A permit is required for all development in the Special Flood Hazard Area (SFHA). The National Flood Insurance Program (NFIP) defines development as “any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations or storage of equipment or materials.” Required documentation (Section G) will vary by project type (Section C) and elevation and floodplain information (Section D). See instructions in the [?] boxes on the following pages for additional information.

Section A: Applicant Information

Property Owner Full Name:	
Mailing Address:	
Email:	Telephone:
Contractor/Developer Name:	
Mailing Address:	
Email:	Telephone:

Section B: Project Location

Site Address:	
Parcel Number:	Latitude/Longitude:
Acres:	.
Legal Description:	
Description of Project: <i>(please be specific, attach pages as necessary)</i>

	Expiration Date:

Terms and Conditions (Applicable numbered items highlighted with a box.)

1. The undersigned agrees that all such work shall be done in accordance with all applicable county/city ordinances and the State of Kansas requirements as contained in K.S.A. 12-766, and K.A.R. 5-44-1 through 5-44-7.
2. **No work may start until a permit has been issued.**
3. **Structural Development.** All structural development must be properly anchored, constructed with flood-resistant materials, and designed to minimize flood damage.
4. **Residential Structures.** The lowest floor (including basement) of any new or substantially improved residential structure shall be elevated at least one (1) foot above the Base Flood Elevation, including utilities. **In AO Zones,** elevated at least two (2) feet above grade, including utilities.
5. **Non-residential Structures.** The lowest floor of any new or substantially improved non-residential structure will be elevated or dry floodproofed at least one (1) foot above the Base Flood Elevation.
6. **Utilities.** New or replacement water supply systems and/or sanitary sewage systems be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters, and on-site waste disposal systems be located to avoid impairment or contamination. All electrical, ventilation, plumbing, HVAC equipment, and other service facilities be designed and/or located to prevent water from entering or accumulating within the components during conditions of flooding.
7. **Accessory Structures.** A variance is required for wet floodproofing of structures greater than 600 sq ft with low-damage potential. The accessory structures must meet all NFIP flood opening requirements, in accordance with Article 4, Section B (1)(c) of this ordinance. No disaster relief assistance under any program administered by any Federal agency shall be paid for repair or restoration costs of the accessory structures.
8. **Agricultural Structures.** A variance is required for wet floodproofing of agricultural structures with low-damage potential in A, AE, AH, AO, and Shaded X Zones. Agricultural structures will not be eligible for disaster relief under any program administered by FEMA or any other Federal agency. Agricultural structures may be denied NFIP flood insurance policies if repairs do not meet wet floodproofing construction requirements.
9. **Elevation Certificate and Other Required Supporting Documentation.** The owner/authorized agent will provide a FEMA [elevation certificate](#) completed by a licensed land surveyor or professional engineer and all other required supporting documentation.
10. **Revocation of Permit.** This permit may be revoked if any false statements are made herein, or if the effective Flood Insurance Rate Map has been revised, or if the work is not done in accordance with the Floodplain Damage Prevention Ordinance of the presiding jurisdiction or other local, state and federal regulatory requirements. If revoked, all work must cease until permit is reissued. If the permit cannot be reissued, applicant acknowledges their responsibility to correct the issue, which may require removal of any development that may have occurred.
11. **Right to inspect.** The community official and/or their designee(s) has the right to inspect the work.

Section E: Signature of Applicant(s)		
By signing below, I agree to the terms and conditions of this permit and certify the information contained in this application is true and accurate. All property owners listed on the current deed of record are required to sign. In lieu of property owner signatures, an authorized agent may sign and may be required to submit evidence of authority.

Boxes: 1-Required, 2-Provided in Submittal, 3-Completeness Check

Section H: Permit Decision

Permit Approved. *The information submitted for the proposed project was reviewed and found compliant with adopted floodplain management standards.*

Permit Approved with Conditions. *The information submitted for the proposed project was reviewed. To ensure compliance with adopted floodplain management standards, certain additional conditions (attached) must be met.*

Permit Denied. *Proposal does not meet local floodplain standards. An explanation has been provided (attached).*

Variance Granted, in addition to Permit Approval. *A variation was granted from the base flood elevation (1% annual chance) established by FEMA consistent with variance requirements of Title 44 CFR § 60.6.*
