Middle Smoky Hill Custom Watershed Discovery Meeting

March 10, 2021

While we are waiting, please enter your name and community in the chat box!

Thank you for joining us today!

Your input is very important to this work.

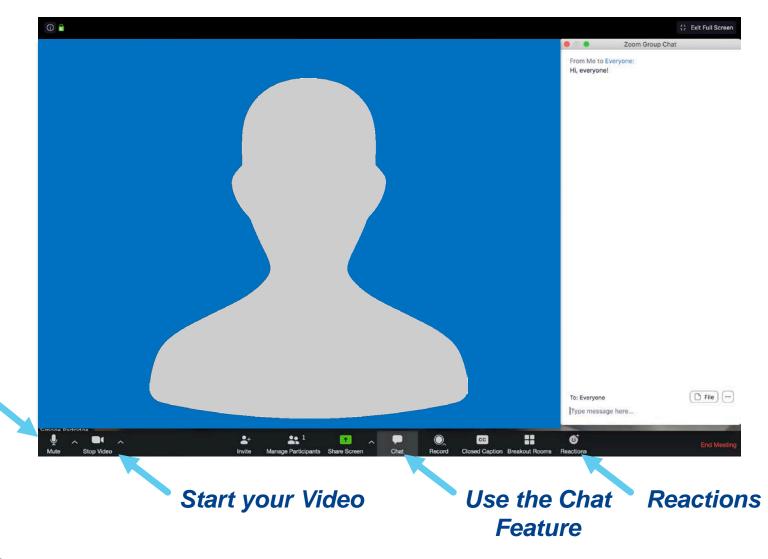

Rules of the Road

- Attendees will be muted during the presentation, to help eliminate background noise.
- Check out the chat to ask questions during the presentation! Or feel free
 to "raise your hand." We will pause for questions at various stopping
 points and have several poll questions.
- If you want to share your video, please do!
- For technical difficulties: send a private chat to Joanna Rohlf or email <u>Joanna.Rohlf@ks.gov</u>.
- We'll be recording this webinar for those who aren't able to attend today.

Zoom Features

Unmute

Introductions

Kansas Department of Agriculture

Tara Lanzrath, *CFM*Floodplain Mapping Coordinator

Joanna Rohlf, *CFM*Floodplain Mapping Specialist

William Pace, *CFM*Floodplain Mapping Specialist

Steve Samuelson, CFM State NFIP Coordinator

Cheyenne Sun Eagle, NFIP Specialist

Wood Environment & Infrastructure Solutions

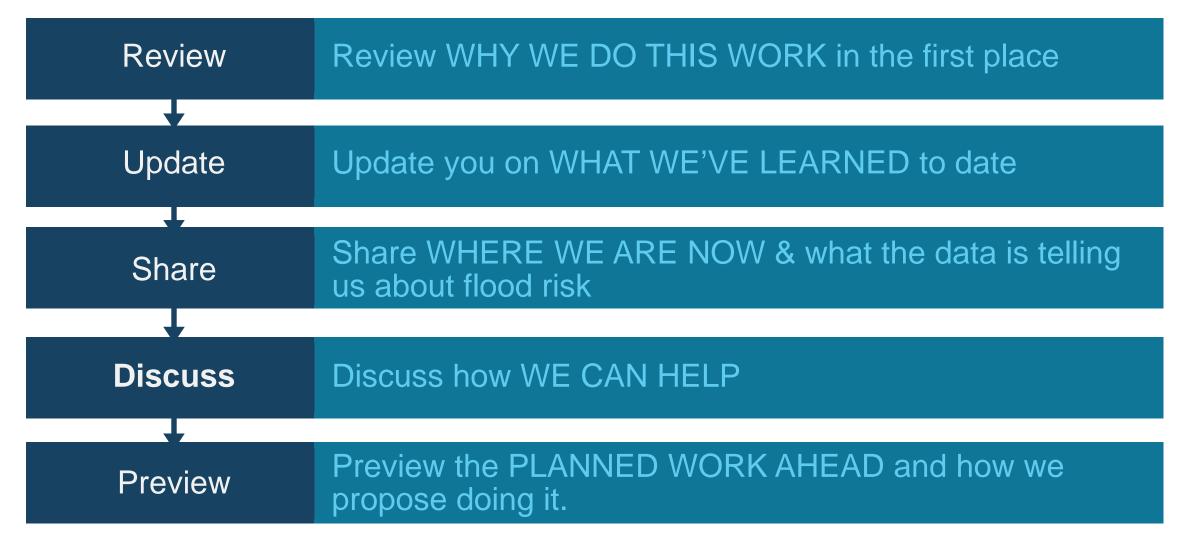

Joe File, *PE, CFM*Senior Associate/Program Manager

Maria Neeland, *PE, CFM Engineer*

FEMA Region VII

Andy Megrail, Regional Project Officer 5

Today's Goals

Why We Do This Work

FEMA Floodplain Mapping Program

- Risk Mapping, Assessment, and Planning (Risk MAP).
- Performed on a watershed basis.
- Consists of both Regulatory & Non-Regulatory Products.
- Through Risk MAP, we provide updated floodplain maps, as well as other (free!) data and tools that can help you plan to reduce your community's risk.

Planning: The "P" in Risk MAP

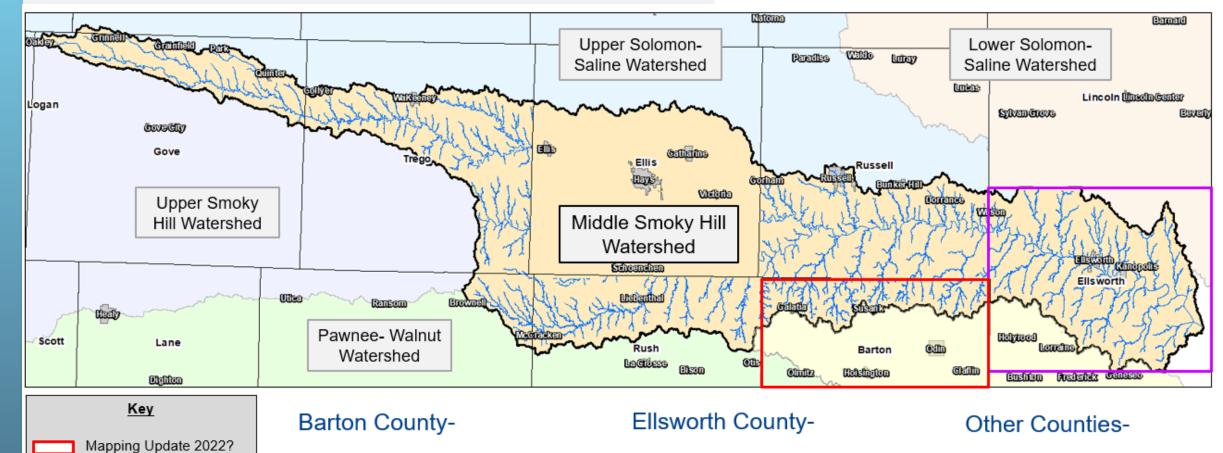

- The flood risk data from this work can and should inform your regional Hazard Mitigation Plan (HMP).
 - Region A: Gove & Sheridan Counties
 - Region B: Ellis, Ness, Rush, Russell & Trego Counties
 - Region E: Barton County
 - Region F: Ellsworth & Lincoln Counties
- Common themes in the regional plans:
 - Identify and seek additional methods of financial and technical assistance for hazard mitigation projects.
 - Acquire or conduct structural remediation of floodprone properties.
 - Study and implement drainage issues in floodprone areas and make recommendations for flood control measures, flood management procedures, and low-water crossing improvements.

Where We Plan to Update Your Map

 Mapping Update for areas outside of recent PMR Anticipated for 2022

Mapping Update 2023?

Mapping Update for areas outside of recent PMR Anticipated for 2023

TBD Based on Needs

Community Paper Maps

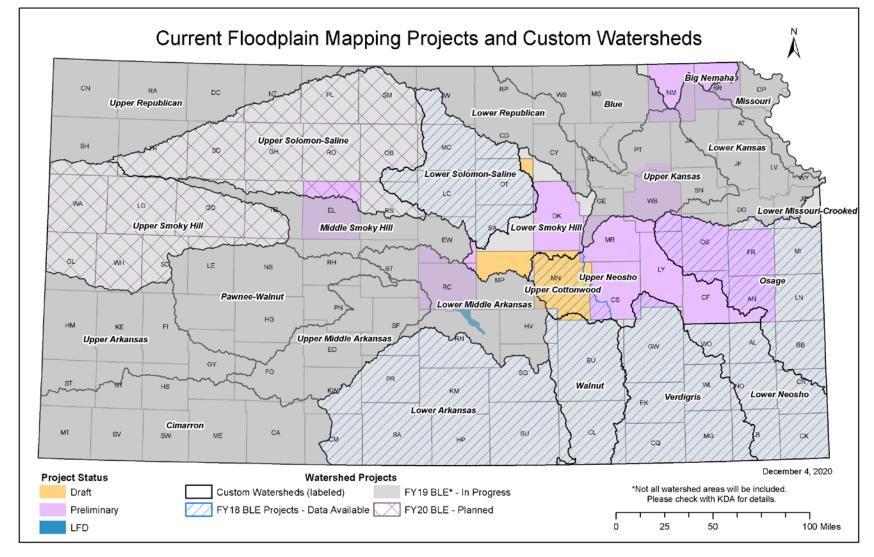

- City of McCracken in Rush County (1974)
- City of Dorrance in Russell County (1976)
- City of Russell in Russell County (1974)

All Paper Mapping is Zone A

We are doing this work across Kansas...

What We've Learned to Date

Identified Flood Risk Areas

- Areas impacted by high water levels for Kanopolis Reservoir
- Sedimentation and debris jams leading to reduced channel capacity
- Shallow flooding areas due to water not being able move
- Lack of defined overflow channels or outlets during large floods
- Areas impacted by releases from Cedar Bluff Reservoir

Participation in the National Flood Insurance Program

- Blue = Participates
 Red = Not Participating
- Cities of Brownell, Bunker Hill, Collyer, Dorrance, Ellis, Ellsworth, Galatia, Gorham, Grainfield, Grinnell, Hays, Kanopolis, Liebenthal, McCracken, Park, Russell, Schoenchen, Susank, Victoria, WaKeeney, Wilson
- Barton, Ellis, Ellsworth, Gove, Lincoln, Ness, Rush, Russell, Sheridan, Trego Counties

Number of Flood Insurance Policies

- Barton County 45
 - Galatia NP
 - Susank– 0
- Ellis County 26
 - Ellis- 47
 - Hays- 63
 - Schoenchen- 0
 - Victoria 1
- Ellsworth County 4
 - Ellsworth– 23
 - Kanopolis 0
 - Wilson-0

- Gove County NP
 - Grainfield NP
 - Grinnell NP
 - Park NP
- Lincoln County 1
- Ness County NP
 - Brownell

 NP
- Rush County NP
 - Liebenthal NP
 - McCracken- 0

- Russell County NP
 - Bunker Hill-0
 - Dorrance-0
 - Gorham- NP
 - Russell-2
- Sheridan NP
- Trego NP
 - Collyer- NP
 - WaKeeney-0

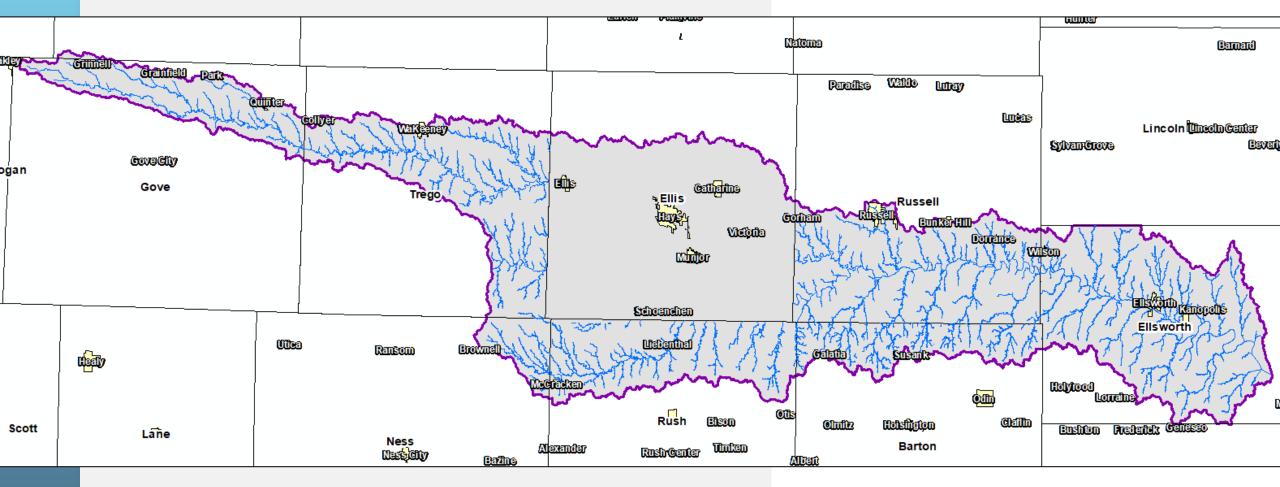

What the early data is telling us about your flood risk

- Results from our initial Base Level Engineering (BLE)
 - BLE is an engineering approach that provides an initial high-level (or "base line") understanding of flood hazards, with enough information for us to draft initial floodplain designations.
 - We're starting to develop and share this initial data because we've learned that the earlier we start partnering with you, the more accurate the map.

FLOODPLAIN: On the maps we create, the floodplains, also known as Special Flood Hazard Areas (SFHAs), are areas with high flood risk – where a flood of a certain level has a 1-percent chance of happening each year.

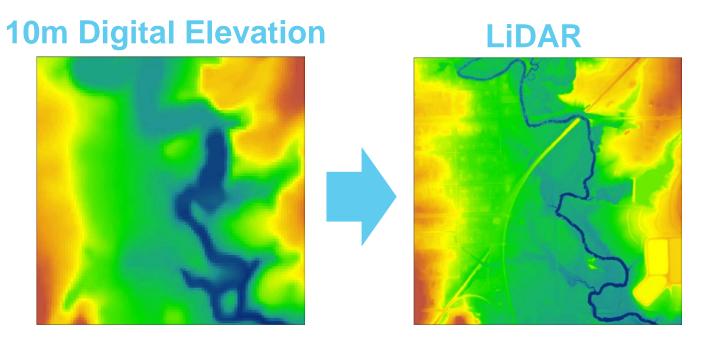

BLE Study Area

- * BLE floodplains are complete for this study area
- ** Note that Ellis County is currently undergoing a mapping update

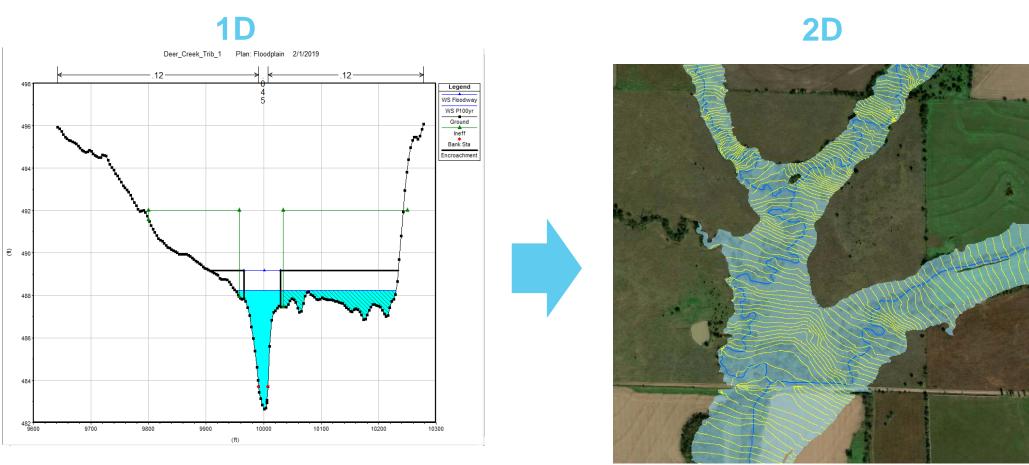

We Use 2D Hydraulic Modeling and LIDAR in our BLE

- Your current maps are done in one dimension (1D) and some are based on a 10-meter Digital Elevation Model
- Two-dimensional (2D) modeling and LIDAR- enhanced maps provide greater resolution and the ability to analyze how water moves across land using elevations and depth grids

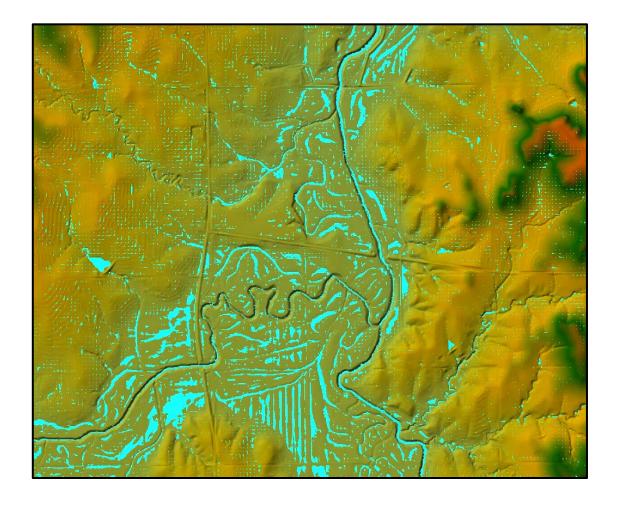

More precise data gives you more information about flood risk

2D Modeling gives us Animations

Key Takeaways for Base Level Engineering

1

It uses highly advanced engineering techniques

2

It provides early insight into community flood risk

3

It's an important step in our partnership to get the data right

Where We Are Now & What the Early Flood Risk Data is Telling Us

Where We Are Now: DISCOVERY

This is one of the most important phases of our work, where we:

- Review the flood risk information together and get your feedback;
- Identify the new data we might need to accurately update your flood risk;
 and
- Determine, with you, where mitigation (taking steps to reduce risk) makes sense for your community.

Discovery Report and Map

Discovery Report

Middle Smoky Hill Custom Watershed HUCS 10260006, 10260007

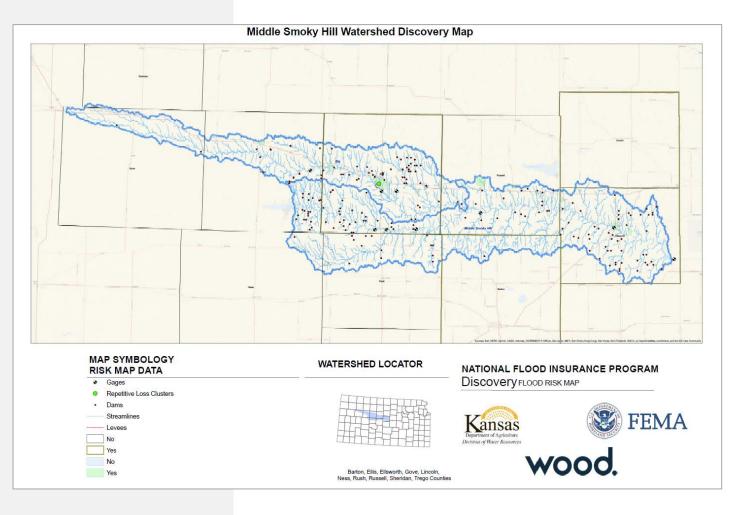

Cities of Brownell, Bunker Hill, Catherine, Collyer, Dorrance, Ellis, Ellsworth, Galatia, Gorham, Grainfield, Grinnell, Hays, Kanopolis, Liebenthal, McCracken, Munjor, Park, Quinter, Russell, Schoenchen, Susank, Victoria, WaKeeney, Wilson

Barton, Ellis, Ellsworth, Gove, Lincoln, Ness, Rush, Russell, Sheridan, Trego Counties

Report Number 01

DRAFT

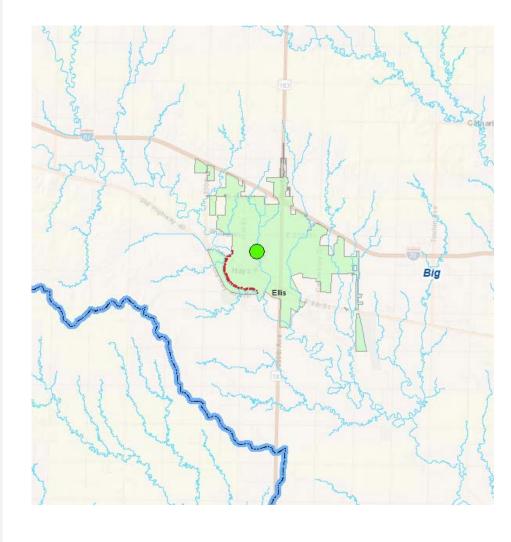

What We've Learned

Insurable buildings for which the NFIP paid 2 or more claims of more than \$1,000 in a 10-year period.

Repetitive Loss Structures

One cluster in Hays

NOTE: if you have an area where structures have been repeatedly damaged, we want to know! It's worth taking a closer look, and we might be able to help.

Repetitive LossClusters

Discovery: Information You Can Provide

- Information you have about past flooding, including high water marks.
- Updated aerial imagery
 - We typically use the latest imagery from the National Agriculture Imagery Program
- Survey or as-built plan information
 - Bridge or culvert openings
 - Channel information
- Any revisions approved for your previous map
 - Letters of Map Revision or Amendments (LOMRs/LOMAs)

Draft Floodplain Review

- As we review your BLE Data, we want to hear from you!
- Where are you experiencing flooding?
 - Intersections that often flood and stop traffic?
 - Drainage areas that cause problems?
 - Any parts of town where homes or businesses have flooded?
- Are there areas of recent construction/development? Or are there are plans to build?
- Any tricky areas to take a closer look at?
- Do you have projects underway, related to flooding, that we could help with?

How We Can Help

"Mitigation Technical Assistance"

Some Ways We Can Help

- Provide ideas on how to reduce flooding in trouble spots.
- Provide risk assessments for structures in your community, to help property owners understand the need for flood insurance, or to help you protect important public buildings.
- Use engineering analysis to show you what types of projects could reduce the impacts in floodprone areas.
- Assist with the Benefit-Cost Analysis if you are putting together a grant application.
- Support your participation in the Community Rating System.
- Help you explain flood risk and what it means to your community members.

TECHNICAL ASSISTANCE INFORMATION

FEMA Funds for technical assistance projects have come available in recent Cooperating Technical Partner (CTP) funding cycles. These projects do not include funding for construction of projects, but they can be utilized for modeling mitigation scenarios for possible projects. These funds can be applied for grant-related purposes, ordinance or code support, engineering and analysis, planning, outreach and education. Communities within Kansas can apply for Technical Assistance support through KDA, though priority will be given where there are active mapping projects. For questions, please contact Tara Lanzrath, by phone at 785-296-2513 @ or email.

Technical Assistance Request Fillable Form

You can visit the KDA website for more information, including a link to a fillable request form:

Preview of the Planned Work

Which We Call Our Data Development Scope

Where We Plan to Update Your Map

Barton County 2022 Proposed Mapping Updates

Scoped Studies

New Zone A - Excess Rainfall on Grid

New Zone A studies will be developed for these streams using 2D "excess rainfall-on grid" hydrology and 2D Hec-Ras hydraulics.

New Zone A - Gage Analysis

New Zone A studies will be developed for these streams using 2D Hec-Ras hydraulics and hydrology calibrated to Gage Analysis flows.

New Zone AE with Floodway - Gage Analysis

New Zone AE studies will be developed for these streams using 1D or 2D Hec-Ras hydralics and hydrology calibrated to Gage Analysis Flows. Floodways will be developed. Field measured structure data will be incorporated into the modeling. BFEs will be shown on the maos.

New Zone AH - Excess Rainfall on Grid

New Zone AH studies will be developed for these streams using2D Hec-Ras hydralics and "excess rainfall-on grid hydrology. Field measured structure data will be incorporated into the modeling. BFEs will be shown on the maps.

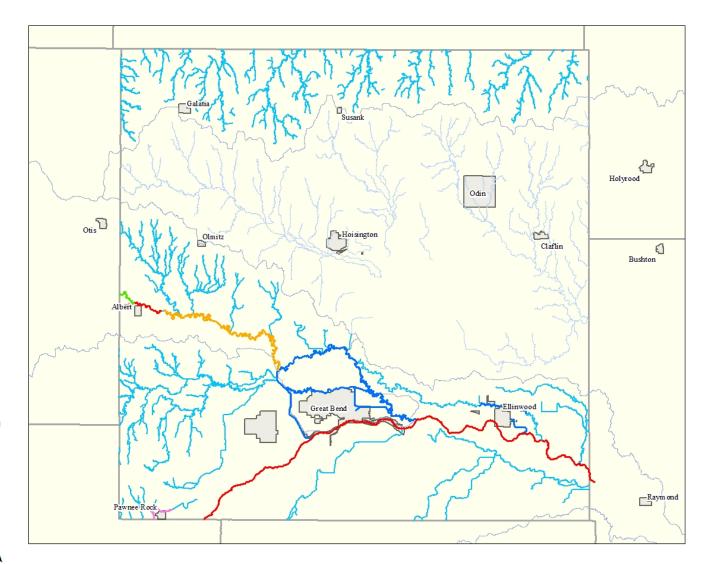

New Zone AH - Gage Analysis

New Zone AH studies will be developed for these streams using2D Hec-Ras hydralics and hydrology calibrated to gage analysis flows. Field measured structure data will be incorporated into the modeling. BFEs will be shown on the maps.

New Enhanced Zone A - Excess Rainfall on Grid

New Enhanced Zone A studies will be developed for these streams using 2D "excess rainfall-on grid" hydrology and 2D Hec-Ras hydraulics. Field measured structure data will be incorporated into the modeling.

Incorporation of Existing Studies from the Cow Watershed project

0 3.25 6.5 13 Miles

Data Development Scope

- Zone A
 - Additional Calibration to:
 - Gage Analysis for watershed
 - Rainfall-Runoff Modeling (HEC-HMS) in watershed
 - Historical Information
 - No Base Flood Elevations (BFEs) on the regulatory map, but available
 - Water Surface Elevation and Depth Grids generated
 - In most areas, not a lot will change from the BLE data

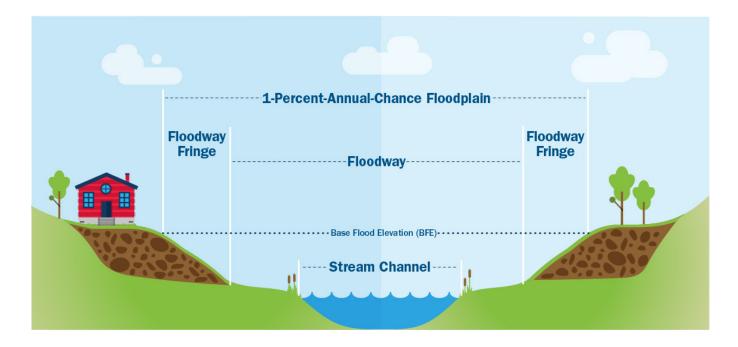

Data Development Scope

- Zone AE
 - Culvert and bridge openings are included in the modeling
 - Added detail to breaklines and land cover data in the modeling
 - Additional calibration to:
 - Gage Analysis
 - Rainfall-Runoff Modeling (HEC-HMS)
 - Historical Information
 - May have a floodway
 - Base Flood Elevations (BFEs) will be shown on the regulatory map
 - Water Surface Elevation and Depth Grids will be generated

What is a Floodway?

- Zone AE: with or without a floodway
 - If there is a floodway on the current map, the new map must have a floodway
 - If there is not a current floodway, a floodway is optional

Recap Goals and Your Role in the Process

Future Project Information

- As we proceed with the planned regulatory updates, we will share the following:
 - Draft Discovery Report with all the data we gathered in preparation for this meeting
 - Next project phase of Data Development will be funded for certain counties. For Counties where Data Development is planned, this will enhance the initial floodplain, or BLE, data.
 - We will notify the Chief Executive Officers and Floodplain Managers in each jurisdiction of the modeling we will use in your community and provide a 30-day comment period (SID 620 notifications).
 - Scoping Maps will be available on the project web page for your review.

Project Timeline

Discovery Meeting: 3/10/2021

- What data could contribute to making the map as accurate as possible?
- Revisit what flood risk reduction steps you are considering and how we can help!
- Provide feedback on data development scope, and mapping needs by 4/10/2021

Data Development Work:

- Barton County (anticipated for 2022)
- Ellsworth County (anticipated for 2023)
- Other Counties TBD Based on Needs

Your review and feedback on the draft maps

Project Timeline, continued

Once feedback is received, there is a public review of the draft maps

 We'll need your help in getting the word out to your residents Preliminary Map Products

Post-Preliminary Processing

STEP ONE: Provide Feedback on the BLE Maps

We want to incorporate your feedback into our work ahead. This could include:

- Review BLE floodplains and comment
- Review stream extents and comment
- Provide information on community needs or areas of specific concern.

How?

- Provide comments directly on the map (we'll show you how in a minute)
- Email this team
- Call one of us!

STEP TWO: Review Modeling Approach

Provide input on our proposed approach for the Data Development that will inform your regulatory map (also known as your Flood Insurance Rate Map, or FIRM)

- Comment period goes until 4/10/2021 (More time can be provided if needed)
- Comments can be received by:
 - Web Map
 - E-mail
 - Mail
 - We can provide hard copies if desired

If your County/Community is currently unmapped, let us know if you are interested in joining the NFIP!

- Property owners would be able to insure against flood losses
- Qualify for federal grants or loans for development
- Qualify for federal disaster assistance for damages caused by a flood
- Adoption of a floodplain management ordinance leads to smart development against flood risk

Key Takeaways

- This process is going to take time.
- Your involvement will help us produce better maps!
 - Get the word out and encourage participation in this project.
 - Review information as it becomes available.

DON'T HESITATE TO CALL; WE ARE AVAILABLE.

Stay Informed

- Email List
 - Get us names, addresses, and titles
 - Will be main source of project updates
- Project Updates
 - When important milestones are reached
 - When action is necessary (reminders)
- Meetings
 - Five planned meetings
 - For BLE/Discovery: Kickoff (DONE), Discovery Meeting (Today!)
 - For Regulatory Updates: Flood Risk Review, Open House, Post-Preliminary CCO meeting
 - Others, as needed
