

### **PET FRIENDLY GUEST ROOM REQUIREMENTS**

- Lodging establishments that allow pets in any guest room must advise guests that the establishment is “pet friendly” by posting a sign in a conspicuous place at the front desk to alert guests that pets are allowed.
- If pets are allowed in select guest rooms, the establishment must deep clean the guest room following a pet or service animal’s stay before any new guests. This deep clean must consist of routine cleaning, vacuuming and shampooing the carpet and upholstered furnishings; vacuuming the mattress; and replacing all bed linens including sheets, mattress pads, blankets, bedspreads or top coverings.

**or**

- If the room is not deep cleaned, the establishment must notify new guests that a pet or service animal was previously in the room.

### **PUBLIC HEALTH REASONING**

- Pet dander acts as an allergen and/or asthma trigger, and deep cleaning can help prevent such reactions to the guests.
