

# Kingman County, Kansas

2024 ECONOMIC CONTRIBUTION REPORT  
AUGUST 2024

## Overview

The Kansas Department of Agriculture’s Economist creates annual economic contribution reports to estimate the impact of agriculture on the Kansas economy. The purpose of these reports is to provide information to stakeholders, policymakers, and the general public. In this report, the model analyzes the effects of agriculture on the Kingman County, Kansas, economy. For the estimated current year (2024), 24 agriculture and agriculture-related sectors directly contribute \$177 million in output and 948 jobs to the Kingman County, Kansas, economy. Including indirect and induced effects, agriculture and agriculture-related sectors have a total impact of \$216 million in output, 1,145 jobs and 15% of the total Gross Regional Product (GRP).

## Estimated Economic Contribution of Agriculture.

Methodology and Glossary on final page

### Results

In this model, the 24 agriculture and agriculture-related sectors have a total direct output of \$177 million and account for 948 jobs in Kingman County, as shown in the following table:

Table 1: Agriculture and Agriculture-Related Sectors’ Contribution to the Kingman County Economy

Contribution Type	Employment	% Employment	Total Value Added	% of Gross Regional Product	Output
Direct Effect	948	20%	\$43,289,000	11%	\$177,331,000
Indirect Effect	108	2%	\$7,777,000	2%	\$24,129,000
Induced Effect	89	2%	\$7,518,000	2%	\$14,957,000
Total Effect	1,145	25%	\$58,585,000	15%	\$216,417,000

Note: Individual effects may not equal the total effect due to rounding.

The agriculture and agriculture-related sectors provide a total estimated impact of \$216 million in output. These sectors also support a total of 1,145 jobs, or 25% of the county’s entire workforce. Another metric used to calculate the importance of sectors in the economy is their value added as a percentage of the Gross Regional Product. Total value added by the 24 agriculture and agriculture-related sectors is \$59 million, or 15% of the Gross Regional Product.

### Top Ten Sectors by Output

The table below shows Kingman County’s top ten sectors by output, including direct, indirect and induced effects. The *beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming* sector is the top contributor in output to the Kingman County economy, with \$72 million in total output.

Table 2: Top Ten Sectors by Output, Kingman County

Sector	Total Output
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	\$71,909,000
Grain farming	\$62,599,000
Farm machinery and equipment manufacturing	\$15,878,000
Oilseed farming	\$10,421,000
Other real estate	\$7,110,000
Cotton farming	\$4,813,000
Owner-occupied dwellings	\$3,192,000
Animal production, except cattle and poultry and eggs	\$2,576,000
Oil and gas extraction	\$2,453,000
All other crop farming	\$2,309,000

### Top Ten Sectors by Employment

Of the agriculture and agriculture-related sectors, *beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming* supports the most jobs in the county with 517 jobs. Table 3 illustrates the top ten sectors by total employment, including direct, indirect, and induced effects in Kingman County.

Table 3: Top Ten Sectors by Employment, Kingman County

Sector	Total Employment
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	517.64
Grain farming	207.33
All other crop farming	57.02
Other real estate	47.62
Cotton farming	40.46
Support activities for agriculture and forestry	35.61
Farm machinery and equipment manufacturing	23.28
Animal production, except cattle and poultry and eggs	18.74
Landscape and horticultural services	15.06
Full-service restaurants	12.26

## All Direct Agriculture Sectors

Table 4 is a summary of agriculture sectors represented with output and employment levels. These values estimate the value of output and the jobs these agriculture sectors support in the Kingman County economy. Generally, this analysis includes three categories: production, manufacturing or processing, and services. Note, the model does not include ethanol production nor wholesale and retail sales of final products.

Table 4: All Direct Agriculture Sectors, Kingman County

Sector	Total Output	Total Employment
Beef cattle ranching and farming, including feedlots and dual-purpose ranching and farming	\$71,909,000	517.64
Grain farming	\$62,599,000	207.33
Farm machinery and equipment manufacturing	\$15,878,000	23.28
Oilseed farming	\$10,421,000	9.87
Cotton farming	\$4,813,000	40.46
Animal production, except cattle and poultry and eggs	\$2,576,000	18.74
All other crop farming	\$2,309,000	57.02
Support activities for agriculture and forestry	\$1,363,000	35.61
Landscape and horticultural services	\$992,000	15.06
Animal, except poultry, slaughtering	\$895,000	1.18
Bread and bakery product, except frozen, manufacturing	\$674,000	4.10
Commercial hunting and trapping	\$660,000	4.49
Frozen cakes and other pastries manufacturing	\$433,000	4.10
Greenhouse, nursery, and floriculture production	\$417,000	2.40
Distilleries	\$340,000	0.55
Veterinary services	\$326,000	3.93
Other snack food manufacturing	\$219,000	0.36
Roasted nuts and peanut butter manufacturing	\$169,000	0.35
Poultry and egg production	\$167,000	0.21
Commercial logging	\$75,000	0.95
Vegetable and melon farming	\$50,000	0.25
Forestry, forest products, and timber tract production	\$25,000	0.33
Fruit farming	\$8,000	0.05
Tree nut farming	\$1,000	0.01

## Methodology

Using the economic software IMPLAN, the equilibrium displacement model calculates the estimated output and employment of all 546 different economic sectors if the current economy experiences no shocks within the agriculture and agriculture-related industries. IMPLAN sectors are based on North American Industry Classification System (NAICS) codes. The results of this model are broken down into direct, indirect and induced effects, and the IMPLAN framework avoids double counting. All agriculture and agriculture-related sectors represented in this model use the most recent IMPLAN data available (2022), adjusted for 2024 dollars. For this model, key statistics are defined as follows: total employment refers to the annual average of the sum of full and part time jobs held attributed to the 24 agricultural sectors, total gross regional product is the sum of the value added of all industries across the region, and total output is the total annual value of production for an industry or area.

## Notes and Glossary

These results are based on estimated production and employment numbers, along with estimated potential sector-, industry- and economy-wide effects. Therefore, these results will differ from actual events.

Due to confidentiality policies that exist within several agencies from which IMPLAN collects their data, some sectors in some regions may not have all data available.

The model provides results in relation to the agriculture and agriculture-related sectors. These results are not equal to the total effects of all 546 sectors but rather the total effects relative to agriculture.

The following terms are used throughout this report:

- *Direct effect*: the contribution from agricultural and food products
- *Indirect effect*: the contribution from farms and agricultural businesses purchasing inputs and services from supporting industries within the region.
- *Induced effect*: the contribution from employees of farms, agricultural businesses, and supporting industries spending their wages on goods and services within the region.
- *Value added* = labor income + indirect business taxes + other property type income
- *Gross Regional Product* = final demand of households + government expenditures + capital + exports – imports – institutional sales
- *Output* = intermediate inputs + value added
- *Employment*: full-time/part-time annual average, i.e., 1 job lasting 12 months = 2 jobs lasting 6 months each = 3 jobs lasting 4 months each. A job is neither full-time nor part-time.
