

2022 Management Plan

For Republic County
Mike Nondorf, County Weed Director

Specify the goals and priorities of the program for the coming year.

To pick out my most extreme places of noxious weeds, and try to get them sprayed at least 3 times, with the ~~best~~ best satisfied chemicals for that weed. And keep on top of the rest, so they don't get away from you.

Specify the goals and priorities of the program for the next five years.

And to ~~stayed~~ stay ahead of weed problems, for ones that you have had trouble in the past years, keep on top of those problems, and check each spring and to stop BV and talk to them, or if you have to write a letter to them, until they get it taken care of.

Describe the areas which noxious weed species are known to occur within the county and specific locations of new infestations and areas particularly susceptible to new infestations.

Field bindweed	At least 80% of city right-of-ways has a little dead for some more some in crop ground, but is getting better
Musk thistle	Road sides have some in places, and have to check pastures city wide
Sericea lespedeza	A little bit down in the south east corner of Republic county
Johnsongrass	some up in the North central and North west sides of Republic county
Bur ragweed	
Canada thistle	Have a few Canada Thistles spread out over the county, but use same spray
Hoary cress	
Leafy spurge	
Quackgrass	
Kudzu	
Russian knapweed	

List the methods you plan to use to encourage compliance and the enforcement actions you will take if necessary.

Keep up with their weed problem, I will stop by and talk to them in person. If it don't get better will have the city H, send them a letter, so far when i have done that they all have come in and we have got the problem taken care of.

List your plans for working with state and/or federal agencies to control the noxious weeds on state and/or federal lands.

For this District the state sprays their own weeds. But, if i see in noxious weeds i will stop in at there office and will tell them, what I see and where at.

Describe your education and outreach plans for the coming year. Include training and professional development for yourself and your staff. (Attend District meetings? Annual Conference? Recertification?)

This year has been a challenge, with the covid and different health problems. But I try to go to all of the District meets and the annual conference for Recertification also. I try to have a district meeting at my office or town, and try to have a interesting meet to go along with everything.

List any non-noxious invasive weed species you plan to control and the types of integrated weed control methods you plan on using on them.

cattails, they plug up ditches and waterways
I have found that Roundup and a 2,4-D does a good job for me.

List your planned integrated weed management goals and procedures, including but not limited to biological control agent selection and distribution, pesticide selection and application and cultural and mechanical controls.

Biological Controls

Chemical Controls

I use 1 Pint of 2,4-D Amcin. per A
1 pt. of Tordon 22K per A
1 qt. act 90 per 100gals of water

Cultural Controls

Mechanical Controls

The Road-Bridge shreds the Road sides
with helps out on your bigger weeds like your thistles

Estimate the projected personnel, operations, and equipment costs of the proposed program.

Personnel costs	my salary \$36,253.13
Operations costs	chemical \$12,150.00
Equipment costs	fuel cost \$1,428.62

List the facilities and equipment available for use in managing the noxious weeds in your county, including a list of the equipment available for rent to the public and the rent you charge.

I have my main office and a chemical shed. Have my spray pickup, a hand sprayer we do not rent out.

Noxious Weed Department Employees

Name	Title	Years of service in the Nx Wd Dept.	# Jobs within the county
Mike Nondorf	weed Director	11	3

I certify that this is the official 2022 Management Plan of Republic County
