Written comments:	<p>I have lived in the Kinsley area all my life. I am not in favor of your desire to transfer water from the Ogallala basin south of Kinsley to Hays and Russel Ks. Although I sympathize with your dilemma, I do not believe helping yourself to the natural resources of this area is in our best interests. Any intelligent person can rationalize the withdrawal of water from this already depleting area will only result in two waterless areas. We rely on our groundwater resources for our lives and the life of this agricultural community. Your transfer will ultimately have grave consequences to our future. The aquifer is getting little if any recharge from Colorado. If allowed it will be a death sentence for this area.</p>
