

These items can be poisonous or toxic if ingested:

- Detergents
- Sanitizers
- Polishes and Cleaners
- Insecticides
- Rodenticides
- First Aid Supplies and Personal Medication

Chemical containers must have a legible manufacturer's label. Working containers used for storing poisonous or toxic materials, such as cleaners and sanitizers taken from bulk supplies, shall be clearly and individually identified with the common name of the material.

**Store chemicals and other poisonous substances so they cannot potentially spill or drip onto food, equipment, utensils, linens, and single-service or single-use articles.**

*Do not store chemicals over food or places where food is prepared.*

*Do not store chemicals where they may drip onto food contact surfaces.*

*Do not store chemicals on or over food contact surfaces.*

*Store chemicals away from food and food contact surfaces.*

*All chemicals must be clearly labeled.*
