

# Industrial Hemp Discussion Issues

1. Advisory Committee
  - a) Structure
  - b) Duties
  - c) Terms
  - d) Meetings
2. Licensing for Grower
  - a) Appropriate fee level
  - b) Application requirements
3. Inspections/Sampling/Enforcement
  - a) Access to growing areas, storage locations
  - b) Number of inspections
  - c) Preharvest sample collections
  - d) Laboratory testing – Official KDA Lab
  - e) Enforcement
  - f) Seed

# Other Discussion Issues

- Research and Reporting
  - Research Plan
  - Results
  - Records
- Processing and Transportation
  - When does hemp become processed and deregulated
  - Definition of processing and who needs a license
- Certified Seed
  - Required use
  - Agricultural seed
  - Sources
  - Importation
  - KCIA certified seed program

# “Research” also means...

- Developing a research proposal to present to the Advisory Board for consideration, which will include:
  - Type of research (previous slide)
  - Purpose
  - Location
  - Methods
  - Duration
- Submitting a post research report which will include:
  - Research results
  - Economic and environmental implications

# Advisory Board

In the event that the Department acts alone to cultivate industrial hemp grown from certified seed and to promote the research and development of industrial hemp, the Secretary will:

- Establish an advisory board to review and recommend applications for pilot projects and research proposals
- Not approve any project or proposal without the recommendation of the Advisory Board
