Laura Kelly, Governor

Community Review Checklist

This checklist is to assist your community in the review of its Preliminary Flood Insurance Study (FIS) report and Flood Insurance Rate Map (FIRM). This checklist should be completed by a community representative familiar with flood hazards within your community.

| Flood Insurance Rate Maps | | Yes | No | N/A |
|---|--|------------|-----------|------------|
| 1. | Are your community's political boundaries correct? | | | |
| 2. | Are road names correct? Please note the FIRM's intended use is not a street map; road names should appear when in close proximity to identified flood hazards. | | | |
| 3. | Are there concerns with the depicted flood hazards? Are flooding source names and hydraulic structures (i.e. dams, levees), properly identified? Do the Base Flood Elevations, if applicable, appear scientifically correct? | | | |
| 4. | Do the floodplain boundaries correspond well with historical flooding patterns? | | | |
| 5. | Are there any areas prone to flooding not shown on the preliminary FIRM panels? | | | |
| 6. | Is the map repository address on the DFIRM Index showing the correct location where the DFIRM panels will be stored and available for public review within your community? | | | |
| Flood Insurance Study report (if applicable) | | | | |
| 7. | Is the community description, description of principal flood problems, and description of flood protection measures in the FIS Report correct? | | | |
| 8. | Do the 1% annual chance Profile elevations match the Floodway Data Table (Regulatory elevations)? And do they match the elevations labeled on the FIRM? | | | |
| Summary of Map Actions (SOMA) | | | | |
| 9. | If your community was provided a SOMA with your preliminary maps, did it include all Letters of Map Amendment and Letters of Map Revision issued since your last FIRM effective date? | | | |
| Additional Comments: | | | | |
