa maaaihla laaalimmut Amd				

25 by, as much as possible, local input. And

25 never became the law.

Page 13 Page 15 1 Recently, Joe Pajor, who is an employee 1 in the first place, which is to ask for a 2 of the City of Wichita and a member of the 2 change in the law and/or the regulations 3 board of directors of the Equus Beds 3 that would permit them to do that. And 4 Groundwater Management District, advised 4 that's a much more extensive process than 5 the rest of the board that until this 5 simply filing a request with the chief 6 engineer. 6 current project becomes the rule, in other 7 words until they can get credit for 7 That action -- that action, then, puts 8 injecting -- for cleaning water out of 8 into play whether it is -- whether the 9 the -- the Little Ark River and sending it 9 people that are responsible for changing 10 directly to the City as opposed to the law feel it is a good idea for the 11 injecting it into the aquifer, until that 11 aguifer to be treated in that way. In 12 becomes the case, they are going to start 12 other words, what they're asking for is 13 increasing their pumping out of the Equus credit for not injecting water in the 14 Beds Aquifer. 14 aguifer but simply moving it to Wichita 15 You know, obviously they said that the directly, which sounds very much like and 16 aquifer -- or the ASR, that project now has similar to passive recharge, which 17 new purpose. Original purpose was to stop previously has been rejected. 18 the movement of the salt plume and other And now I'm going to turn over to Dave 19 simply to argue the more technical aspects 19 things; now he said that the purpose of the 20 Aguifer Storage and Recovery Project is to 20 of those motions. 21 cover their needs in the case of a drought. 21 MR. STUCKY: Well, good morning, I'm 22 And they had calculated that they need more 22 Dave Stucky, and I'm going to go over our 23 water than what they have allocated to 23 motions in a little more detail. And 24 them. They also calculated that they could 24 certainly I don't want to insult Madam 25 not build sufficient credits under the 25 Hearing Officer here, I know that you've Page 14 Page 16 1 read all the motions, but I would still 1 current system. 2 That application, as the record will 2 like to give some of the high points. And 3 show, was filed back in March of 2018, and 3 I promise that I'll be respectful with the 4 both the City and the chief engineer were 4 time this morning. I actually just 5 ready to go to hearing in August, and we 5 recently had knee surgery, so my desire to 6 were not. And we've had a difficult year 6 stand for an extended period of time is not 7 trying to gain adequate time to prepare and 7 great. So with that in mind, I'm going to 8 get expert witnesses, and that has taken 8 go over some of the facts that we're using 9 quite a bit of time. During that time, the 9 in our motion for summary judgment. 10 City was quite critical of us for being 10 As Tom mentioned, at issue is what is 11 obstructionist and for trying to prepare 11 called the ASR Permit Modification Proposal 12 Revised Minimum Index Levels & Aquifer 12 our case. 13 Motion for summary judgment and the 13 Maintenance Credits, and that's a proposal 14 motions to dismiss really are saying there 14 that was submitted by the City on March 12, 15 2018. It allows for the accumulation of 15 is no law to authorize them to do what 16 they're asking to do. Really, that -- that 16 aquifer maintenance credits where when the 17 jumps over the idea of whether it's a good 17 Equus Beds Aquifer has limited recharge 18 idea or not a good idea, but the law simply 18 capacity as determined by the City, surface 19 isn't there. In fact, it's specifically 19 water can be diverted from the Little 20 not there because it directs, as they will 20 Arkansas River, treated, and pumped 21 tell you, it directs that they get credit 21 directly to the City. For each gallon of 22 for injecting water in the aguifer. 22 surface water that is pumped directly to 23 By granting this motion to dismiss, what 23 the City, the City will also get a 24 would happen is that they would be forced 24 correlating credit for another gallon, less 25 to take the action they should have taken 25 5 percent, of groundwater that can later be

				172113 2	28, 2019

1	withdrawn from the aquifer. Without filing		1	approvals that were granted, the difference	
	any new water permit applications, the			was that the City was injecting water into	
	water can be pumped from the aquifer			the aquifer, and after the water was	
	virtually anytime, even during a time of			injected into the aquifer, then there was a	
	extreme drought. And this is limited by a			credit received for that water injected.	
	19,000 acre-feet annually.			So for every gallon put in the aquifer, the	
7	The City's proposal will also lower the		7	City could take an equal gallon back out at	
8	previously agreed upon minimum index		8	a later time. So this is in stark contrast	
9	levels. So currently there's a minimum		9	to what they did before.	
10	index level that defines at what when		10	And as what and in addition to what	
11	the City can withdraw below a certain		11	Tom mentioned, that old proposal, if you	
12	amount, and that minimum index level		12	will, I'll call it the old proposal for our	
	they're proposing to reduce per their		13	purposes today, was consistent with current	
	proposal. And although it's not central to		14	ASR regulations, which we'll talk about	
	our motion, impairment, minimum desirable			here in a moment, the ASR permit approvals	
	streamflow, and water quality are either			and the conditions that were imposed by	
	not addressed or merely paid lip service at			those permits, and two memorandums of	
	best in the City's proposal. And, in fact,			understanding that were entered into	
	in reading the City's proposal again last			between the City and the District. And	
	night, basically those three elements are			it's our position that these regulations,	
	given essentially a sentence of attention			approvals, and memorandums of understandin	g
	in the proposal, which I have right before			have created a number of expectations for	
	me right now. So so basically given			all constituents of the District, and	
	very little attention in the proposal.			that's why we think that this is very vital	
25	DWR has indicated the circumstances by		25	that these motions be heard and addressed.

2 3 4 5 6 7 8 9	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting	age 18	2 3 4 5 6 7 8 9	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other	Page 20
2 3 4 5 6 7 8 9 10	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very	age 18	2 3 4 5 6 7 8 9 10	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits,	Page 20
2 3 4 5 6 7 8 9 10 11	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in	age 18	2 3 4 5 6 7 8 9 10 11	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any	Page 20
2 3 4 5 6 7 8 9 10 11 12 13	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in	age 18	2 3 4 5 6 7 8 9 10 11 12 13	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind	Page 20
2 3 4 5 6 7 8 9 10 11 12 13 14	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in responses to discovery, so a very, very	age 18	2 3 4 5 6 7 8 9 10 11 12 13 14	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind of water appropriation except for any water	Page 20
2 3 4 5 6 7 8 9 10 11 12 13 14 15	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in responses to discovery, so a very, very basic concept is what we're relying on for	age 18	2 3 4 5 6 7 8 9 10 11 12 13 14 15	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind of water appropriation except for any water that they physically inject into the	Page 20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in responses to discovery, so a very, very basic concept is what we're relying on for the purposes of our motion, the very basic	age 18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind of water appropriation except for any water that they physically inject into the aquifer, and that's specifically the black	Page 20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in responses to discovery, so a very, very basic concept is what we're relying on for the purposes of our motion, the very basic conceptual idea that the water will be	age 18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind of water appropriation except for any water that they physically inject into the aquifer, and that's specifically the black letter language of the prior permits.	Page 20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in responses to discovery, so a very, very basic concept is what we're relying on for the purposes of our motion, the very basic conceptual idea that the water will be diverted from the Little Ark River, pumped	age 18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind of water appropriation except for any water that they physically inject into the aquifer, and that's specifically the black letter language of the prior permits.	Page 20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in responses to discovery, so a very, very basic concept is what we're relying on for the purposes of our motion, the very basic conceptual idea that the water will be diverted from the Little Ark River, pumped directly to the City, and the City will get	age 18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind of water appropriation except for any water that they physically inject into the aquifer, and that's specifically the black letter language of the prior permits. So those are the basic facts we're going to rely on for the purpose of our motion	Page 20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in responses to discovery, so a very, very basic concept is what we're relying on for the purposes of our motion, the very basic conceptual idea that the water will be diverted from the Little Ark River, pumped directly to the City, and the City will get a correlating credit for that water that is	age 18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind of water appropriation except for any water that they physically inject into the aquifer, and that's specifically the black letter language of the prior permits. So those are the basic facts we're going to rely on for the purpose of our motion for summary judgment, and I don't believe	Page 20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in responses to discovery, so a very, very basic concept is what we're relying on for the purposes of our motion, the very basic conceptual idea that the water will be diverted from the Little Ark River, pumped directly to the City, and the City will get a correlating credit for that water that is diverted to the City in the form of an	age 18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind of water appropriation except for any water that they physically inject into the aquifer, and that's specifically the black letter language of the prior permits. So those are the basic facts we're going to rely on for the purpose of our motion for summary judgment, and I don't believe that any of those facts can be have been	Page 20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in responses to discovery, so a very, very basic concept is what we're relying on for the purposes of our motion, the very basic conceptual idea that the water will be diverted from the Little Ark River, pumped directly to the City, and the City will get a correlating credit for that water that is diverted to the City in the form of an aquifer maintenance credit.	age 18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind of water appropriation except for any water that they physically inject into the aquifer, and that's specifically the black letter language of the prior permits. So those are the basic facts we're going to rely on for the purpose of our motion for summary judgment, and I don't believe that any of those facts can be have been controverted and can be controverted by	Page 20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in responses to discovery, so a very, very basic concept is what we're relying on for the purposes of our motion, the very basic conceptual idea that the water will be diverted from the Little Ark River, pumped directly to the City, and the City will get a correlating credit for that water that is diverted to the City in the form of an aquifer maintenance credit. Now, just to distinguish, and I think	age 18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind of water appropriation except for any water that they physically inject into the aquifer, and that's specifically the black letter language of the prior permits. So those are the basic facts we're going to rely on for the purpose of our motion for summary judgment, and I don't believe that any of those facts can be have been controverted and can be controverted by either the City or the Division of Water	Page 20
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	which the water, the AMC is to be later to be withdrawn from the aquifer, what conditions can be imposed on those retroactively, and DWR has said that they can attach conditions retroactively through their answers to our discovery requests. So those basic facts, again, these aren't rocket science kind of facts, these aren't facts that are really subject to any kind of contro any kind of controverting by either the City or DWR, they're very straightforward facts that are included in the proposal, that are admitted to in responses to discovery, so a very, very basic concept is what we're relying on for the purposes of our motion, the very basic conceptual idea that the water will be diverted from the Little Ark River, pumped directly to the City, and the City will get a correlating credit for that water that is diverted to the City in the form of an aquifer maintenance credit.	age 18	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Additionally, one other uncontroverted fact, and I'm just reading directly from prior permits at issue of the City, in those prior permits, they say verbatim, and I'm going to quote, that the applicant shall not be deemed to have acquired a water appropriation for groundwater from the Equus Beds Aquifer except for recovery of water recharged pursuant to the approved Aquifer Storage and Recovery. So in other words, with respect to the prior permits, the City doesn't get any kind of any kind of credit or they don't get any kind of water appropriation except for any water that they physically inject into the aquifer, and that's specifically the black letter language of the prior permits. So those are the basic facts we're going to rely on for the purpose of our motion for summary judgment, and I don't believe that any of those facts can be have been controverted and can be controverted by	Page 20

Page 21 Page 23 1 on to our arguments and just try and 1 City, they also get a correlating gallon 2 highlight what we see as the critical 2 that they can later withdraw out of the 3 points for each of our arguments. Now, з aquifer. 4 obviously, I understand that Madam Hearing 4 And it's our position that doing this 5 Officer is familiar with the Kansas Water 5 expands the consumptive use of the existing 6 Appropriation Act, and so I won't delve 6 ASR permits, and so it's our position that 7 into that in great detail, but just for the 7 this is fundamentally in violation of the 8 purposes of the record and -- I'm going to 8 Kansas Water Appropriation Act. And our 9 highlight just a few points with respect to 9 analogy that we would use with respect to 10 the Kansas Water Appropriation Act. 10 this double credit that the City is getting 11 Now, of course, we know that in Kansas, 11 would be an insurance analogy. Now, 12 the bible of water law is the Kansas Water 12 obviously I understand you've practiced law 13 Appropriation Act, and that governs a lot 13 a long time and all of us, including 14 of -- almost everything that we do with 14 myself, have probably been on some sort of 15 respect to water in this state. And personal injury case at some point in our 16 pursuant to the Kansas Water Appropriation career, and as we know, if you have a 17 Act, basically every element -- there is client that's injured in a car wreck, 18 basic elements of every water right. Of perhaps their car is damaged, perhaps they 19 course, there's a point of diversion, a sustained injuries, their insurance company 20 quantity, a rate, a beneficial use. is going to pay them for their medical 21 bills and pay them for the damage to their 21 At the most fundamental level, there is 22 basic attributes of every water right. 22 car. 23 And, in fact, the Kansas Water 23 Well, later, that client may sue the 24 defendant that injured them in the 24 Appropriation Act, while it designates 25 these potential beneficial uses, it states 25 automobile accident, and when that Page 22 Page 24 1 that each water right can only have one 1 defendant's insurance company pays, the --2 beneficial use for the water. In addition, 2 your client's insurance company will 3 K.S.A. 82a-711a requires consideration of 3 subrogate, or ask dollar for dollar back 4 water quality, safe yield, impairment, and 4 every penny that they paid initially to 5 other factors whenever the Division of 5 your client. And the whole idea under the 6 Water Resource considers any type of 6 law is that you can't have a double 7 proposal such as the one before you today. 7 recovery; you can't get payment from your 8 We have also outlined all the 8 own insurance company and also a payment 9 regulations that create the definitions and 9 from the defendant's insurance company. 10 the further regulatory framework for what 10 The law forbids a double recovery. 11 we're operating under in our motion. So 11 And that's exactly what the City is 12 with that in mind, our first point has to 12 trying to do in this case. The City is 13 do with the fundamentally illegal nature of 13 trying to violate the classic English 14 the City's, quote, unquote, right in this 14 proverb because the City wants to have its 15 cake and eat it too. That's exactly what 15 particular case. 16 First of all, it's our position that the 16 they're trying to do in this case, and at a 17 City is allowed to have two beneficial very fundamental level, we're asking that 18 uses, both municipal use when they pump a you deny the City's proposal for that 19 gallon of water from the Little Ark River 19 reason alone. 20 directly to the City, and second of all, 20 Additionally, what we have highlighted 21 they get an aquifer maintenance credit that 21 in our motion has to do with the safe yield 22 they can later withdraw this water at a 22 analysis. And, again, this is just black 23 later time from the aguifer. So our 23 letter law in Kansas that we're relying on 24 position is that they're getting a two for 24 which is K.A.R. 5-3-9b, which states that 25 one. For every gallon they send to the 25 unless otherwise provided by regulation, it

In other words, what happened was the City was saying that, you know, we could pump from the aquifer or we could pump from Cheney Reservoir, and so you should give us credit for being a good steward and pumping from Cheney Reservoir instead of the aquifer, give us a credit for that, allow us to later withdraw water	
22 33 44 55 66 77 88 99 100 111 122 133 144 155	portion of the aquifer, and that's a significant term, put the water in an unsaturated portion of the aquifer. In other words, if there's availability in the aquifer, the water can be put in the aquifer, but what the City, on the other hand, is proposing to do is put the water in a saturated portion of the aquifer. A saturated portion of the aquifer. In other words, when the water or when the aquifer is full or nearly full or fully saturated, the City wants to pump the water directly to the City and still get credit. This is in direct contravention of the language used in these regulations that has	Page 30	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	quite helpful as I understand and try and grasp the complexity of the issues that are dealt with here today. And so Tom did an excellent job just a moment ago of outlining what this concept of passive recharge credits was. In other words, what happened was the City was saying that, you know, we could pump from the aquifer or we could pump from Cheney Reservoir, and so you should give us credit for being a good steward and pumping from Cheney Reservoir instead of the aquifer, give us a credit for that, allow us to later withdraw water from the aquifer for pumping from Cheney Reservoir instead of the aquifer.	
22 33 44 55 66 77 88 91 10 11 12 13 14 15 16	portion of the aquifer, and that's a significant term, put the water in an unsaturated portion of the aquifer. In other words, if there's availability in the aquifer, the water can be put in the aquifer, but what the City, on the other hand, is proposing to do is put the water in a saturated portion of the aquifer. A saturated portion of the aquifer. In other words, when the water or when the aquifer is full or nearly full or fully saturated, the City wants to pump the water directly to the City and still get credit. This is in direct contravention of the language used in these regulations that has to do with putting the water in an	Page 30	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	quite helpful as I understand and try and grasp the complexity of the issues that are dealt with here today. And so Tom did an excellent job just a moment ago of outlining what this concept of passive recharge credits was. In other words, what happened was the City was saying that, you know, we could pump from the aquifer or we could pump from Cheney Reservoir, and so you should give us credit for being a good steward and pumping from Cheney Reservoir instead of the aquifer, give us a credit for that, allow us to later withdraw water from the aquifer for pumping from Cheney Reservoir instead of the aquifer. And this was brought up at a board	
22 33 44 55 66 77 88 91 10 11 12 13 14 15 16 17 18	portion of the aquifer, and that's a significant term, put the water in an unsaturated portion of the aquifer. In other words, if there's availability in the aquifer, the water can be put in the aquifer, but what the City, on the other hand, is proposing to do is put the water in a saturated portion of the aquifer. A saturated portion of the aquifer. In other words, when the water or when the aquifer is full or nearly full or fully saturated, the City wants to pump the water directly to the City and still get credit. This is in direct contravention of the language used in these regulations that has to do with putting the water in an unsaturated portion.	Page 30	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	quite helpful as I understand and try and grasp the complexity of the issues that are dealt with here today. And so Tom did an excellent job just a moment ago of outlining what this concept of passive recharge credits was. In other words, what happened was the City was saying that, you know, we could pump from the aquifer or we could pump from Cheney Reservoir, and so you should give us credit for being a good steward and pumping from Cheney Reservoir instead of the aquifer, give us a credit for that, allow us to later withdraw water from the aquifer for pumping from Cheney Reservoir instead of the aquifer. And this was brought up at a board meeting, and Tom mentioned he recalls when	
22 33 44 55 66 77 88 91 10 11 12 13 14 15 16 17 18	portion of the aquifer, and that's a significant term, put the water in an unsaturated portion of the aquifer. In other words, if there's availability in the aquifer, the water can be put in the aquifer, but what the City, on the other hand, is proposing to do is put the water in a saturated portion of the aquifer. A saturated portion of the aquifer. In other words, when the water or when the aquifer is full or nearly full or fully saturated, the City wants to pump the water directly to the City and still get credit. This is in direct contravention of the language used in these regulations that has to do with putting the water in an unsaturated portion. So, indeed, you'll find a more detailed	Page 30	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	quite helpful as I understand and try and grasp the complexity of the issues that are dealt with here today. And so Tom did an excellent job just a moment ago of outlining what this concept of passive recharge credits was. In other words, what happened was the City was saying that, you know, we could pump from the aquifer or we could pump from Cheney Reservoir, and so you should give us credit for being a good steward and pumping from Cheney Reservoir instead of the aquifer, give us a credit for that, allow us to later withdraw water from the aquifer for pumping from Cheney Reservoir instead of the aquifer. And this was brought up at a board meeting, and Tom mentioned he recalls when that occurred, and specifically what was	
22 33 44 55 66 77 8 9 10 11 12 13 14 15 16 17 18 19 20	portion of the aquifer, and that's a significant term, put the water in an unsaturated portion of the aquifer. In other words, if there's availability in the aquifer, the water can be put in the aquifer, but what the City, on the other hand, is proposing to do is put the water in a saturated portion of the aquifer. A saturated portion of the aquifer. In other words, when the water or when the aquifer is full or nearly full or fully saturated, the City wants to pump the water directly to the City and still get credit. This is in direct contravention of the language used in these regulations that has to do with putting the water in an unsaturated portion. So, indeed, you'll find a more detailed statutory construction in our motion, those	Page 30	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	quite helpful as I understand and try and grasp the complexity of the issues that are dealt with here today. And so Tom did an excellent job just a moment ago of outlining what this concept of passive recharge credits was. In other words, what happened was the City was saying that, you know, we could pump from the aquifer or we could pump from Cheney Reservoir, and so you should give us credit for being a good steward and pumping from Cheney Reservoir instead of the aquifer, give us a credit for that, allow us to later withdraw water from the aquifer for pumping from Cheney Reservoir instead of the aquifer. And this was brought up at a board meeting, and Tom mentioned he recalls when that occurred, and specifically what was decided in those memorandums of	
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	portion of the aquifer, and that's a significant term, put the water in an unsaturated portion of the aquifer. In other words, if there's availability in the aquifer, the water can be put in the aquifer, but what the City, on the other hand, is proposing to do is put the water in a saturated portion of the aquifer. A saturated portion of the aquifer. In other words, when the water or when the aquifer is full or nearly full or fully saturated, the City wants to pump the water directly to the City and still get credit. This is in direct contravention of the language used in these regulations that has to do with putting the water in an unsaturated portion. So, indeed, you'll find a more detailed statutory construction in our motion, those are just some of the high points, but it's	Page 30	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	quite helpful as I understand and try and grasp the complexity of the issues that are dealt with here today. And so Tom did an excellent job just a moment ago of outlining what this concept of passive recharge credits was. In other words, what happened was the City was saying that, you know, we could pump from the aquifer or we could pump from Cheney Reservoir, and so you should give us credit for being a good steward and pumping from Cheney Reservoir instead of the aquifer, give us a credit for that, allow us to later withdraw water from the aquifer for pumping from Cheney Reservoir instead of the aquifer. And this was brought up at a board meeting, and Tom mentioned he recalls when that occurred, and specifically what was decided in those memorandums of understanding that were adopted and signed	
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	portion of the aquifer, and that's a significant term, put the water in an unsaturated portion of the aquifer. In other words, if there's availability in the aquifer, the water can be put in the aquifer, but what the City, on the other hand, is proposing to do is put the water in a saturated portion of the aquifer. A saturated portion of the aquifer. In other words, when the water or when the aquifer is full or nearly full or fully saturated, the City wants to pump the water directly to the City and still get credit. This is in direct contravention of the language used in these regulations that has to do with putting the water in an unsaturated portion. So, indeed, you'll find a more detailed statutory construction in our motion, those are just some of the high points, but it's our position that not only does the City's	Page 30	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	quite helpful as I understand and try and grasp the complexity of the issues that are dealt with here today. In	the Matter of the City of Wichita's Phase II Aquifer		Oral A Ma	Arguments vy 28, 2019
	Page 33			Page 35
1	. ASR phase I and the ASR phase II, orders of	1	that anyway so I have no objection.	
2	the chief engineer in both of those orders,	2	PRESIDING OFFICER: Proceed, please.	
3	it was specified that passive recharge	3	MR. STUCKY: All right. We'll	
4	credits would never be allowed.	4	proceed on to our motion to dismiss, and	
5	You know, and we have the chief engineer	5	I've highlighted what we think are the	
6	filed a legal memorandum in this case that	6	facts germane to our motion for summary	
7	said that these aquifer maintenance credits		judgment. There's just a couple additional	
8	are a functional equivalent of the ASR	8	points that are that are key to our	
9	project, some sort of functional	9	motion to dismiss.	
10	equivalent, and what I would submit to you	10	And point number one is that the	
11	here today, and I think for the arguments		proposal, if approved as proposed, would	
12	we have highlighted, it's the functional	12	allow the City to withdraw its aquifer	
13	opposite of the ASR project, the AMCs are	13	maintenance credits without filing any new	
14	the functional opposite of the ASR project.	14	or change applications as required by the	
15	And what AMCs are the functional equivalent	15	Kansas Water Appropriation Act, so there's	
16	of is a passive recharge credit. Because	16	no new application or no change application	
17	instead of pumping water from Cheney	17	that will be filed by the City, that's	
18	Reservoir, the City is simply trying to	18	point number one. And point number two is	
19	pump water from the Little Arkansas River.	19	that the proposal would allow the City to	
20	Now, they're using a different source,	20	lower the minimum index levels. And we	
21	but their whole idea is the same as what	21	talked about that before, but I just want	
22	was expressly forbidden a few years ago,	22	to highlight it again.	
23	which is that you can't get a credit for	23	So that turns us to our argument, and,	
24	pumping water directly to the City from	24	again, I won't duplicate any of our	
25	Cheney Reservoir or the Little Arkansas	25	arguments, I'm just going to highlight the	
	Page 34			Page 36
1	. River, you can't get credit for that in the	1	additional points that we raised in our	
	form of a later credit from the aquifer,		motion to dismiss.	
	that's a passive recharge credit. And so	3	Now, our first point was that a change	
4	what we're saying the City is attempting to		application should have been filed by the	
5	do is a functional equivalent of a passive	5	City in this particular case, and, again,	
	recharge credit and should be denied for		that's black letter law in K.S.A. 82a-708b.	
	that reason as well	7	What that statute says is that there's	

- 7 that reason as well.
- 8 So I think that sums up our points in
- 9 our motion for summary judgment, and I'd
- 10 like to reserve the majority of the
- 11 remainder of our time for the District's
- 12 motion to dismiss.
- 13 PRESIDING OFFICER: Okay, thank you.
- MR. OLEEN: I'm sorry, Officer Owen, 14
- 15 if I may, just a -- in DWR's opinion, the
- 16 arguments involved with the motion to
- 17 dismiss are very similar conceptually to
- 18 those for the motion for summary judgment.
- 19 DWR would be okay with the District
- 20 immediately discussing the motion to
- 21 dismiss arguments along with summary
- 22 judgment arguments but that's just --
- 23 PRESIDING OFFICER: Any objection
- 24 from the City?
- MR. MCLEOD: I think they just did 25

- 7 What that statute says is that there's
- 8 three attributes of a water right that can
- 9 be changed, the point of diversion, the
- 10 place of use, and the use made of the
- 11 water. And it's our position that the
- 12 permits that the City had were water
- 13 rights, and if the City wished to change
- 14 them, there's an application process that
- 15 needs to be followed. There's specific
- 16 forms the Division of Water Resources has
- 17 and an application process that needs to be
- 18 followed for those water rights to be
- 19 changed.
- 20 By trying to change how the recharge
- 21 credits are accumulated, which is what the
- 22 City is trying to do, they should have
- 23 filed -- that's a fundamental change to
- 24 those permits, and, therefore, they should
- 25 have followed the process to seek a change

	, 20, 2017	Page 37			Page 39
1	application or or indeed seek a new		1	And we understand that the City is going	
	permit.			And we understand that the City is going to argue that it's a different kind of	
	And we have we have highlighted the			circumstance because they're asking to

There are only very limited situations this case identified under which DWR can further alter a permit absent a change application being filed. And to sum up the case, just the black letter law of this case, and I'm going to quote again because it's important, the case the Court wrote, in sum, the Kansas	Page 38	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	process being followed. And indeed I just want to also mention that the District is a party to the memorandums of understanding, and so reall we also, it's our position that these permits shouldn't be changed over the objection of the District because of our valuable role as a party to these memorandums of understanding that were the bedrock for these permits being granted. And so so as I mentioned, the reason for Clawson is it creates expectations for all water right users, all constituents in an area of a water right that once the Division of Water Resource grants a water right, they're not going to just be able to modify it willy-nilly in the future without this change application process being	у
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Ms. Clawson. And what came out of that case, first of all, quoting from that case, it's stated, the Kansas Water Appropriation Act does not give the chief engineer carte blanche authority to alter water appropriations. It stated that it identified only a handful of reasons the chief engineer can alter a permit or water right, and those included abandonment or some sort of ability to suspend a water right. There are only very limited situations this case identified under which DWR can further alter a permit absent a change application being filed. And to sum up the case, just the black letter law of this case, and I'm going to quote again because it's important, the case the Court wrote, in sum, the Kansas Water Appropriation Act does not authorize	Page 38	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	process being followed. And indeed I just want to also mention that the District is a party to the memorandums of understanding, and so reall we also, it's our position that these permits shouldn't be changed over the objection of the District because of our valuable role as a party to these memorandums of understanding that were the bedrock for these permits being granted. And so so as I mentioned, the reason for Clawson is it creates expectations for all water right users, all constituents in an area of a water right that once the Division of Water Resource grants a water right, they're not going to just be able to modify it willy-nilly in the future without this change application process being followed.	у
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Ms. Clawson. The idea, as I understand it, being that you can't have you can't have modifications to permits without a change application, yet in their own motion to dismiss, the District recognizes that there are a range of matters where that's just done typically. So as a bright-line rule, that rule is not there.	Page 54	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	standing and clearly we have it. It is a procedural quagmire type argument, and it does need to be addressed; and if the District is right concerning that argument, then the Hearing Officer and the Division have no jurisdiction over any of their collateral motions, discovery issues, et cetera. The taking issue, I would point out, directly conflicts with what Mr. Adrian said in his opening that the District's position was that this all should be done via legislative process. Well, if it's a constitutional taking, I don't see that working either. Those two those two positions are incompatible, and consistency	Page 56
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	wells are extended to fully penetrate the aquifer, there should not be impairment there, I think that's intuitive. The notion procedurally that we can't get there from here, that's really kind of the District's argument in its motion to dismiss and its summary judgment motion, the main argument. The idea, as I understand it, being that you can't have you can't have modifications to permits without a change application, yet in their own motion to dismiss, the District recognizes that there are a range of matters where that's just done typically. So as a bright-line rule, that rule is not there. And then the other notion that they	Page 54	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	standing and clearly we have it. It is a procedural quagmire type argument, and it does need to be addressed; and if the District is right concerning that argument, then the Hearing Officer and the Division have no jurisdiction over any of their collateral motions, discovery issues, et cetera. The taking issue, I would point out, directly conflicts with what Mr. Adrian said in his opening that the District's position was that this all should be done via legislative process. Well, if it's a constitutional taking, I don't see that working either. Those two those two positions are incompatible, and consistency has really not been the District's strong	Page 56
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	wells are extended to fully penetrate the aquifer, there should not be impairment there, I think that's intuitive. The notion procedurally that we can't get there from here, that's really kind of the District's argument in its motion to dismiss and its summary judgment motion, the main argument. The idea, as I understand it, being that you can't have you can't have modifications to permits without a change application, yet in their own motion to dismiss, the District recognizes that there are a range of matters where that's just done typically. So as a bright-line rule, that rule is not there. And then the other notion that they bring is the notion that even if the City	Page 54	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	standing and clearly we have it. It is a procedural quagmire type argument, and it does need to be addressed; and if the District is right concerning that argument, then the Hearing Officer and the Division have no jurisdiction over any of their collateral motions, discovery issues, et cetera. The taking issue, I would point out, directly conflicts with what Mr. Adrian said in his opening that the District's position was that this all should be done via legislative process. Well, if it's a constitutional taking, I don't see that working either. Those two those two positions are incompatible, and consistency has really not been the District's strong suit in the history of the case.	Page 56
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	wells are extended to fully penetrate the aquifer, there should not be impairment there, I think that's intuitive. The notion procedurally that we can't get there from here, that's really kind of the District's argument in its motion to dismiss and its summary judgment motion, the main argument. The idea, as I understand it, being that you can't have you can't have modifications to permits without a change application, yet in their own motion to dismiss, the District recognizes that there are a range of matters where that's just done typically. So as a bright-line rule, that rule is not there. And then the other notion that they bring is the notion that even if the City were to file a change application, this is	Page 54	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	standing and clearly we have it. It is a procedural quagmire type argument, and it does need to be addressed; and if the District is right concerning that argument, then the Hearing Officer and the Division have no jurisdiction over any of their collateral motions, discovery issues, et cetera. The taking issue, I would point out, directly conflicts with what Mr. Adrian said in his opening that the District's position was that this all should be done via legislative process. Well, if it's a constitutional taking, I don't see that working either. Those two those two positions are incompatible, and consistency has really not been the District's strong suit in the history of the case. The idea that there is a taking here, I	Page 56
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	wells are extended to fully penetrate the aquifer, there should not be impairment there, I think that's intuitive. The notion procedurally that we can't get there from here, that's really kind of the District's argument in its motion to dismiss and its summary judgment motion, the main argument. The idea, as I understand it, being that you can't have you can't have modifications to permits without a change application, yet in their own motion to dismiss, the District recognizes that there are a range of matters where that's just done typically. So as a bright-line rule, that rule is not there. And then the other notion that they bring is the notion that even if the City were to file a change application, this is not a change that can be addressed because	Page 54	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	standing and clearly we have it. It is a procedural quagmire type argument, and it does need to be addressed; and if the District is right concerning that argument, then the Hearing Officer and the Division have no jurisdiction over any of their collateral motions, discovery issues, et cetera. The taking issue, I would point out, directly conflicts with what Mr. Adrian said in his opening that the District's position was that this all should be done via legislative process. Well, if it's a constitutional taking, I don't see that working either. Those two those two positions are incompatible, and consistency has really not been the District's strong suit in the history of the case. The idea that there is a taking here, I think does not fit well with with the	Page 56
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	wells are extended to fully penetrate the aquifer, there should not be impairment there, I think that's intuitive. The notion procedurally that we can't get there from here, that's really kind of the District's argument in its motion to dismiss and its summary judgment motion, the main argument. The idea, as I understand it, being that you can't have you can't have modifications to permits without a change application, yet in their own motion to dismiss, the District recognizes that there are a range of matters where that's just done typically. So as a bright-line rule, that rule is not there. And then the other notion that they bring is the notion that even if the City were to file a change application, this is not a change that can be addressed because the statutes don't specify that you can	Page 54	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	standing and clearly we have it. It is a procedural quagmire type argument, and it does need to be addressed; and if the District is right concerning that argument, then the Hearing Officer and the Division have no jurisdiction over any of their collateral motions, discovery issues, et cetera. The taking issue, I would point out, directly conflicts with what Mr. Adrian said in his opening that the District's position was that this all should be done via legislative process. Well, if it's a constitutional taking, I don't see that working either. Those two those two positions are incompatible, and consistency has really not been the District's strong suit in the history of the case. The idea that there is a taking here, I think does not fit well with with the working of the Western Rights Model of	Page 56
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	wells are extended to fully penetrate the aquifer, there should not be impairment there, I think that's intuitive. The notion procedurally that we can't get there from here, that's really kind of the District's argument in its motion to dismiss and its summary judgment motion, the main argument. The idea, as I understand it, being that you can't have you can't have modifications to permits without a change application, yet in their own motion to dismiss, the District recognizes that there are a range of matters where that's just done typically. So as a bright-line rule, that rule is not there. And then the other notion that they bring is the notion that even if the City were to file a change application, this is not a change that can be addressed because	Page 54	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	standing and clearly we have it. It is a procedural quagmire type argument, and it does need to be addressed; and if the District is right concerning that argument, then the Hearing Officer and the Division have no jurisdiction over any of their collateral motions, discovery issues, et cetera. The taking issue, I would point out, directly conflicts with what Mr. Adrian said in his opening that the District's position was that this all should be done via legislative process. Well, if it's a constitutional taking, I don't see that working either. Those two those two positions are incompatible, and consistency has really not been the District's strong suit in the history of the case. 23 34 56 67 78 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	wells are extended to fully penetrate the aquifer, there should not be impairment there, I think that's intuitive. The notion procedurally that we can't get there from here, that's really kind of the District's argument in its motion to dismiss and its summary judgment motion, the main argument. The idea, as I understand it, being that you can't have you can't have modifications to permits without a change application, yet in their own motion to dismiss, the District recognizes that there are a range of matters where that's just done typically. So as a bright-line rule, that rule is not there. And then the other notion that they bring is the notion that even if the City were to file a change application, this is not a change that can be addressed because the statutes don't specify that you can	Page 54	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	standing and clearly we have it. It is a procedural quagmire type argument, and it does need to be addressed; and if the District is right concerning that argument, then the Hearing Officer and the Division have no jurisdiction over any of their collateral motions, discovery issues, et cetera. The taking issue, I would point out, directly conflicts with what Mr. Adrian said in his opening that the District's position was that this all should be done via legislative process. Well, if it's a constitutional taking, I don't see that working either. Those two those two positions are incompatible, and consistency has really not been the District's strong suit in the history of the case. The idea that there is a taking here, I think does not fit well with with the working of the Western Rights Model of	Page 56
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	wells are extended to fully penetrate the aquifer, there should not be impairment there, I think that's intuitive. The notion procedurally that we can't get there from here, that's really kind of the District's argument in its motion to dismiss and its summary judgment motion, the main argument. The idea, as I understand it, being that you can't have you can't have modifications to permits without a change application, yet in their own motion to dismiss, the District recognizes that there are a range of matters where that's just done typically. So as a bright-line rule, that rule is not there. And then the other notion that they bring is the notion that even if the City were to file a change application, this is not a change that can be addressed because the statutes don't specify that you can make these kind of modifications in a	Page 54	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	standing and clearly we have it. It is a procedural quagmire type argument, and it does need to be addressed; and if the District is right concerning that argument, then the Hearing Officer and the Division have no jurisdiction over any of their collateral motions, discovery issues, et cetera. The taking issue, I would point out, directly conflicts with what Mr. Adrian said in his opening that the District's position was that this all should be done via legislative process. Well, if it's a constitutional taking, I don't see that working either. Those two those two positions are incompatible, and consistency has really not been the District's strong suit in the history of the case. The idea that there is a taking here, I think does not fit well with with the working of the Western Rights Model of water rights in general. Conflicting water	

ın	the Matter of the City of Wichita's Phase II Aquiler			xrguments y 28, 2019
	Page 8	57		Page 59
1	rights, and part of that is because the	1	to consider because we do need to know wh	at
2	right to divert is not ownership of the	2	will happen if these credits are used or if	
3	water. Nobody owns that water, certainly	3	the index levels are lowered to the point	
4	not the District, and so there is not a	4	that the City has proposed. To say that we	
5	taking issue unless there is impairment of	5	should not consider this 1 percent event is	
6	somebody's own water right to divert.	6	interesting for the City to say since it	
7	I think it is it is a factual issue	7	forms the entire basis of the proposal. If	
8	whether that will be showable by the	8	we were not contemplating this 1 percent	
9	District or not, and the City's view is	9	or 100-year drought, there would be no need	k
10	with the aquifer still 80 percent saturated	10	or justification for the proposal in the	
11	even at the lower levels, there will not be	11	first place.	
12	impairment because people will be able to	12	The City's proposed modifications in	
13	extend their wells if their wells are	13	both aspects, both the AMCs and lowering	
14	impacted.	14	the index levels, both individually can	
15	And it also makes really very little	15	result in taking. The AMCs, excuse me,	
16	sense to address the proposal based on a	16	recharacterize the native water that	
17	100-year event when 99 percent of the time	17	resides in the basin storage areas as an	
18	it's going to be to the clear advantage of	18	AMC so that water that is currently	
19	everybody; it makes no sense to concentrate	19	appropriated to others, as this is a fully	
20	on this fictionalized parade of horribles	20	appropriated area, that water is	
21	that the District believes could happen in	21	recharacterized or converted into an AMC	
22	the 100-year drought.	22	with exclusive rights to the City of	
23	And beyond those things, I don't really	23	Wichita; however, that water has already	
24	have further comments responsive to their	24	been appropriated and rights to other

	Page 5	58		Page 60
1	PRESIDING OFFICER: Thank you.	1	water is an invasion of water rights	
1 _	Mr. III the International Plants and a second		. 1 1	

- 2 Would the Intervenors like to -- excuse me,
- 3 would the Intervenors like to respond?
- MS. WENDLING: Yes. Most of the
- 5 Intervenor comments are trying not to
- 6 repeat what the District has already said.
- 7 We do support every -- all the grounds that
- 8 the District has advanced for the motion
- 9 for summary judgment and motion to dismiss.
- 10 I would like to spend a little time
- 11 focusing on the Takings Clause. As they
- 12 have said, the Fifth Amendment ensures that
- 13 private property shall not be taken for
- 14 public use without just compensation. The
- 15 City obviously disagrees that there would
- 16 be a taking in the event that this proposal
- 17 is approved.
- 18 The City chooses to ignore the
- 19 implications of utilizing the credits they
- 20 seek to accumulate. Their -- their
- 21 proposal focuses only on accumulating
- 22 credits and completely ignores what happens
- 23 when those credits are used, which is an
- 24 irresponsible way of looking at it. This
- 25 parade of horribles is an important thing

- 2 belonging and appropriated to other people.
- 3 Similarly, the lower minimum index
- 4 levels expand the basin storage area, which
- 5 other people have described as a box. By
- 6 making this box larger, it similarly
- 7 displaces the water, that native water gets
- 8 appropriated to other individuals, making
- 9 it more difficult, if not impossible, for
- 10 those groundwater users to access and use
- 11 the water that they've been appropriated a
- 12 right to. So when individuals who have a
- 13 right to water are no longer able to access
- 14 that water, we would likely end up in an
- 15 impairment situation.
- 16 This interference with their ability to
- 17 access the water rights is a physical
- 18 invasion. In Frick versus City of Salina,
- 19 the Kansas Supreme Court found that a
- regulatory action is a per se taking when
- 21 the government requires a landowner to 22 suffer a permanent physical invasion, and
- 23 this is exactly what the City is proposing.
- 24 Many of my other points the District has
- 25 already covered in detail, and we agree

	y 20, 2 012	Page 61			Page 63

Those types of legal arguments can be made to a district court. What the chief engineer wants, as I	Page 66	1 2 3 4 5 6 7 8 9	less? PRESIDING OFFICER: Three minutes is fine, thank you. MR. STUCKY: Okay. I'll be very brief in my comments. Just to point out up front, one, I did misspeak briefly as Mr. McLeod mentioned, it was a slip, the permits are what mentioned the passive recharge credits shouldn't be allowed. The idea of passive recharge credits were not	Page 68
1 2 3 4 5 6 7 8 9 10	counsel for DWR. So I think that these esteemed gentlemen over here, you know, I understand the arguments, the legal arguments they're trying to make, but it's not appropriate at this stage, it's not appropriate to stop the public hearing that the chief engineer wants to have. Those types of legal arguments can be made to a district court. What the chief engineer wants, as I understand it, is input on the proposal	Page 66	1 2 3 4 5 6 7 8 9 10	less? PRESIDING OFFICER: Three minutes is fine, thank you. MR. STUCKY: Okay. I'll be very brief in my comments. Just to point out up front, one, I did misspeak briefly as Mr. McLeod mentioned, it was a slip, the permits are what mentioned the passive recharge credits shouldn't be allowed. The idea of passive recharge credits were not ultimately mentioned in the memorandums of	Page 68
1 2 3 4 5 6 7 8 9 10 11 12	counsel for DWR. So I think that these esteemed gentlemen over here, you know, I understand the arguments, the legal arguments they're trying to make, but it's not appropriate at this stage, it's not appropriate to stop the public hearing that the chief engineer wants to have. Those types of legal arguments can be made to a district court. What the chief engineer wants, as I understand it, is input on the proposal itself, assuming that it's legal under the	Page 66	1 2 3 4 5 6 7 8 9 10 11 12	less? PRESIDING OFFICER: Three minutes is fine, thank you. MR. STUCKY: Okay. I'll be very brief in my comments. Just to point out up front, one, I did misspeak briefly as Mr. McLeod mentioned, it was a slip, the permits are what mentioned the passive recharge credits shouldn't be allowed. The idea of passive recharge credits were not ultimately mentioned in the memorandums of understanding, I just want to make that	Page 68
1 2 3 4 5 6 7 8 9 10 11 12 13	counsel for DWR. So I think that these esteemed gentlemen over here, you know, I understand the arguments, the legal arguments they're trying to make, but it's not appropriate at this stage, it's not appropriate to stop the public hearing that the chief engineer wants to have. Those types of legal arguments can be made to a district court. What the chief engineer wants, as I understand it, is input on the proposal itself, assuming that it's legal under the law, as the chief engineer has determined,	Page 66	1 2 3 4 5 6 7 8 9 10 11 12 13	less? PRESIDING OFFICER: Three minutes is fine, thank you. MR. STUCKY: Okay. I'll be very brief in my comments. Just to point out up front, one, I did misspeak briefly as Mr. McLeod mentioned, it was a slip, the permits are what mentioned the passive recharge credits shouldn't be allowed. The idea of passive recharge credits were not ultimately mentioned in the memorandums of understanding, I just want to make that record clear, that's the one aspect on	Page 68
1 2 3 4 5 6 7 8 9 10 11 12 13 14	counsel for DWR. So I think that these esteemed gentlemen over here, you know, I understand the arguments, the legal arguments they're trying to make, but it's not appropriate at this stage, it's not appropriate to stop the public hearing that the chief engineer wants to have. Those types of legal arguments can be made to a district court. What the chief engineer wants, as I understand it, is input on the proposal itself, assuming that it's legal under the law, as the chief engineer has determined, the chief engineer wants to know what sort	Page 66	1 2 3 4 5 6 7 8 9 10 11 12 13 14	less? PRESIDING OFFICER: Three minutes is fine, thank you. MR. STUCKY: Okay. I'll be very brief in my comments. Just to point out up front, one, I did misspeak briefly as Mr. McLeod mentioned, it was a slip, the permits are what mentioned the passive recharge credits shouldn't be allowed. The idea of passive recharge credits were not ultimately mentioned in the memorandums of understanding, I just want to make that record clear, that's the one aspect on which we believe we misspoke. But that	Page 68
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	counsel for DWR. So I think that these esteemed gentlemen over here, you know, I understand the arguments, the legal arguments they're trying to make, but it's not appropriate at this stage, it's not appropriate to stop the public hearing that the chief engineer wants to have. Those types of legal arguments can be made to a district court. What the chief engineer wants, as I understand it, is input on the proposal itself, assuming that it's legal under the law, as the chief engineer has determined, the chief engineer wants to know what sort of conditions would need to be imposed,	Page 66	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	less? PRESIDING OFFICER: Three minutes is fine, thank you. MR. STUCKY: Okay. I'll be very brief in my comments. But that said, every other thing that we said, we believe is true. I also want to clarify, I think, some misstatements that were made by the City. The ASR project has not caused water levels to increase. We believe that the modeling shows that that's due to rain and reduced pumping.	Page 68

25 opinion, they should note their legal

25 index levels, we believe this is a fallacy,

Page 69 Page 71 1 so that's just an average that in times of 1 that the chief engineer, number one, 2 extreme drought that certainly would not be 2 decided that what the City is trying to do 3 the case and is not supported by their 3 is legal so that's the law now, that's 4 model. Again, not dispositive to the 4 point number one; and point number two is 5 motions here today but we just wanted to 5 we're in an administrative procedure and 6 mention. 6 this is -- our arguments should all be 7 reserved for district court. I just want 7 And also the City mentioned you can make 8 some changes to -- to permits and -- before 8 to quote very briefly to you from the 9 the chief engineer, but the law says they 9 Kansas Administrative Procedures Act, and, 10 can't be fundamental changes to the again, this is just basic law in Kansas, 11 permits. You can make de minimis changes, 11 but it says in K.S.A. 77-519, the presiding 12 and we highlight that in our motion, you officer, which is now you, at appropriate 13 can't make fundamental changes to permits, stages of the proceedings shall give all 14 parties full opportunity to file pleadings, 14 and that's what we're talking about. 15 And so -- and something else the City objections, and motions, including but not 16 said is that, you know, this is unfair, limited to motions to dismiss and motions 17 we're hearing the District's arguments for for summary judgment, end quote, from the 17 18 the first time, and I was going to respond Kansas Administrative Procedures Act. 19 to that but I think that's in stark So what we're doing is directly in line with the Kansas Administrative Procedures 20 juxtaposition to what Mr. Oleen said just a 21 moment ago which was the City brought up 21 Act, and it's our position that there's a 22 all these legal -- or the District brought 22 new sheriff in town, there's a new hearing 23 up all these legal arguments a long time officer that's presiding over these 24 ago, and the chief engineer sent a short 24 hearings, so it doesn't matter if the 25 one- or two-page letter that said we're 25 chief engineer, through some short Page 70 Page 72 1 denying those legal arguments. That's what 1 one-and-a-half-page letter, said that what 2 the record supports, that's what the record 2 the City is trying to do is legal, that 3 shows. This was brought up in board 3 doesn't make it right, that doesn't make 4 meetings a long time ago, we advanced our 4 what the -- make it the law just because 5 legal position and said that we didn't 5 the prior hearing officer said that in a 6 believe what the City was trying to do was 6 letter that was sent before he even became 7 legal, and that's when the chief engineer 7 the hearing officer, which was part of the 8 sent that letter. So I think that bats 8 reason for our motion for impartiality, 9 down really quickly what the City was 9 which, of course, is not at issue anymore. 10 arguing. 10 So it's our position that that's all 11 So with that in mind, with those irrelevant, that you have the full rights 12 clarifications in mind, I just want to make 12 under the Kansas Administrative Procedures 13 it very, very clear that what we're saying 13 Act to adjudicate our motions, to decide 14 has not been controverted by any law by 14 that what the City is attempting to do is 15 either the District -- by either the City 15 illegal, and it's irrelevant what a prior 16 or the Division of Water Resources, they 16 hearing officer said in that regard. 17 haven't cited any law that has supported PRESIDING OFFICER: Thank you. 17 18 their proposal and said -- shown why what Okay. It is now 11:30, why don't we take 19 they're trying to do is legal. That's about a ten-minute break, and then we'll 20 something that's missing from all the 20 resume with remaining motions. Thank you, 21 off the record. 21 briefs, all the argument submitted by the 22 Division of Water Resources and by the 22 (Thereupon, a recess was taken; 23 Citv. 23 whereupon, the following was had.) 24 And I'll sum up what Mr. Oleen said in PRESIDING OFFICER: Let's go back on 24 25 just -- very briefly. What he's saying is 25 the record. Okay. We're now back on the

In	the Matter of the City of Wichita's Phase II Aqu	ifer		Oral Argum May 28, 2	
		Page 73		Page	e 75
1	record, it's 11:45, and it appears that for		1	legal, and so we were just merely	
	the most part the remaining motions sort of		2	interested in what level of involvement the	
3	fall into two categories, motions to compel		3	chief engineer had in analyzing this	
	and motions to exclude.			proposal, in considering the technical	
5	And let's start with the motions to		5	aspects, and what private conversations	
6	compel, which as I understand it there are		6	between the chief engineer and the City	
7	two of those, both filed by the District.		7	might have occurred and what the substance	
8	So let's start with the motion to compel		8	of those communications were. And so	
9	directed at DWR. And then we'll just march		9	really what what's left with respect to	
10	through the motions after that one. So,		10	our motion to compel against the Division	
11	GMD, if you would like to proceed with		11	of Water Resources is just that simplistic	
12	that.		12	point.	
13	MR. STUCKY: Thank you. Well, Madam		13	What we're saying is either the chief	
14	Hearing Officer, just in the interest of		14	engineer can have no involvement in this	
	time, and we're optimistic that we can get			hearing any further, that any kind of	
16	this moved along and hopefully finish up		16	recommendations made by the chief engineer	
17	this hearing by 12:30 as we go right		17	as far as what's legal and not legal has no	
	through, we're willing on these particular			bearing and there can be no recommendations	
	motions to basically just stand on the face			by the chief engineer, either that occur or	
	of the motions. As this matter has gone on			if the chief engineer is going to have some	
	and on, we've decided that there's other			sort of involvement in this hearing process	
	matters that are more vital to our time and			in a different role other than hearing	
	more vital to our resources, and so as it			officer, then we're entitled to full	
	exists here today, we've argued in length			discovery. We're entitled to be able to	
25	what we see as the most vital of our		25	find out what those communications are,	
		Page 74		Page	e 76
1	motions.		1	what the chief engineer has said, what the	
2	But the motion to compel with respect		2	chief engineer has analyzed. And so that's	
3	to DWR is fairly simple and fairly		3	our position with respect to the motion to	
4	straightforward. The whole idea was that		4	compel, quite simply put at this point.	
5	originally there was a number of documents		5	With respect to our motion to compel	
6	that weren't furnished to us, and really		6	against against the City, we included	
7	Mr. Oleen did a good job of communicating		7	with our motion to compel against the City	
8	with the District and a really good job of		8	a golden rule letter, and, of course, as	
9	trying to coordinate with the District to		9	you're familiar with the rules of civil	
	try and ensure that a lot of those		10	procedure we tried to follow those. We	
11	complaints were purged. And so really a			first sent a letter to the City addressing	
12	9			what our complaints were, and we didn't	
13	5			feel that those issues were resolved so we	
	respect to DWR admittedly have been			filed a motion to compel. And so our	
	resolved.			concerns are outlined in that golden rule	
16	And so I guess what's remaining really		16	letter.	

16 And so I guess what's remaining really

17 is we had asked to get a -- get more

18 information on communications that occurred

19 between the chief engineer and various

20 parties in this case. And as you heard

21 from Mr. Oleen that prior to becoming the

22 hearing officer, the chief engineer had

23 publicly touted this AMC proposal, had

24 indeed even submitted letters trying to

25 argue that the proposal of the City was

17 And some of the issues had to do with

18 the documents we got, they were sent to us

19 in what we con -- we did not consider an

20 organized fashion, and it appeared to us

21 that there were documents missing. But

22 really at the core of our motion to compel,

23 just to sum it up in a few sentences, is

24 the whole idea that when we sent out our

25 interrogatories and our requests for

Page 77 Page 79 1 admission, the City found, in our view, as 1 this motion to compel. I believe it was 2 Tom mentioned, a lot of really creative 2 maybe even attached as an exhibit. So I 3 ways to skirt answering our questions. 3 don't know what else to say other than DWR 4 And, you know, Tom and Lee have been 4 is not aware, to my knowledge, of any other 5 attorneys for a long time, and I bet they 5 ex parte communications that the chief 6 would be willing to stand up and tell you 6 engineer or DWR had with Wichita. So 7 that they've never seen, or rarely seen 7 that's all I can say about that. 8 more creative wordsmithing by a party to 8 We did work -- work through a good chunk 9 try and avoid answering a question. And 9 of our discovery disputes after the 10 District's first golden rule letter was 10 that was basically what our position was. 11 For example, we would ask a very 11 sent to DWR, we had a conference call, 12 straightforward question like is water 12 engaged in some more discovery, we produced 13 being directly diverted to the City, and we some documents that DWR thought likely were 14 would get some long objection as far as why 14 still privileged or protected but we 15 they couldn't answer that question. So if produced them anyways. 16 we had asked if the sky was blue, we would You know, I'm aware of the fact that 17 get an objection because we hadn't 17 anytime you assert a protection or a 18 specified if we were talking about the sky privilege, the other side can interpret 19 for Planet Earth or Planet Mars. So those 19 that as meaning that you have something 20 are the kinds of objections we got, and so that you really don't want them to see or 21 it's laid out in our motion to compel, and 21 that's helpful to their case. I really 22 we're simply asking that the City properly 22 don't think that's the case now, but we --23 answer our interrogatories and our we still have documents which we're still 24 motions -- and our requests for admissions. 24 asserting our privilege are protected. I 25 But really at this point, I think we 25 don't personally think that they are some Page 78 Page 80 1 sort of silver bullet, but I'm not going 1 know what the facts are, and I think we 2 know what the germane facts are as it 2 to -- I'm not going to waive 3 attorney-client privilege and other 3 relates to our motions here today. And 4 those are straightforward enough that we 4 protections just to aussage the District's 5 still feel that the hearing officer can 5 fears. 6 resolve those issues in our -- in our 6 I think that just because the chief 7 favor, that Madam Hearing Officer can 7 engineer at one point changed from being 8 the head of DWR to now being the ultimate 8 resolve those in our favor. But, yes, we 9 are asking that those motions to compel be arbiter of this administrative proceeding, 10 addressed as they're filed and be granted. I don't think that negates the privileged 11 So ... 11 nature of communications that he had with PRESIDING OFFICER: Okay. DWR, 12 his chief counsel at the time. And so, you 12 13 would you like to respond to the motion 13 know, if the District still feels like 14 directed towards you? 14 certain identified documents on our revised 15 MR. OLEEN: Again, Aaron Oleen with privilege log, if they truly have questions 16 the Kansas Department of Agriculture. It 16 as to the propriety of asserting privileges or protections with respect to those items, 17 sounds to me, then, from Mr. Stucky that 18 the real lingering issue that the District then we have them and you can conduct an 19 has is assurance that they have a list of in camera review as you deem appropriate, 20 identified communications that DWR, the but I believe that DWR has -- has gone out 21 chief engineer had with Wichita, if I 21 of their way and been reasonable in trying 22 understand Mr. Stucky correctly. And we 22 to provide responsive documents to the 23 did provide that as part of answering the 23 District. 24 District's written discovery, we provided a 24 The District, they waited two months to 25 list, it's referred to in our response to 25 file their motion to compel from the time

_	a the District with a detailed index of	and the state of t	

22 the District with a detailed index of

24 attorney-client reasons, the District

23 matters withheld for work product and

25 generally asserted stuff in this category

22 position is that when you're asking for

23 documents, you can provide a list all day

25 don't receive the documents and you don't

24 of what those documents are, but if you

Page 85 Page 87 1 get any kind of information on the -- any 1 not going to try and cause busywork for the 2 kind of information or a summary of those 2 City or Division of Water Resources. We --3 documents, it's absolutely worthless. And 3 our position is that that's never been our 4 so that's our position that, yes, we were 4 attempt. And with respect to what the City 5 given a list of the documents that exist, 5 said by the -- their position that we sent 6 but we were told that the documents were 6 our golden rule letter during a holiday, of 7 subject to work product or attorney-client 7 course they could have purged our concerns 8 privilege. 8 at any time. 9 And as we advanced with the law we 9 So in that regard, if it's appropriate, 10 cite in our motion, our position is 10 if you see it appropriate, if we could 11 straightforward that you can't go from 11 have, you know, maybe a week to try and 12 having these privileged communications on 12 outline what we see as the critical 13 one hand, then go to being a hearing 13 documents, because as I'm standing here 14 officer and publicly tout a particular 14 today, I would be prepared to just say we 15 proposal and have those work product and want an in camera review of all the 16 attorney-client privileges remain. You 16 documents but we would like -- I think it 17 can't be involved in working something up would be appropriate and fair to you for us 18 in anticipation of litigation while at the to get an opportunity to try and further 19 same time serving as a hearing officer. narrow that down and specify exactly which 20 So at the point that you serve as a documents they are just for clarification. 21 hearing officer, any kind of work product 21 So with your permission, we'd like a little 22 or attorney-client privileges in that 22 time to respond, and we can send that as an 23 regard are waived at that point. That's 23 e-mail to everybody involved. So ... 24 our position. So, yes, we're asking that PRESIDING OFFICER: Okay. 24 25 we be made aware of what the substance of 25 Mr. Oleen, you offered an in camera review, Page 86 Page 88 1 those documents were, not just what 1 I assume you are willing to participate in 2 documents existed but the substance of 2 what Mr. Stucky's describing? 3 those documents. That's our position. MR. OLEEN: Yes, Your Honor. 3 4 And we also would support, at the very PRESIDING OFFICER: Okay. 4 5 least, an in camera review of some of those MR. OLEEN: And logistically if it 6 documents to help understand if there are 6 would be appropriate, it sounds like 7 documents that we should be aware of to 7 Mr. Stucky is proposing that he send you a 8 list later of specific items for which he 8 help understand what analysis the chief 9 engineer did in this particular case. And 9 wants your in camera determination. I have 10 so that's -- that's our position, we're 10 a binder now of everything that we produced 11 asking for the substance of those documents 11 in its redacted form, also in its 12 and we think that those privileges that are 12 un-redacted form. I propose that I just 13 cited were waived, and that's our position. 13 hand you a copy of that binder now, then PRESIDING OFFICER: Are you 14 when Mr. Stucky sends you the list of the 14 15 items that he specifically wants reviewed. 15 requesting an in camera review of the 16 documents? 16 you can look at those specific items in the MR. STUCKY: Yes, we are. 17 17 binder. **PRESIDING OFFICER:** Do you have **PRESIDING OFFICER:** That sounds very 18 18 19 specific items on that list that you would 19 efficient, thank you. So you asked for one 20 like to be the subject of an in camera week to identify the documents, would that 21 review or everything on the list? 21 be -- you want to just -- next Tuesday, I 22 MR. STUCKY: If we may in that 22 don't know what the date of that is. Can 23 regard, Madam Hearing Officer, if -- if it 23 someone pull that up for me, what day is 24 would be appropriate, and, again, we don't 24 that exactly, a week from today? Is that 25 want to cause busywork for anybody, we're 25 the 4th, June 4? Thank you. Excuse me

F		Page 90			Page 92
	hearing officer, now you have to disclose		1	MR. STUCKY: Not not in our	
			_		

- 2 all communications with your attorney, for
- 3 example, about issues that arose before you
- 4 became the hearing officer.
- PRESIDING OFFICER: Okay, thank you.
- 6 Okay. And, Mr. Stucky, as to the City, do
- 7 I understand that you have the same concern
- 8 with them about releasing items that
- 9 they've determined were privileged that had
- 10 to do with potential communications with
- 11 the chief engineer?
- 12 MR. STUCKY: Yes, the answer to that
- 13 question is yes, in addition to not
- 14 answering our interrogatories or requests
- 15 for admissions, so yes.
- PRESIDING OFFICER: Well, taking 16
- 17 things one thing at a time, the -- I know
- 18 that the City at one time offered an
- 19 in camera review; is that right,
- 20 Mr. McLeod?
- MR. MCLEOD: We did and I will also 21
- 22 add that on the lengthy privilege log I do
- 23 not believe a single document withheld by
- 24 the City had anything to do with any
- 25 contacts with the chief engineer. I

- 2 motion. I think through e-mails and
- 3 through our golden rule letter, but I guess
- 4 we'd ask for the same opportunity. This in
- 5 camera review concept has been given, we'd
- 6 ask that we have until June 7th to outline
- 7 and identify the specific documents that we
- 8 think should be reviewed or -- in an in
- 9 camera review. So we'd ask for that same
- 10 opportunity as it relates to the City. And
- 11 then I can answer your question in greater
- 12 detail at that point.
- PRESIDING OFFICER: And, Mr. McLeod, 13
- 14 would you have any objection to that
- 15 process?
- MR. MCLEOD: I will say just this, 16
- 17 Your Honor, I do because of the -- of the
- 18 absence of parity in the discovery conduct
- 19 in this case, at least we furnished a
- privilege log, as did DWR; whereas, in
- 21 responding to discovery requests addressed
- 22 to them, the District just made general
- 23 assertions of attorney-client privilege and
- 24 work product. I don't believe that they
- 25 even specifically identified the things

Page 93 Page 95 1 they were withholding. 1 confused by how things are organized. MR. STUCKY: I'm going to object PRESIDING OFFICER: Okay. So we'll 3 just for the record as far as the relevance 3 do some logistics later. 4 of this discussion and these comments. 4 Mr. Stucky, finishing up your concerns 5 with the City's answers to interrogatories, 5 These aren't motions that are before Madam 6 Hearing Officer here today, and so they're 6 what specifically are you asking me to do? 7 not fodder for any consideration or fodder MR. STUCKY: Direct the City to 8 for any comments by Mr. McLeod. So I just 8 answer our questions and not hide behind 9 want to make an objection as to relevance 9 objections as to the wording. And I think 10 with respect to those comments. 10 by that same deadline, and it's frankly 11 MR. MCLEOD: We didn't file a motion 11 more work for the District and more work 12 to compel, Your Honor, but that doesn't 12 for legal counsel for the District and so I 13 mean that there should be an enforced hesitate to offer this, but I think it's 14 non-parity of discovery and a party 14 appropriate here, by that June 7th date, 15 bringing motions to compel that has let us outline what we think were the most 16 disregarded its own obligations. For that egregious examples of where the City simply 17 reason, I am somewhat chapped by the ignored our question or tried to somehow 18 request and regard it as being just a find a reason not to answer our question 19 continuation of the gamesmanship. But as 19 based on some technicality on one of the 20 far as the in camera review, whatever you words used as far as the wordsmithing goes. 21 would like for in camera review purposes, 21 So we'd ask that we be given until 22 we will send. I just, I comment as to the 22 June 7th, and we'll outline what we see as 23 absence of parity in the discovery 23 the key ones that we feel should -- you 24 should direct the City to answer and why, 24 processes so enforced. 25 PRESIDING OFFICER: Okay. Well, it 25 we'll explain that as well by the June 7th Page 94 Page 96 1 seems reasonable to me that the District 1 date. And then you can make a decision 2 have until June 7 to identify any documents 2 on whether or not you -- you want to direct 3 the City has identified as privileged that 3 the City to answer them. So that's what 4 the District has reason to believe are not. 4 I'd propose. 5 And Lassume Mr. McLeod does not have a **PRESIDING OFFICER:** So let me think 6 copy of all of those documents with him as 6 about that. Response from the City? 7 Mr. Oleen does, so at that point, then, MR. MCLEOD: I think that Mr. Stucky 8 there would be communication through me to already admitted during his initial 9 Mr. McLeod to see copies of the items that presentation that they have the information 10 you identify. And I will take a few notes, that they need, so this is a pointless 11 bear with me. 11 exercise, the City answered their 12 And, Mr. Stucky, I'm assuming that the 12 questions, they didn't like the answers. 13 items that you identify you will also PRESIDING OFFICER: Now, Mr. Stucky, 13 14 identify why you have chosen each of them? 14 the subset of questions which you're MR. STUCKY: Yes, Your Honor. offering to provide me comes from the most 15 PRESIDING OFFICER: Thank you. 16 recent set of interrogatories; is that 16 17 Mr. Oleen. 17 correct? MR. OLEEN: Officer Owen. I would MR. STUCKY: Yes, and requests for 18 18 19 like to explain to you how our binder 19 admission. 20 works. In my opinion, it's not something 20 **PRESIDING OFFICER:** And requests for 21 that needs to be on the record; in my 21 admission, because I believe there have 22 opinion, it's something that could be 22 been more than one set of those that have

23 explained to you, with the District's

25 have that opportunity so you're not

24 counsel, afterwards; but I just wanted to

23 been propounded.

MR. STUCKY: Correct, we tried to

25 pay very, very -- instead of initially

In t	the Matter of the City of Wichita's Phase II Aqui	ifer			al Arguments May 28, 2019
		Page 97			Page 99
1	filing we filed a set of interrogatories		1	response is relatively straightforward. As	i
2	and requests for admissions initially, and		2	we point out in our response, the Kansas	
3	instead of filing a motion to compel and go		3	Administrative Procedure Act again gove	rns,
4	through that process, what we simply		4	and so as a hearing officer, you have	
5	decided to do is file a second set of		5	greater flexibility to allow this type of	
6	interrogatories and requests for admissions		6	testimony than it would be if we were	
7	where we tried very, very hard to try and		7	before a jury. So that's that's point	
8	clarify our questions and I guess close any		8	number one, quite straightforward in that	
9	kind of loopholes that the City was		9	regard.	
10	complaining about in our language. And so,		10	So what the City is trying to do is	
11	yes, it'll be the second set that we sent		11	they're trying to exclude some highly	
12	out.		12	qualified experts in the form of David Pop	e
13	PRESIDING OFFICER: Okay. So I		13	and Tim Boese. And the City does cite,	
14	would expect I'll set the same deadline		14	which what I will tell you is a relatively	
15	of June 7 for the District to provide those		15	general rule, that experts generally can't	
16	questions to me with an explanation of why		16	testify strictly on issues of law.	
17	you believe the existing answers are		17	Now, the reason why our experts can	
18	deficient, okay? I would like you to		18	testify in this case, in addition to what I	
19	provide the same thing to the City so that		19	just raised about the Administrative	
20	they have an opportunity to respond on the		20	Procedures Act, is the fact that an expert	
21	same day. I mean, you don't have to		21	can testify on mixed questions of law and	
22	respond the same day; I would like to give		22	fact. And so in other words, if a	
23	you a week to respond to that, so that		23	discussion of the law is necessary to help)
24	would be by June 14.		24	explain what the fact is or how the fact	
25	Okay. Any reason why we do not move on		25	applies, an expert can discuss the	
		Page 98			Page 100
1	to motions to exclude? No? Okay. The		1	discuss the law. And that's one general	
	City has filed a motion to exclude the			exception and that's black letter law that	

- 2 City has filed a motion to exclude the
- 3 expert reports, within quotes, of Carl
- 4 Nuzman, Tim Boese, and David Pope. Would
- 5 the City care to present that?
- MR. MCLEOD: Very briefly, Your
- 7 Honor. It's quite simple really, there are
- 8 matters that should be arguments of
- 9 counsel, other matters that are fact that
- 10 should be testimony by witnesses. It is, I
- 11 believe, recognized as a near universal
- 12 rule that you don't put experts on the
- 13 stand to testify to courts or hearing
- 14 officers about what the law is. These
- 15 three expert reports are replete with legal
- 16 conclusions of the witnesses who are
- 17 non-attorneys telling the hearing officer
- 18 their views of what is legal and illegal.
- 19 I can't imagine how that could be helpful,
- 20 and generally courts and agencies don't
- 21 permit that, and that's the basis of the
- 22 City's motion.
- PRESIDING OFFICER: Thank you. 23
- 24 District's response to that?
- MR. STUCKY: Thank you. Our 25

- 2 exception, and that's black letter law that
- 3 we cite in our response.
- 4 And also we cite law that says that
- 5 experts can testify on the law if it's
- 6 helpful, and we highlight why it's helpful
- 7 in this particular case. And the reason
- 8 for that is that agency heads do comment on
- 9 the law every day in their jobs. And
- 10 agencies are responsible for promulgating
- 11 the laws, and as you know, it's a
- 12 long-standing rule in law in the United
- 13 States that agencies are afforded deference
- 14 as far as their recommendations go with
- 15 respect to the law.
- 16 And so because of that, what we have
- 17 here is two -- either a former agency head
- 18 or a current head of an agency that wants
- 19 to discuss the facts as it relates to the
- 20 law. And so we think that they should be 21 given some sort of special deference based
- 22 on those reasons that we cite pursuant to
- 23 the fact that they were or are current
- 24 agency heads, and we cite law that supports
- 25 our argument in that regard.

Page 103 Page 101 1 Now, both David Pope and Tim Boese are 1 And part of the concerns that were 2 both highly credentialed individuals, and 2 identified by the City have to do with 3 they both helped develop the regulations 3 what's prejudicial to a jury. Of course, 4 that are at issue in this particular case, 4 you're an accomplished legal scholar 5 they both helped develop the current ASR 5 yourself as the hearing officer, so you can 6 permit conditions, they both helped develop 6 decide what's helpful. If you want to 7 the memorandums of understanding that are 7 disregard something that Tim Boese says or 8 something that David Pope says, you're free 8 at issue. And, in fact, David Pope, of 9 course, is retired as the head of the 9 to do that, and so there -- we don't need 10 Division of Water Resources, but both of to have a gatekeeper function and decide 11 them, and Tim Boese currently, interpreted what's going to be prejudicial to a jury 12 the law every day in their jobs and tried 12 because we're not talking about a jury 13 to explain what was within the parameters 13 trial here. 14 of the law as it related to the facts 14 Additionally, and this is quite 15 before them. So that's something that significant, the Division of Water 16 they're charged with doing every day and Resources opened the door to both Tim Boese 17 that's the very nature of their job, the and David Pope testifying on these issues. 18 fundamental nature of their job as agency And Mr. Oleen highlighted the fact that --19 heads, and so that's why they should be 19 that the current chief engineer submitted 20 given special deference in this case. letters, that Mr. Barfield submitted 21 And Tim Boese has been involved in this letters saying that what the City is trying 22 ASR project since day one, and, you know, 22 to do is indeed legal. Well, we cited law 23 he's been with the District since the early in our motion that says that this opens the 24 1990s, and so he is intimately acquainted. 24 door for us to now be able to rebut that 25 And I think -- I would -- I would be 25 position and argue this through our Page 102 Page 104 1 surprised if anyone in this room would be 1 experts, that essentially the Division of 2 willing to stand up and say that they've 2 Water Resources has opened the door to this 3 had more involvement in this whole project 3 testimony. 4 since its inception than Tim Boese has. I 4 Additionally, we cite law that says that 5 mean, that would really surprise me. 5 testimony on the law can be used to help 6 And, of course, everyone knows David 6 understand background facts, and, again, 7 Pope and his storied career as an engineer 7 our experts helped to develop these laws, 8 they understand the legislative history, 8 at various different jobs before he became 9 the chief engineer of the Division of Water 9 and that's exactly the kind of fodder that 10 Resources; obviously his reputation speaks 10 should be allowed in this kind of 11 for itself with his storied career. 11 testimony. We cited some similar 12 And so we're just asking that two of the 12 situations, some analogous cases, some case 13 most highly qualified individuals that 13 law that supports our position, for 14 interpret facts and help to define what 14 example, an attorney testifying on what 15 fits in the parameters of the law be constitutes tax evasion under the law, that 16 allowed to testify. And I think that they was allowed; or an example of an attorney 17 are two of the most highly qualified testifying on whether or not a certain 17 18 individuals, and I would submit that two of prospectus fit within the ambit of 18 19 the other most highly qualified individuals 19 securities law, that's allowed because it 20 to speak on the law are Lee Rolfs and Tom was helpful, it was a highly specific area 21 Adrian. And they're also in this room, of 21 of law and it was allowed. And so for all 22 course, but we're asking that they be 22 those reasons, we think it's certainly 23 allowed to testify, we think it is helpful 23 allowable in this particular case. 24 and reliable. They're experts here at PRESIDING OFFICER: Thank you. 25 applying the facts to the law. 25 Would the Intervenors care to respond

In	the Matter of the City of Wichita's Phase II Aquifer			rguments y 28, 2019
	Page 105			Page 107
1	regarding this motion?	1	motion to exclude his expert testimony.	
2	MS. WENDLING: Yes, thank you. The	2	PRESIDING OFFICER: Thank you. Did	
3	Intervenors, again, largely rely on the	3	the Division want to respond to that	
4	great work done by the District and that	4	motion?	
5	our arguments are very similar in that both	5	MR. OLEEN: Real briefly, Your	
6	the prehearing conference orders and KAPA	6	Honor. Generally, DWR is in favor of more	
7	allow flexibility to the hearing	7	testimony, more disclosure, we believe	
8	presiding officer, hearing officer to not	8	that's part of the purpose of the	
9	be bound by the technical rules of evidence	9	evidentiary hearing that we want to have is	
10	and allow experts to testify on questions	10	to hear different points of view on the	
11	of law if that is found to be helpful.	11	City's proposal.	
12	The Kansas Supreme Court has found that	12	Because you have already been presented	
13	witnesses routinely testify as to factual	13	with these legal interpretations via the	
14	matters that juries are to determine, and	14	District's and the Intervenors' vehicles of	
15	that allows embracing the ultimate	15	a summary judgment motion and a motion to	
16	decisions to be decided, and that's in	16	dismiss, I do not think it would be	
17	State versus Ingham.	17	appropriate if and when we get to a hearing	
18	Here, while Mr. Nuzman does have one	18	when they bring out these witnesses to	
19	comment regarding the law, the bulk of his	19	repeat those same legal arguments to you,	
20	testimony is relying on his specialty	20	again, legal arguments, district court	
	expertise in this area, specifically with	21	action under KJRA. But to the extent that	
22	2 mod flow; a review of his expert report is	22	anybody else wants to have meaningful input	İ
23	very focused on that technical analysis,		on the material aspects of the City's	
24	and that is why we seek to have him	24	proposal, it doesn't amount to the legality	

Page 106 Page 108

1 expert report to be very helpful as someone 2 new to the area of water law, and it is

3 completely within the hearing officer's

4 discretion if you do find such testimony to

5 be helpful to admit that testimony.

25 testify. I personally have found his

6 As the District has already said, the

7 City relies on Glassman versus Costello,

8 which is differentiated from this case in

9 that you're discussing the prejudicial

10 value of that testimony in front of the

11 jury rather than a hearing officer such as

12 yourself.

PRESIDING OFFICER: And, excuse me, 13

14 whose testimony were you referring to

15 regarding mod flow?

MS. WENDLING: Carl Nuzman. 16

PRESIDING OFFICER: Nuzman. 17

MS. WENDLING: Oh, sorry. 18

19 PRESIDING OFFICER: Go ahead.

20 MS. WENDLING: Yes, Carl Nuzman is

21 the Intervenor expert that has been

22 objected to. So we find that Mr. Nuzman is

23 sharing well-informed and reliable

24 information that will be helpful and should

25 be allowed and ask that you deny the City's

1 think those legal arguments are appropriate

2 in the administrative hearing.

25 of whether it can exist or not, I don't

PRESIDING OFFICER: Thank you. Next

4 we come to the District's motion in limine

5 to bar agency recommendations, would you

6 like to present that now?

MR. STUCKY: Yeah, just very briefly

8 I'll sum up our position. What our

9 position is in that regard is that pursuant

10 to the Kansas Administrative Procedure Act

11 every hearing officer can set different

12 rules, and I could quote the Administrative

13 Procedures Act, can also determine to what

14 extent the administrative procedures should

15 follow the rules of evidence or should

follow the rules of civil procedure, every

17 hearing officer has latitude in that

18 regard.

19 And what our position is is that the

20 Division of Water -- that there was an

21 expert deadline set in this particular

22 case, the Division of Water Resources chose

23 not to file any kind of expert report, not

24 advance any kind of -- chose to say that we

25 don't have any expert testimony, we don't

Page 109 Page 111 1 have anyone that will testify as an expert 1 glaring to me when -- when the District is 2 in this case, so the Division of Water 2 defending a motion in limine from the City, 3 Resources made that decision, and, in fact, 3 they say, Madam Officer, we don't need to 4 Mr. Oleen, I think, even sent an e-mail 4 follow technical rules under civil 5 saying that we're -- that we're not going 5 procedure, you have broader discretion 6 to submit any expert report, so that was a 6 under KAPA and under the reg 5-14-3a here 7 conscious decision made by the Division of 7 today, but then when they're trying to 8 argue for their motion in limine against 8 Water Resources. 9 And we took a deposition in this case of 9 DWR, now they're citing 60-226, they're 10 citing 60-426, they're all about 10 one of the employees of the Division of 11 Water Resources, and it's our position that 11 hyper-technical rules of civil procedure. 12 the Division of Water Resources hasn't 12 To me that's talking out of both sides of 13 conducted any independent technical 13 their mouth a little bit. 14 evaluation of either the City's proposal or 14 But ultimately, look, you do, as 15 the City's model, that there's been no presiding officer, have the discretion to 16 detailed independent analysis or -- or be more liberal with what are otherwise 17 examination of this modeling or the 17 technical rules of evidence and 18 proposal, that basically the City talked admissibility under civil procedure. In 19 through their proposal with the Division of fact, the regulation that we're also 20 Water Resources and the Division of Water following in addition to KAPA, 5-14-3a, it 21 Resources more or less said that sounds provides that DWR is a formal party to 22 good. 22 these proceedings, as DWR should be because 23 that's why the citizens of the State pay 23 And so our position is that deadlines 24 are set for a reason, and if you fail to 24 DWR officials. Part of their job is to 25 abide by a deadline, it should have some 25 consider requests from applicants and make Page 110 Page 112 1 decisions or give opinions about that, and 1 meaning if they're set. And so as a 2 result, it's our position that the Division 2 the absurdity that would result if there's 3 of Water Resources can't offer testimony or 3 an issue about water rights that DWR is 4 opinions or recommendations as to the 4 prevented from commenting on makes no sense 5 validity of the City's proposal at this 5 to me. 6 juncture or that would render those 6 And I know that Mr. Stucky said that in 7 an e-mail I said that DWR would not be 7 deadlines meaningless. And, indeed, we 8 also argue that because they didn't conduct 8 rendering any expert opinions, I went back 9 an independent analysis of the City's 9 and tried to find this supposed e-mail. I 10 proposal or model that under the Daubert 10 did find an e-mail where I said that DWR 11 test of excluding expert witnesses they 11 does not intend to submit any expert 12 also don't have the ability to testify in 12 reports, and we did not submit a technical 13 that regard. 13 expert report by the deadline. I didn't 14 So it's fine if the Division of Water 14 deem that to be applicable to DWR by virtue 15 of the fact that we're DWR officials and 15 Resources wants to comment on the 16 background of this case or give some 16 this is part of our job. 17 observations on -- on some of the facts, To the extent that I was wrong, I don't 18 believe there is -- there is any credible 18 but they can't make recommendations or 19 cross into the territory of rendering 19 harm to the District because they have 20 opinions at this hearing. That's our learned through discovery what DWR's 21 position on that issue. position is, and by the deadline all PRESIDING OFFICER: Thank you. And 22 parties in this case had filed prehearing 22 23 the Division, your reply? 23 briefs, back before this matter was MR. OLEEN: Madam Presiding Officer, 24 delegated to you. And so DWR filed what I 25 I have to point out the fact that it's 25 believe was entitled DWR's Prehearing Brief

Page 115

Page 1	1	3
--------	---	---

- 1 and Written Testimony, and a DWR official
- 2 signed that document. And so to the extent
- 3 that the District -- I don't think --
- 4 bottom line, they can't claim that they
- 5 don't know what DWR's official opinions are
- 6 going to be.
- 7 And I think we again have to remember
- 8 what the District doesn't like to hear
- 9 versus what they hear. Just because they
- 10 don't like an opinion or an action that DWR
- 11 took doesn't mean that that can't be DWR's
- 12 opinion. They're trying to exclude
- 13 opinions that they disagree with or
- 14 opinions that in their belief are not
- 15 sufficiently based on adequate independent
- 16 investigation they said. But that's not
- 17 for them to decide. I believe that's for
- 18 you to decide.
- 19 Actually, it's -- more importantly, it's
- 20 for the ultimate arbiter, the chief
- 21 engineer to decide, he knows what his
- 22 staff -- he knows their qualifications, he
- 23 knows if some DWR official is going to get
- 24 on the stand at the public hearing and make
- 25 comments about this or that, he's going to

- 1 what I hear you saying that DWR intends to
- 2 submit recommendations on the ultimate
- 3 decision of approval or not?
- 4 MR. OLEEN: On some issues, yes. It
- 5 may not be -- it may not be a green light
- 6 or red light, but it may be -- and it will
- 7 be an official recommendation as to certain
- 8 sub-issues. And -- and that is evidenced
- 9 in the prehearing brief that was filed.
- 10 Part -- part of it is that DWR views this
- 11 as a fact-finding process still --
- 12 PRESIDING OFFICER: Uh-huh.
- 13 MR. OLEEN: -- views this hearing
- 14 that we want to hold as potentially
- 15 receiving new information. The District
- 16 wants to treat this as everybody's coming
- 17 to the battle knowing the positions that
- 18 they're going to take. And while we think
- 19 we know a lot of the positions, DWR may
- 20 hear something from some member of the
- 21 public or even the District that causes DWR
- 22 to have a different opinion about this or
- 23 that issue or this or that recommendation.
- 24 And so that's why in DWR's prehearing
- 25 brief and written testimony we say, you

Page 114

Page 116

- 1 know because he oversees these people, he's
- 2 going to know if they're stepping out of
- 3 their bounds of knowledge.
- 4 In summary, I just think it would be an
- 5 absurd result to not let DWR have any input
- 6 in this matter, especially when the
- 7 regulation 5-14-3a says DWR is a formal
- 8 party, when you have discretion to be
- 9 lenient on the technical rules of evidence,
- 10 and when they have received DWR's official
- 11 opinions through discovery and our
- 12 prehearing brief and DWR written testimony.
- 13 PRESIDING OFFICER: Okay. Question.
- 14 There seem to be a distinction between fact
- 15 testimony and recommendations, and correct
- 16 me if I'm wrong, but it seemed to be that
- 17 the District was fine with DWR employees
- 18 testifying perhaps what happened, who had
- 19 it, what they did, you know, that's the
- 20 kind of thing I'm -- is that right,
- 21 Mr. Stucky?
- 22 MR. STUCKY: That is correct.
- 23 PRESIDING OFFICER: That their
- 24 concern is recommendations on the outcome
- 25 of approving the proposal or not, so is

- 1 know, these are our initial opinions based
- 2 on what DWR has done so far, but we reserve
- 3 the right and expect to provide follow-up
- 4 comment, recommendations to the presiding
- 5 officer if DWR learns of information
- 6 through the course of this hearing that we
- 7 didn't know about.
- 8 PRESIDING OFFICER: Okay. Thank
- 9 you.
- 10 MR. STUCKY: Can I, while you're
- 11 writing, just a very, very brief response?
- 12 A lot of our concerns here that we've cited
- 13 have to do with what's fair notice, what
- 14 allows us a proper opportunity to prepare?
- 15 And some of our original due process
- 15 And some of our original due proces
- 16 considerations had to do with the fact that
- 17 the City, with lots of independent
- 18 consultants and a very experienced
- 19 engineering firm, worked on this proposal
- 20 for four years, and then suddenly it falls
- 21 in our lap and we're here at a hearing and
- 22 we're trying to prepare.
- 23 And the same is true with deadlines in
- 24 this case. The whole idea of these
- 25 deadlines and indeed the whole reason the

Page 117 Page 119 1 new rules of civil procedure were passed, 1 feels it needs to respond to, I believe 2 and Tom can talk about this, was to avoid 2 they would be able to respond to it during 3 surprise, to avoid these -- these surprises 3 that written comment period. 4 occurring at an actual hearing or trial. PRESIDING OFFICER: Do the 5 And so if the Division of Water 5 Intervenors have a response? 6 Resources has recommendations or has **MS. WENDLING:** No, we do not. 7 positions they're going to make, we want to PRESIDING OFFICER: Okay. And now 8 know what those are so we can adequately 8 we move to the District's motion in limine 9 prepare for this hearing. And I'm looking 9 to exclude expert testimony of the City. 10 at the brief that was submitted by the MR. STUCKY: And just to clarify 11 Division of Water Resources, and it's 11 something I said, there are five conditions 12 really not abundantly clear to me what 12 the Division of Water Resources asks to 13 actual recommendations they're going to 13 impose on the City's request if it's 14 make with respect to that proposal in 14 approved, and I guess we're fine with the 15 scanning over that brief again. So that's 15 Division of Water Resources recommending 16 our position. 16 those five conditions. If that's the whole PRESIDING OFFICER: Does the City 17 basis of their recommendations, those seem 17 18 have a response to this motion? appropriate. MR. MCLEOD: We do. I harken back 19 But finally moving to our final issue at 19 20 to the -- to the discussion on the prior hand today, which is the District's motion 21 motion about courting some deference to the in limine, I'm going to, I think, defer my 22 opinions of technically expert staff, and 22 time here to the Intervenors on this, the 23 although the Kansas courts have actually 23 Intervenors also briefed this issue. 24 some years ago rejected that doctrine for 24 But just in 30 seconds or less, our 25 judicial review, what's known as operative 25 position is that under the Daubert standard Page 118 Page 120 1 construction, in this instance it makes 1 of expert testimony, the experts of the 2 total sense that the DWR staff be able to 2 City don't explain their rationale or 3 make technical recommendations after the 3 conclusions, they just give us some bullet 4 hearing record has been put before them and 4 points, and so it's really hard for us to 5 they're able to look at that whole body of 5 determine exactly how they arrived at their 6 information and assess it using their 6 conclusions. And for that reason, we find 7 that it's not helpful or reliable. 7 technical training and expertise. 8 That, to me, is fundamentally different 8 So our position is that, you know, in 9 than the issue of whether they testify and 9 distinguishing the motions, the motion in 10 provide expert opinions in the hearing 10 limine of the City just seeks to exclude 11 itself. It's simply DWR staff doing their 11 the testimony of our experts in general 12 job. And for a litigant to file a motion 12 because -- and try and bar us from 13 saying prevent these folks from giving 13 testifying because we gave too detailed of 14 recommendations when they have seen the 14 an analysis, too detailed of an opinion. 15 material in the hearing record strikes me They're trying to basically stop us because 16 as not entirely rational. It is their job, 16 our experts wanted to give too detailed of 17 it's what they are tasked to do, and they an analysis as to the ins and outs of the 18 should be able to do it. 18 City's proposal. 19 And there is a period set in the former 19 Our position with respect to the City 20 scheduling orders, at least, following the 20 and the Division of Water Resources is that 21 hearing, public hearing procedure where the 21 we should have been given more information 22 record would still be open for written 22 to help us prepare for this hearing, and 23 submissions from essentially anyone and 23 that's the distinction in a nutshell 24 everyone. So if there is something in the 24 between the two sets of motions here. 25 staff recommendations that the District PRESIDING OFFICER: The City like to 25

	the Hauter of the Only of Wieman & Finance in Figure		M	ay 28, 2019
	Page 121			Page 123
1	respond?	1	conclusion that they need 120,000	
2	MR. MCLEOD: Surely. First, the	2	acre-feet? Similarly, when the model	
3	notion that the City objected to the legal	3	documents say a grid with smaller cells is	
4	opinion giving of the District's experts	4	necessary to reach the detailed analysis of	
5	as being too detailed, that was not it at	5	impairment, the City concludes no	
6	all. They're testifying to law, and that's	6	impairment will happen. So there are	
7	the basis of the City's objection there.	7	significant gaps that and that lack of	
8	As far as the City expert reports, there	8	detail, relying exclusively on the	
9	was no particular detail set forth in the	9	proposal, does not yield helpful or	
10	prehearing order for expert reports or what	10	reliable expert witness. As the City has	
11	to do with them. The City had, of course,	11	said in their responses, they haven't	
12	submitted its proposal, which is	12	contemplated the withdrawal of the AMC	
13	extraordinarily lengthy and detailed. The	13	credits; therefore, how can they testify as	
14	format of the City's expert disclosures	14	an expert to the impact of such credits?	
15	basically was to show which of the	15	We find essentially that the City expert	
16	witnesses would testify to which of the	16	reports are mere bullet points repeating	
17	' '	17		
18	City's written discovery responses as well	18	explanation for those opinions and	
19	and was designed to make those disclosures	19	therefore are unhelpful, and we ask that	
20	so that the District could make an informed	20	they be excluded.	
21	decision whether or not to depose	21	PRESIDING OFFICER: Thank you. Doe	S
	particular witnesses.	22	the Division have a response to this	
	So those documents are not really	23	motion?	
24	designed to be exhibits, to be in and of	24	MR. OLEEN: No, Madam Officer.	

Page 122 Page 124

- 1 but to give the District a notion of the 2 substance to which those witnesses would
- 3 testify so that they could make a decision

25 themselves helpful to the hearing process

- 4 whether or not to take depositions of any
- 5 of them.
- PRESIDING OFFICER: Do the
- 7 Intervenors have a response to this?
- MS. WENDLING: Yes. Intervenors
- 9 find that the City experts, based on
- 10 information in the expert reports, do not
- 11 meet the standards of being helpful and
- 12 reliable. The information provided fails
- 13 to explain how such opinions were reached
- 14 and merely direct you back to the proposal,
- 15 similar to many of the comments made by the
- 16 City throughout this process. This falls
- 17 short of achieving the Daubert standard as
- 18 discussed by the District because it does
- 19 not explain the rationale of reaching
- 20 conclusions. They are merely conclusions
- 21 or actually bullet points from the
- 22 proposal.
- 23 Examples such as if the propose -- the
- 24 model identifies a shortfall of 43,850
- 25 acre-feet, what is their rationale or

MR. OLEEN: I should say other than

PRESIDING OFFICER: Okay.

- 2 just again, DWR is in favor of more
- 3 information as a result of this hearing
- 4 process because, again, DWR views this as
- 5 still part of an ongoing fact-finding
- 6 process.

- **PRESIDING OFFICER:** I have a couple
- 8 of questions, and these can be answered by
- 9 any of you that know. To my knowledge, the
- 10 only deposition that has been taken in this
- 11 case was Lane Letourneau; is that correct?
- MR. MCLEOD: Yes. 12
- MR. STUCKY: Yes. 13
- PRESIDING OFFICER: Okay, thank you.
- 15 And the experts that are indicated in these
- 16 various filings, disclosures, reports, will
- 17 they be personally testifying at the
- 18 hearing barring some unforeseen casualty?
- 19 MR. MCLEOD: Yes.
- 20 PRESIDING OFFICER: You anticipate
- 21 the City's experts being present?
- MR. MCLEOD: Some of them may not be
- 23 present, but if they aren't, their -- their
- 24 expert report is not going to be offered in
- 25 lieu of what they would testify to if

Page 125 Page 127 1 present. 1 now going to still be with the chief PRESIDING OFFICER: And DWR, same? 2 engineer if he's not going to be advising 2 MR. OLEEN: Yes. At this time, Lane 3 you? I think that's what you intend but it 3 4 Letourneau, whose deposition was taken and 4 can get confusing. 5 who also signed DWR's prehearing brief and PRESIDING OFFICER: Well, I'm not 6 written testimony, it's anticipated he will 6 sure that's what I was trying to say. I 7 really wasn't speaking to that. And I'll 7 testify. 8 reiterate that on the record because PRESIDING OFFICER: And the 8 9 District? 9 earlier I mentioned it off the record that MR. STUCKY: Yes, all the experts 10 when I was designated hearing officer, 10 11 that we've identified will speak at the 11 presiding officer for this case, my 12 hearing. 12 delegation of authority included the **PRESIDING OFFICER:** And Intervenors? 13 ability to access communications with 13 MS. WENDLING: We are not certain 14 Mr. Beightel for technical assistance, this 14 15 whether Mr. Nuzman will be available on the 15 is a highly technical case. dates and have not concluded whether or not 16 And I have since concluded that I would to have him testify. 17 feel more comfortable and secure my 17 PRESIDING OFFICER: And then the impartiality more -- more strongly if I do 18 19 final motion was to Intervenors' motion in 19 not rely on Mr. Beightel's advice. 20 support, and it seems to me that you've 20 However, I do not see a problem 21 presented --21 communicating with him or with the chief MS. WENDLING: I believe everything 22 engineer's office if I need to access, you 22 23 has been presented and I have nothing 23 know, plans, logistics, those type of 24 things, which the rest of you were probably 24 further. 25 PRESIDING OFFICER: Thank you. So 25 privy to anyway. Page 126 Page 128 1 So my concern only addressed the fact 1 it would appear to me that we've addressed 2 all eight of the motions, is there anything 2 that I do not want to have communications 3 anyone would like to add, have I missed 3 with someone who appears to be a potential 4 something, is there anything we need to 4 witness, has been involved in some of the 5 further address before we conclude this 5 communications between the parties, and I'm 6 hearing? Mr. Oleen. 6 just trying to keep it very clean from my 7 side. So his involvement from DWR's view MR. OLEEN: I should have brought 8 is within DWR's decision to make. If there 8 this up, I think, back when we were talking 9 about Chris Beightel and his role. 9 is a wall between the chief engineer and PRESIDING OFFICER: Uh-huh. 10 his staff, if there's a wall between 10 11 various attorneys into what they can MR. OLEEN: I guess I would just 12 like some clarification whenever it's 12 discuss, as there should be, that is up for 13 ultimately obtained, whether from you or 13 DWR to decide how that should go. 14 the chief engineer, if Mr. Beightel, if MR. OLEEN: Okay. DWR did not 14 15 he's not going to be advising the presiding 15 identify Mr. Beightel as a witness on our 16 officer as a technical adviser, if he's now witness and exhibit list. I'm not saying 17 going to be advising the chief engineer 17 that assuages your concerns in not 18 when the chief engineer considers your 18 consulting with him but --19 recommendation? PRESIDING OFFICER: And I don't know 19 20 So, you know, DWR has been respecting a where I saw that, and I -- maybe I was --21 wall from the moment that the chief 21 you know, maybe that's something that I 22 engineer became the presiding officer, and 22 sort of put together in my head that wasn't 23 we have been treating Mr. Beightel as in 23 actually there, but -- but be that as it

24 the chief engineer's camp, and I just -- I

25 think I want some clarification that he's

24 may, I would just simply feel more

25 comfortable remaining completely removed

Page 131

Page 129 1 from anyone at DWR regarding the merits of 2 the outcome of this particular case. And 3 that that's what I was addressing because 4 it's in the record that I had access to 5 him, and I just wanted everyone involved to 6 know that I don't intend to seek his advice 7 or counsel or technical input on my role. 8 Does that help you? MR. OLEEN: I think so. Previously 10 before you became involved, we were told 11 that the chief engineer -- that 12 Mr. Beightel was going to be in the chief 13 engineer's camp. And --PRESIDING OFFICER: Uh-huh. 14 15 MR. OLEEN: -- and DWR will continue 16 to assume that's the case unless the chief 17 engineer tells us otherwise, which I don't 18 anticipate that he will. I just --PRESIDING OFFICER: I'm not 19 20 suggesting that you change that. 21 MR. OLEEN: Okay. I'll leave that 22 alone. PRESIDING OFFICER: I'm leaving that 24 up to you. 25 MR. OLEEN: Okay.

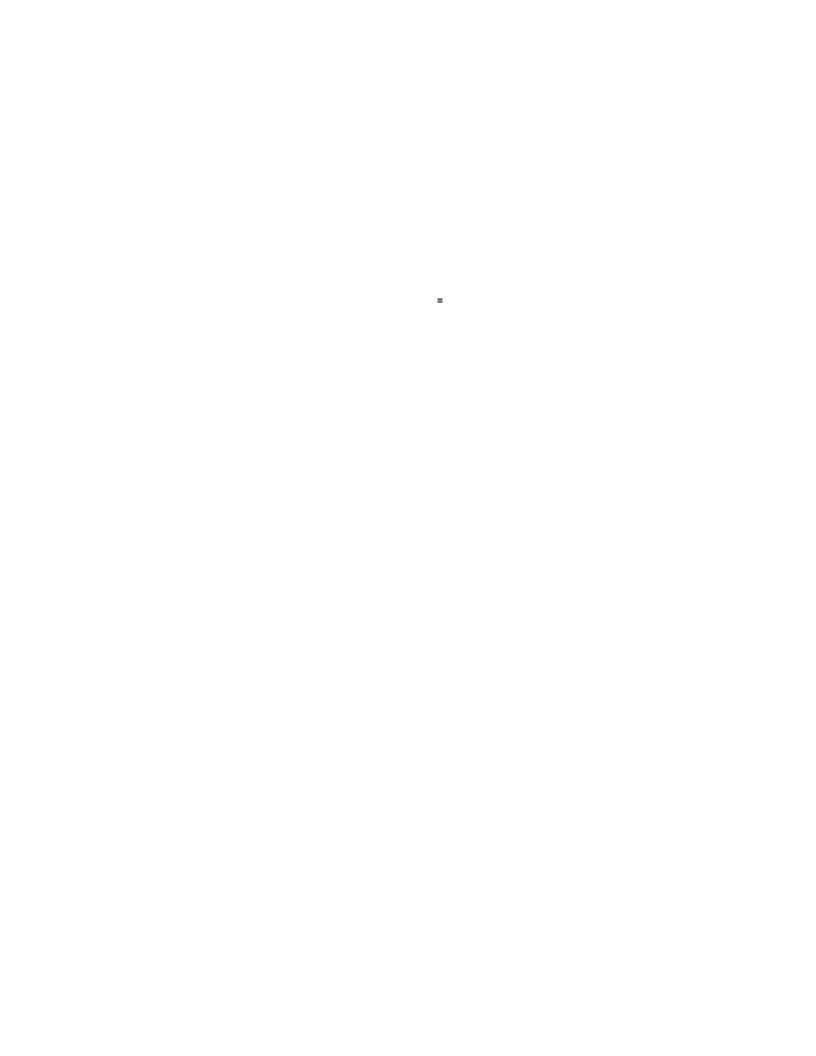

2 OF KANSAS ss: 3 ICK COUNTY I, Nancy L. Rambo, a Certified Shorthand 5 ter, within and for the State of Kansas, do 6 y certify that the foregoing is a true and 7 ct transcript of the proceedings had at the 8 and place hereinbefore set forth. I further certify that I am not a relative 10 ployee or attorney or counsel of any of the 11 es, nor am I a relative or employee of such 12 ney or counsel, nor am I financially 13 ested in the action. 14 WITNESS my hand and official seal at 15 ta, Sedgwick County, Kansas, this 10th day of 16 2019. 17 18 NANCY L. RAMBO, R.P.R., C.S.R. Registered Professional Reporter 19 Certified Shorthand Reporter 20 21 22 23 24 25

```
PRESIDING OFFICER: But thank you
 2 for clarifying that.
 3 Anything else from anyone? Okay. As I
 4 mentioned before, I'll be communicating
 5 with you about rescheduling our oral -- our
 6 conference call.
 7 Right now, it is basically 1:00 o'clock
 8 and this hearing is concluded. Thank you
 9 all. Off the record.
