3rd party delivery charges _____

SCHEDULE OF MAXIMUM AND MINIMUM WAREHOUSE CHARGES

SECTION A

The following maximum and minimum charges for storage and other services shall become effective March 1, 2009 for all individuals and firms holding a license under the Kansas Warehouse Act.

Listed below are the Maximum and Minimum Handling and Storage Charges for all grains, applicable to Schedule A, EXCEPT that in instances where the grain is processed by the receiving elevator for the producer, the Receiving "In" and Loading "Out" charges may be zero.

Any combination of the Receiving "In" and Loading "Out" charges as shown in the respective columns below may be filed in Schedule A, so long as said Charges stay within the Maximum and Minimum range.

All Grains

	TRUCKS In & Out	RAIL In & Out	BARGE In & Out	STORAGE Per Day
Maximum Rates, Per Bushel	N/A	N/A	N/A	N/A
Minimum Rates, Per Bushel	.09	.09	.04	.00060
Edible Beans, Per CWT, Only	2.00 In	2.00 Out	.10 Per CWT	Per Month

SECTION B

1. When grain is purchased from the producer in store by the warehouseman, the warehouseman may waive the receiving, handling and delivery charges.
2. When grain is sold out of a warehouse to a third party by CCC and/or a producer, the maximum delivery charge may be a fee not to exceed an additional .05 per bushel over the established rates set by the warehouseman.
Exception - If you are notified by a purchaser of CCC grain, they have thirty (30) days to notify you of purchase and request load out. If notification is completed, then all grain will be loaded out at CCC rates until shipped.
3. A minimum of ninety (90) days may be charged for any grain tendered for storage.
4. Any grain, which has been received at any grain elevator or grain warehouse and for which an actual sale, open storage or warehouse receipt has not been decided upon within thirty days after the receipt of same, is construed to be grain held in storage. Any grain not disposed of in same manner after thirty (30) days from date of deposit, whether open storage or receipted, shall revert back to the date of deposit for computation of storage charges.
5. Grain bank grain is grain which has been deposited with a warehouseman to be held for the account of the depositor to be returned to the depositor at a later date upon his request, processed in some form in amounts to be determined by the depositor, usually in the form of a processed feed and not intended for storage or sale to the warehouseman. If grain under this plan is returned in its original form, the regular rates apply.
6. These charges shall be full compensation for receiving, handling, storing, delivering and insuring. No discrimination shall be made between different customers by any public warehouseman.
